Papers sent to subscribers by mail have the names stamped upon them, with figures opposite to indicate when the subscriptions will expire. For instance, *John Smith, 4-11-7*, means that John Smith's subscription will expire on the 4th day of the 11th month of this year, or November 4th, 18-7. Subscribers will please notice the figures on their papers, to see that they have their proper credits, and also to know when to renew their subscriptions, the rule being to stop the paper when the subscription expires.

A Fatal Accident on the President's Train.

HEAVY RAIN FALLS IN COLORADO.

A Child's Brains Blown Out at Cheyenne.

THE TEHAUNTEPEC SHIP RAILROAD IS NOT DEAD YET.

THE HOT WEATHER—THE O. R. & N. CO., ETC.

By Telegraph to the NEWS.]

The President.

CAPE VINCENT, N.Y., July 16.—When the steamer *St. Lawrence*, with the presidental party, made her way in the direction of Thousand Islands, she met the Canadian steamer *Spartan* from Montreal to Toronto. The steamer passed in close proximity, but the foreigner made no sign of recognition, notwithstanding the union jack floated from the *St. Lawrence's* peak.

FATAL ACCIDENT.

UTICA, N. Y., July 16.—An accident happened to the President's train tonight while returning from Clayton to Alder Creek. The train was brought to a stop before the presidential party became aware that there was any accident. The engineer had his hand ready to blow the whistle for the crossing when the connecting bar driver on the right hand side broke. The huge piece of steel revolved with terrible velocity, tearing out one side of the cab and ripping up the ties and ground as the engine ran along. A huge fracture was made in the boiler and the steam escaped in volumes. The engineer was found dead beside the cab. He had saved the fireman's life by forcing him up on top. No other casualities.

Notes From the Capital.

WASHINGTON, July 16.—A general principle of long standing and considerable importance in the administration of public lands is affirmed by Secretary Muldrow in his ruling upon the homestead entry case of

JAMES YOUNG,

of Salt Lake City. Its purport is that no amount of cultivation and improvement, and no showing of good faith in other respects, can atone for the lack of actual residence upon the land sought to be secured, and that even actual residence does not give validity to the claim except in so far as it shows an intension to make such residence permanent beyond the requirement of the title. Young had cultivated 50 acres of his claim, constructed irrigation ditches and built a house in which he personally lived. His improvement was valued at from $1,000 to $1,200. His family remained upon the place owned by him half a mile distant, and it was shown that he designed to abandon his claim as a place of residence as soon as he had made his title secure. The contest was made by one

VAN NOSTRUM,

a professional contestant, who proposed gaining some preference rights and selling them out. The local officers and commissioner decided for Young and against Van Nostrum, and the acting secretary orders a modification of this decision. He says that while Van Nostrum cannot acquire any rights in the matter, the government is not estopped from action upon the information it has gained, and he directs the cancellation of Young's claim.

The following notice was issued today: In order to carry out the policy of furnishing the public as far as possible with positive predictions of temperature indications, the officer beginning with predictions for 7 a.m. July 17th, 1887, will predict the

STATIONARY TEMPERATURE

during the month of July and August only when a rise or fall of three degrees is expected. Heretofore they have been allowed a limit of five degrees.

By direction of acting-Secretary Thompson an examination of the books and accounts of disbursing officers of the Treasury Department was begun at 9 o'clock this morning. An account of the cash actually held by each will be made and notice of examination was given to disbursing officers. So far everything has been found to be perfect. An examination of the accounts and books of the disbursing officers of the Department of the Interior will also be made.

Assistant Secretary Maynard has addressed a

CIRCULAR LETTER

to the customs officers along the northern frontier saying the department is informed that large quantities of opium shipped from Victoria, B. C., by the Canada Pacific Railway are being smuggled into the states over the northern frontier and urging greater vigilance in the examination of packages of merchandise from Victoria with a view to the detection and seizure of any opium which they may contain.

Much Moisture.

STERLING, Colo, July 16.—The drouth report is doing eastern Colorado considerable damage. Two heavy rainstorms have visited this locality during the past week. Crops and vegetation of all kinds are looking remarkably well. Owing to late heavy rains farmers all over the country report flattering prospects.

