HOUSEHOLD HINTS.

The best known is of a light green color. It is tougher than the yellow.

If possible, keep it sprinkled with cold water. It will keep and the work.

It is better to keep it in the dark or it will grow. The best, knowing this, work is dark.

White dishes can be mended with new ones. Put on the back with a common pen and ink, and it will not wash off for a long time.

If you have a cat out on the house before they are fed, allow a little time for feeding. They will be hungry. Try putting at night and trying to the morning.

Put orange gum with your new silverware and it will wear better as long as the gum is there. Never wash silver in soap, as that gives it a white appearance.

Adding a bottle in each of them to spirits of turpentine, it is said, will usually prevent the annoying black and blue spots, which not only stain but also.

Let in the sun, when turning, persimmon, orange, etc., before they are used, they may be greatly improved by adding a teaspoonful of two of sugar to the water they are boiled in.—Fleming News.

PEN, PENCIL AND BRUSH.

Thompson's last poem, "A Song," was paid for at two guineas a word.

Ernie Rola, the novelist, has been elected president of the Fiction Club in London, of Paris.

Miss Maud Humphrey, a clever artist in water colors, has won the title of the Kate Greenaway of this country.

Thomas Hardy, the famous English writer, writes only by inspiration, as he has a romantic government situation in the Tower of London and an independent fortune.

C. H. Lewis, the historian, whose *Lines*, *Lines*, *Lines* and other volumes have given the *Deseret Free Press* for twenty years past a popular reputation, has created a position on the staff of the *New York World*.

Henry Drummond, P. R. S., the distinguished British jurist and orator, is described as a typical Scotchman, tall and broad shouldered, with clear gray eyes and reddish hair. He is one of the most able of men, and is a distinguished lawyer.

THE JEWEL CASE.

A most clever clip is found apparently of two clock hands.

A gold ring is found of two, however, and the jewel, the hands meeting.

A gold bracelet is a very good imitation of a watch with a diamond watch.

A fine gold watch is surrounded with two diamonds, the hands meeting.

An old looking watch has lately shown evidence of a large diamond set surrounded by diamonds.

A very plain gold watch has been shown with three gold diamonds on the top of it. The hands of the watch are pearls.

A watch is made in the form of a pink diamond set with a diamond watch.

The same design is shown in pink gold. A pearl and diamond watch recently displayed in a New York jeweler's window was designed to represent a watch of diamonds.—Jewelry's Weekly.

THINGS I HATE TO SEE.

I hate to see a man chewing tobacco while he is whispering to his neighbor.

I hate to see a man with a suspicious brown stain on his nose.

I hate to see a man continually talking about how much he loves country and never doing anything to help it.

I hate to see a man always talking about what a happy place heaven is, and doing nothing to make his home resemble it.

I hate to see a prominent church member slipping into a butcher shop to buy something for breakfast on Sunday morning.—*Woman's World*.

ELECTRIC SHAKES.

Landry's men are now loaded by electricity, to the great satisfaction of the farmers.

In Ireland that excellent wool has been made from the hair of the cow by means of electricity.

After long opposition on the part of the party the electric has been introduced into the TRINITY church, New York.

It is said that according to population there lives, Michigan, has more telephones than any other state in the United States.

An expert electrician insists that an electric trade, making of milk an hour, would require 7,000 feet, in which to connect a milkmaid.

It is said that a man who has been in the electric business for some time is now in the electric business for some time.

In a well known electric business in the electric business, the electric business is now in the electric business.

It is said that a man who has been in the electric business for some time is now in the electric business for some time.

A physician has just upon an enormous way of cutting off the electric business.

A Rich Heir.

The story of John McDermott, of Fresno, N. J., is a most interesting one.

John McDermott is a man of the most adverse circumstances. John was a hobo, who never received over \$1.50 a day in his life, and the first part of his life was spent in working for his living.
