In the same manner, domestic science is taught, pupils entering into the work in both departments with the greatest zeal. These features intensify the regular work and give it greater strength. BRIGHAM YOUNG COLLEGE.
Logan, March 13.—The game of basketball played in the gymnasium last Saturday by the college team and the team of the Latter-day Saints university, was without doubt the best game of basketball ever played in Logan. Real scientific playing was done on both sides, but nearly everyone thinks the college team did much the best playing. There can be no doubt about the truth of this popular opinion, since the score was so nearly even, and very nearly all the baskets made by the college team were thrown from the field, while 12 baskets for the opposite team were made on fouls. The exhibition of the visiting team lay entirely on the ingenious throwing of Mr. Taylor. The next game of two more to be played will take place in Salt Lake City next Saturday.

The carpenters are working on the shelves with which to fit up room 1 as a library for the pupils of the training school. It will be a library for the children and will be furnished with books suited to their age and power of appreciation.

WALKER'S STORE.

The New Hats Make Their First Appearance

Monday, Tuesday, Wednesday.

A liberal, satisfying array that leaves out none of beauty's conjurings. And how generous is Queen Fashion only the show can tell you. No narrow mandate is to bind the season of 1902. The great divergence of shapes, their universality of becomingness gives broadest play to individual taste. The keynote to style is only suitability from your own view point and the one problem to solve, "prettiness"—which if the many shall it be. "Oh," said an enthusiast, as the exhibit neared completion "the hats of this season are sweet enough to eat, the dearest ever sent us." Indeed, so they are—beauty creations; the foaming folds of tulle intertwining ribbons, feathers, flowers and richest laces make of them marvels of loveliness. American made. Paris made.