DENVER, July 16.—The mean temperature in Colorado throughout the past week has not been above 60 degrees. Refreshing rains have fallen in all parts of the state doing incalculable good to the agricultural and cattle interests. All the summer resorts are crowded, the

HOT WEATHER

in the east driving thousands to the Rockies for relief.

ALBUQUERQUE, N. M., July 16.—A special to the *Democrat* from Benson, Arizona, says the heavy rains of the past few days have caused serious washouts on the N. M. & A. and the Sonora Railroad, and it will be three or four weeks before trains can go through to Nogales. Water has run down from the mountains in large volume, drowning considerable of the stock in the valleys. The cattle men, however, feel jubilant over the heavy rainfull, which will insure good feed during the next fall and winter.

Shooting at Wimbledon.

LONDON, July 16.—In the shooting in the first stage of the Queen's prize at Wimbledon to-day, Dodds of the Irish Dumfries regiment, and Gardiner of the First Cumberland, tied for first prize. Subsequently they shot off the tie, Gardiner winning the bronze medal by fourteen points against eleven, in three shots. Gillies of the Nineteenth Canada, and Heath of the First Manchester, tied for the Prince of Wales prize, £100 and a badge. Gillies won in shooting off the tie. Three Canadians, Gillies, Thompson and Langstrath, obtained a money prize, and in the tyro contest a silver medal for the highest aggregate score. In the second stage the Queen's prize was won by Hill, of the Fifth Lanarkshire.

Fire in the Woods.

PITTSBURG, July 16.—Telegrams from Brockwayville in the lumber region of Pennsylvania, report forest fires raging in every direction, and fears are entertained that a number of settlements are threatened with destruction. A large force are at work fighting the flames, but so far all efforts have been fruitless.

Blew Its Brains Out.

DENVER, July 16.—A Cheyenne special to the *News* says: The three-year-old daughter of John C. Brooks, living at the station near this city, was killed this morning by the accidental discharge of a shotgun. Mr. Brooks had loaded his gun with a heavy charge for the purpose of shooting hawks, and while attending to some work on the railroad track left it in the corner of the room of the railroad pumphouse near his dwelling. It is supposed his children, while at play, knocked the gun down, when it was discharged, the entire load taking effect in the child's head, scattering its brains on the floor and killing it instantly.

The Ship Railroad.

PITTSBURG, July 16.—The stockholders of the Tehuantepec Ship Railway will meet in this city on the 26th to devise means for carrying on their work. Col. Andrews said this afternoon the meeting would be largely attended. On the 30th the directors will hold a meeting in Jersey City to elect officers and a successor to Captain Eads, deceased. They will meet at the latter place on account of their charter being obtained in New Jersey.

The Torrid Weather.

WASHINGTON, July 16.—Reports received at the signal office indicate that the day has been one of unusual and extreme heat in all parts of the United States lying east of the Mississippi and south of the lakes, the thermometer throughout the entire region registering 95 degrees or more. The heated term has apparently set in much earlier this year than heretofore, such a day as to-day being rarely experienced over such a large section of country until August.

A COOL WAVE

is on the way east from Nebraska, Dakota and Lake Superior region, where the temperature has fallen 10 to 30 degrees, but its effect will not be felt on the Atlantic coast before Monday and it probably will have lost much of its force on its way to the seaboard, so that the decline in temperature will hardly be more than five or seven degrees. Atlanta was the hottest city in the United States to-day, with the thermometer sizzing at 102 degrees, while Denver was coolest at 58 degrees.

NEW YORK, July 16.—Advices to the Associated Press show the following extreme temperature at the points named to-day, nearly all reporting the

HOTTEST DAY

of the year, and some of them the hottest for many years; New York 99 degrees; Washington 98¾; Philadelphia 88; Baltimore 100; Wilmington, Del., 100; Newcastle, Del., 100; Staunton, Va., 100; Richmond, Va., 104; Winchester, Pa., 102; Troy, N. Y., 95.

ST. LOUIS, July 16.—For the past week it has been intensely hot in this city, and there has been much suffering in consequence, though there have been few cases of prostration and only four fatalities up to to-day, when the thermometer beat all previous records this year and registered 102 in the shade at 4 o'clock, with eighteen prostrations, three of which

RESULTED FATALLY.

MILWAUKEE, July 16.—Up to 11 o'clock to-night twenty cases of sunstroke have been reported at the central police station. Of this number three were fatal, the victims either being found dead on the streets or dying in the patrol wagon. The day was the hottest ever known in Milwaukee, the thermometer this afternoon reaching 100 deg.

