If Disaster in the Archipetago is to be Averted - Ex-Insurgent Would Establish a Big Bank.

Washington, Jan. 20 .- Secy. Root has transmitted to the senate and house copies of a petition received, by him, through Gov, Taft, from Aguinaldo, the late insurgent leader in the Philippines. The petition is a remarkable presentation of the conditions now existing in the Philippines and Secy. Root hastened to send it to Congress because it went a long way towards supporting statements he made to the committee of that body, and also demonstrated the necessity for prompt and exhaustive action on the part of Congress to prevent disaster and distress in the archipelago, was very short, simply reciting the character of the document and alluding to the picturesque and graphic manner in which Aguinaldo had described the conditions in the Philippines. The secretary attached particular importance to Auginaido's profession of a desire to do everything in his power to aid the Americans in carrying out relief measures and developing the islands. Aguinaido says in part:

Aguinaldo says an part: "Profoundly impressed by the sor-rows and calamities which afflict my people, and bearing in mind the good intentions which have inspired the acts of the civil commission. I have taken heart to present a project of a purely sconomical character, which, in my opinion, would remedy, if not commy opinion, would remedy, if not com-pletely, at least in part, the present stuation in which we find ourselves. "I propose to the honorable civil commission to obtain from Congress a United States treasury loan of \$20,600,-00 gold in cash, and also a credit of \$00,000,000 gold, which will guarantee the issue of paper to serve as money ley of South Bend.

that proposal to introduce local self-government in a modified form in the western provinces, which have hither-to been deprived of this privilege on account of their predominating or par-tial Polish population and on military grounds, is favored by Interior Minister von Plehwe. It is said that he will

reintroduce the measure which the late Interior Minister Siplaguine withdrew from the council of the empire when he assumed office. This measure caused the downfall of Minister Goremykin. Finance Minister Witte had placed himself in violent opposition to it, but he is declared to have subsequently changed his views about local self-government and constitutional reforms.

## , PURIFICATION OF THE BLOOD A San Francisco Physician Says it is Electricity Not Oxygen that Does it.

bert J. Atkins, lecturer on principles of medicine at the California Medical col-lege, in a recent paper read before the San Francisco County Society of Physicians and Surgeons, claims that ex-periments conducted by him have dem-onstrated that it is electricity, not ox-ygen, which purlies the blood in the

es through the membrane of the air cells of the lungs into the blood stream; also that the air cells secrete car-bon. He has discovered that the ac-tion which takes place in the lungs in breathing is also trained. breathing is electrical.

in contact with the secreted carbon causes combustion, which generates electric currents; these pass through the membrane of the air cells into the blood stream, renewing its life and changing the color of the blood from the venous to arterial, also causing the rythmic action of the heart, thus showing the lungs to be the imporant center of life.

The theory advocated by Dr. Atkins is that oxygen of the system comes from the food we eat and the water we drink, and must be refined by the process of digestion before it can be made in solution and enter the blood. He claims that a certain percentage of oxygen of air is consumed by means of the chemical action taking place in the air cells during breathing. The refuse of this process is exhaled as carbon

Further experiments made by him it the resistance of the hul system is so much greater than the pressure of the atmosphere that it would be impossible for osmosis of a gas to take place under such conditions. Other experiments show that venous blood can be changed in color like that of arterial blood by the use of galvanic electricity.

human beings, and spared the woman cast to them in the arena. It is astonishing how little sympathy women have for women. In the home the mistress sees the maid with the signs of suffering she recognizes so well, but she does not lighten the sick girl's load by a touch of her finger. In the store the forewoman sees the pallor and exhaustion which mark womanly weakness, but allows nothing for them. It is work or quit. Doctor Pierce's Favorite Prescription makes weak women strong and sick women well, by curing the womanly

diseases which undermine the health and sap the strength. "Favorite Prescription" establishes regularity, dries weakening drains, heats inflammation and ulceration, and cures female weak-

Chicago, Jan. 21.—An appropriation of \$9,000 made by the Illinois legisla-ture for a statue of Frances E. Willard, to be placed in Statuary hall, Wash-ington, has lapsed, and the present session of the legislature has been asked to re-enact it. The long time been required by the artists to complete their competitive models is given as the cause for their failure to draw the appropriation.

Helen Mears of Wisconsin, the artist boom. chosen, is now at work on the statue and will have it completed before an appropriation made at this session the legislature would lapse.

#### VENEZUELAN AFFAIR.

English Opinion Respecting it Kept Under Restraint. New York, Jan. 21 .- English opinion respecting the Venezuelan affair is kept under restrain, the London correspondent of the Tribune says, mainly because the American journals have been good natured and tolerant. There will be a general denunciation of the Balfour government if the American press were more critical and outspoken in condemning the provocative course

of the German naval commanders and objecting strenuously to the prolonga-tion of the blockade, when Mr. Bowen is fully armed with authority to pro-pose a settlement and to offer an adequate guarantee. The ministers, with-

#### Coal Will be Lower.

New York, Jan. 21.-Signs of a rush to cover on the part of independent operators and their agents are becom-ing apparent in the local coal market, and though these operators are doing all in their power to maintain the present level of prices, it is whispered there are several deserters from the ranks, who ar seeking safety by selling at lower figures. Operators do not hesitate to admit that the price of coal now depends principally on the ther-mometer and only a cold snap can prevent a gradual decline. With a mild spell the independents will be faced by the danger of being left with large supplies which no one will buy and their only escape from the predica-ment will be a substantial cut in fig-ures and that this reduction will come within a week is confidently predicted. It is reported that John Markle has been selling his coal at a figure far be-low the \$10 rate on which the inde-pendent operators had agreed.
