WHAT IS THIS?
THE DRESSMAKER'S FRIEND.

The New Measure.

Wonder of the Nineteenth Century. Endorsed by all the Leading Tailors and Modistes wherever introduced.

A great many wonder why the measure and substitute of the standard garment cutting should be so successful in making a perfect fit on every form without changing a line. This is because it is a measure of the body in the only system in the world that is adapted to the "true" measure. This true measure is in itself a perfect wonder and every tailor and dressmaker who has seen it declares it to be the only true basis of correct measure. It is entirely different from all of the old style measures. With it you can obtain in a moment, where there are any changes to be made, as it brings out every outline of the human form, and therefore you can cut a garment fit a different person just as easily as for the most perfect form.