Some Explosives.

MILWAUKEE, July 16.—A special from Albany, Wisconsin, states that a mine containing 483 pounds of dynamite was found at Montello, where a construction party of the Chicago, Milwaukee and St. Paul Railroad was building a line of track of the Illinois Central Railroad. Manager Miller, of the St. Paul road, has received advices corroborating the report, and it is not known who buried the explosives.

The Case of the O. R. & N. Co.

WASHINGTON, July 16.—A motion was made to-day to dismiss the complaints of the Walla Walla people against the Oregon Railway and Navigation Company of excessive charges for the transportation of grain to Portland. It was declined by the commission, first, because notice was not given to complainants, and secondly, because the object was to reach the merits of the case and have them discussed and passed upon summarily instead of at the customary final hearing. The commission closed its record upon the matter with a paragraph of general interest, as follows: A practice thus to anticipate by motion a

FINAL HEARING,

the commission did not think advisable and would not therefore favor. It is the desire of the commission that the practice and proceedings in the case before them shall be in the simplest possible form consistent with justice, and that without dilatory motions, pleas in abatement or other interlocutory proceeding, the matter in question may be brought to an issue at the earliest practicable day when the final hearing may be had forthwith, and all proper questions will then be entertained, whether jurisdictional or going to the merits of the controversy.

The Walla Walla cases were set for hearing on October 11th next.

Bank Statement.

NEW YORK, July 16.—The bank statements shows the reserve increase to be $1,573,000. The banks hold $7,957,000 in excess of the legal rule.

BENTON'S HAIR GROWER.

All who are BALD, all who are becoming BALD, all who do not want to be BALD, and who are troubled with DANDRUFF, or ITCHING of the scalp, should use Benton's Hair Grower. EIGHTY PER CENT. of those using it have grown hair. It never fails to stop the hair from falling. Through sickness and fevers the hair sometimes falls off in a short time, and although the person may have remained bald for years, if you use Benton's Hair Grower according to directions you are sure of a growth of hair. In hundreds of cases we have produced a good growth of Hair on those who have been bald and glazed for years. We have fully substantiated the following facts.

We grow Hair in 80 cases out of 100; no matter how long bald.
Unlike other preparations, it contains no sugar of lead or vegetable or mineral poisons.
It is a specific for falling hair, dandruff, and itching of the scalp.
The Hair Grower is a hair food, and its composition is almost exactly like the oil which supplies the hair with its vitality.
Sold by druggists or sent on receipt of price, $1.00.
BENTON HAIR GROWER CO.,
dcod & s Cleveland, O.

DEAFNESS Its causes, and a new and successful Cure at your own home, by one who was deaf twenty-eight years. Treated by most of the noted specialists without benefit. *Cured himself* in three months, and since then hundreds of others. Full particulars sent on application.

The Crops.

CHICAGO, July 17.—The following crop summary will be printed in this week's edition of the *Farmers' Review*:

Drought throughout the Northwestern States is injuring all the crops more or less. Corn, although not materially damaged so far, is commencing to show the effects of the dry season and must suffer considerably if rain does not fall soon and in sufficient quantity. As a result of the drought, the oat crop is ripening too fast and will hardly make three fourths of an average crop if the drought continues.

Estimates of the average yield of winter wheat in different states and reports of the spring calculations of the probable returns, are as follows:

Sixteen counties in Illinois, 15 bushels, a falling off of 2 bushels as compared with our report of last week; Morgan reports the yield as high as 25 bushels, and Pope as low as 8 bushels. Twelve counties in Indiana give an average of 12 bushels per acre. Four Kansas counties report a yield of 17 bushels, but others report returns as very light to very poor; for the whole state, the yield is undoubtedly poor. Four counties in Kentucky, 11 bushels. Three Michigad counties, 13 bushels. Eleven counties in Missouri report an average yield of 19¾ bushels. Our Ohio reports indicate a fair to good yield, but the figures are not given. Reports from Wisconsin place the yield at from 14 to 20 bushels per acre.

