MRS. ELLISON **SUES FOR DIVORCE**

The much expected divorce case of Maud M. Ellison vs Clyde H. Ellison was filed today in the district court. The grounds upon which the complaint is based are failure to support and cruelty. None of the matters connected with the recent trial and acquittal of the defendant of having murdered A. S. Watson are set out in the complaint. It was expected that Ellison would be the first to start divorce proceedings, but his wife gained a point on him in that respect and launched her action this afternoon.

It is alleged that plaintiff and defendant were married in this city on May 23, 1900, and that the defendant for 23, 1900, and that the detendant to more than a year last past has wilfull neglected and refused to provide for his wife the common necessaries of life although having the ability so to de During all of said time Mrs. Ellison al-leges that she has been compelled to support herself or depend upon her fa-ther for support. Fifty Boilermakers and Helpers Are Still at Work.

Ogden, Utah, May 11 .- The secretary if the local Bollermakers' union this

morning received a telegram from John MacNell, head of the union at Kansas City, instructing the men in the South ern Pacific shops to remain at work for the next 15 days. The telegram for the next 15 days. The telegram states that a meeting has been arrang-ed with Harriman and Burt alming at a settlement of the Union Pacific strike. This metting is to be held next week. The men affected by the order in Ogden number 50 bollermakers and helpers and they had made all ar-rangements to go out at noon today when the message was received.

THE SITUAT ON. Men Are Not Anxious to Walk Out

On Short Line. The threatened strike of the boiler. makers and helpers on the Oregon

Short Line is not welcomed either by the men themselves or the officials. The men have to keep faith with their union which has ordered the sympathetic strike on all the Harriman roads while the officials are powerless to adjust matters, because there is nothing to adjust, as far

as the Oregon Short Line, O. R. & N and Southern Pacific are concerned. In all there are 10 boiler makers and 25 helpers employed in the Pocatello shops, two men and four helpers at Salt Lake, with a like number at Mont-

pelier, Ida., Kemmerer, Wyo., Lima and Butte, Man, and at Glenn's Ferry. J. F. Dunn, superintendent of motive power and machinery, spent all day yesterday and today in Pocatello, while General Superintendent E. E. Calvin arrived there last night in order to use his good offices in the direction of peace The men admitted that they had no grievance, in fact it is only a short time since the machinists and boller makers were granted a two-cent raise effective this coming pay day. W. J. Tollerton, master mechanic of the Utah division, this morning in speaking about the contemplated action of the men said: "The Oregon Short Line always endeavored to do the square thing by its men and we have never had any trouble, but this is a matter where our hands are tied, we have nothing to adjust and the mer have asked nothing of us, but the least thing they could do would be to give 30 days' notice of any such contem-plated action." The men who propose to go into this strike are making it a