Reports on the condition of spring wheat are as follows: Nineteen counties in Iowa place the average at 72 per cent. Carroll, Cass, Clayton, Howard, Iowa, Keokuk and Madison counties cannot state an average, the crop being almost totally destroyed by insects. Eleven counties in Minnesota place the condition at 71 per cent. Twelve in Nebraska report an average condition of 84 per cent., and seven counties in Dakota 89 per cent. Insects are doing considerable damage in some localities to corn. Chinch bugs, as was feared, attacked this crop, after the harvest of winter wheat.

The average condition of the crops as collected from our reports received last week in different states is as follows: Twelve counties in Illinois report an average condition of 91 per cent; twelve Indiana, 93 per cent; seven counties in Ohio, 98 per cent; fourteen Missouri counties report a condition as high as 106 per cent, while thirteen counties in Nebraska place it at 104 per cent, and twenty-four counties in Iowa head the figures with an average condition of 103 per cent. Fourteen counties in Minnesota report the condition an average of 99 per cent, and seven Wisconsin counties report a like average. Dakota counties lead the whole list with an average of 120 per cent. Six Michigan counties place their average at 101 per cent, and Kentucky counties reporting this week at 100 per cent. Nine counties in Kansas report an average condition of 102 per cent.

Pastures are suffering from lack of rain.

Potatoes and apples do not promise much more than half crop. Hay hardly reaches that figure.

The Destroyer.

PITTSBURG, July 17.—This evening a fire broke out in the plate department of Hammond & Sons' iron works. The loss is estimated at $150,000, insurance $75,000.

INDIANAPOLIS, July 17.—A fire broke out in the car works at Terre Haute at midnight and destroyed the whole establishment. The loss will be about $150,000; insurance not known.

It Didn't Work.

BERLIN, July 17.—In consequence of the rumor that slips of paper had been found in several places through which the imperial train would pass, endorsed—"To-night, about midnight, the Emperor's train passes; be ready."—a fictitious special train was dispatched before the Emperor's. The route from Mayence to Darmstadt was lined with police and gendarmes, but both trains passed safely and without incident.

Weather Crop Bulletin.

WASHINGTON, July 17.—Following is the weather crop bulletins of the signal office for the week ending July 16th:

During the week ending July 16th, 1887, the weather has been warmer than usual, except in the Gulf States, northern New England and on the Pacific coast, the average dry excess ranging three to eight degrees from the middle Atlantic States westward to the Rocky Mountains. It has been slightly cooler than usual in the cotton region and on the Pacific coast, the daily average being three to five degrees below the normal.

It has been slightly cooler than usual on the Atlantic coast and from Lake Superior westward to the Pacific coast during the week. There has been a deficiency in the rainfall generally throughout the agricultural districts east of the Rocky Mountains except in Missouri, northern Wisconsin, Colorado and Dakota, where slight excesses are reported.

The large season of deficiency in rainfalls previously reported in the upper Mississippi and lower Missouri valleys has still been further decreased during the past week and it now ranges from five to ten inches. In Illinois and Iowa local showers fell in sections of the corn belt, but not over the entire area, and the rainfall was not in sufficient quantity. The weather has been favorable for the harvesting of wheat, which has been generally completed, except in Minnesota and Dakota, where it is now in process and where all growing crops were improved. In New England and the middle Atlantic States the weather has affected favorably all the growing crops.

The indications at 7 a. m. to-day, July 17, are that showers will occur in the next 24 hours in the western portion of the corn belt, where they are greatly needed.

Boisterous Weather.

NEW YORK, July 17.—The air was very close this morning. Towards noon heavy clowds filled the sky without any warning and a terrible windstorm set in. Thousands of people out for a day's pleasure were caught in the rush of the wild elements. Trees were torn up by the roots in Central Park and the battery. The wooden fence around Castle Garden on the south side was blown down. On Sixth Avenue two trees were torn up by the roots and carried some distance. Along the river front and bay the storm raged with great fury. Hundreds of small sail boats and other small boats were out and the occupants experienced much difficulty in making a safe landing. Police boats at once steamed out on the bay to rescue the unfortunates; the crews rescued about thirty occupants of sail boats, and as far as can be learned at 9 p.m. none were drowned, but it is probable that drownings have occurred. Dr. Cyrus Edson, of the health board, was among the rescued. They were taken from a sinking boat off Clinton, Staten Island.

Close Work.

LONDON, July 17.—At Birmingham yesterday, Temple won the half mile bicycle championship and beat the quarter of a mile grass record made at Norwich on Thursday. Woodside lost the 25 mile championship race by a yard.

The Heated Term.

CHICAGO, July 17.—The hot weather of Saturday was intensified to-day and there was much suffering throughout the city. From 7 a.m. till 1 p.m. the mercury ranged from 90 to 102. The records of the police department for to-day show that not less than 45 persons were stricken down; 18 have already died. On Saturday the list was appalling; the total number of cases cared for by the police department alone was over one hundred; thirty have proved fatal. When the complete record is made, it will be unpresented in the history of the city. Such a degree of heat has not been experienced in this city for 30 years.

A WINDSTORM,

followed by a light rain, passed over the city this morning, and at 10 to-night the temperature had dropped to 93.

WHEELING.

WHEELING, W. Va., July 17.—The mercury ranged from 105 to 108. No fatalities.

FORT WAYNE.

FORT WAYNE, Ind., July 17.—One hundred and two in the shade and a number of fatalities was the record in this city to-day.

ROCKFORD.

ROCKFORD, Ill., July 17.—No prostrations have been reported. Mercury 105.

GALVESTON.

Chicago news special from Galveston says the heat for the past six days has averaged 100 degrees; to-day it reached 104. Four deaths yesterday and two to-day.

JOLIET.

JOLIET, Ill., July 17.—The record was beaten to-day; the mercury touched 113 in the shade. Two deaths and eighteen prostrations.

PITTSBURG.

PITTSBURG, July 17.—This was the hottest and at the same time the driest Sunday ever known here. Through the efforts of the law and order party every saloon in the city was closed tight for several hours. To-day the thermometer registered 101 in the shade, the highest point reached for years. Six fatalities of sunstroke and fully a score of prostrations were reported. A number of sudden deaths are also recorded which may be attributed to the torrid spell.

This afternoon, at 3 o'clock the dead bodies of Wm. Corrigan and John Jennies were found in their rooms in John Delain's tavern on Grant Street. The men were not addicted to excessive drink, and the cause of their death is shrouded in mystery.

PHILADELPHIA, July 17.—With a single exception—July 8th, 1876—to-day has been the hottest for thirty years. At 2 o'clock this afternoon the thermometer registered 102 degrees in the shade, being just one degree less than that of July, 1876, and one and a quarter degrees greater than that of yesterday. Up to late yesterday, 30 cases of sunstroke were reported, 14 of which resulted fatally.

CINCINNATI.

CINCINNATI, July 17.—There were reported 48 cases of sunstroke in the city to-day, 18 of which were fatal, and at midnight there were numerous additional cases for the patrol wagons. The mercury on the street during most of the day ranged from 100 to 104 and the air was very still. People to-night are standing, sitting and lying even on the sidewalks, and the hospitals are filling up with patients.

Gross Clearings.

BOSTON, July, 17.—A table compiled from specials to the *Post* from managers of leading clearing houses of the United States show, that the gross clearings for the week ending July 16, were $950,785,024, an increase of 10.3 per cent. over the corresponding period last year.

The President.

FORESTPORT, N. Y., July 17.—President and Mrs. Cleveland spent the day quietly resting at the parsonage to-day.

Mgr. Persico.

DUBLIN, July 16.—Monsgr. Persico, papal commissioner, to-day dedicated a chapel at Wicklow. In the course of his remarks he said that while he had been in Ireland he had been inspired with admiration for the people in whose breasts he believed patriotism and reverence for the Catholic faith were deeply rooted. The Pope, he said, loved Ireland, and for that reason he had sent a commissioner to inquire into the condition of the people.

Earthquakes and Volcano.

LONDON, July 17.—Slight shocks of earthquake were felt in Sicily and along the Italian coast at 8 o'clock this morning.

Mount Ætna is in a state of eruption. No damage is reported.

Dead.

HARTFORD, Ct., July 17.—David B. Mosely, founder and editor of the *Religious Herald*, died here to-day, aged 74.

Preparing for Trouble.

INDIANAPOLIS, July 17.—Logan sport Ind., item: Twenty-five extra deputy sheriffs have been sworn in and are patrolling the streets near the jail. At one o'clock 150 are reported as organized two miles south.

The most distracting trouble, lumbago, is effectually removed by St. Jacobs Oil.
