HORTICULTURISTS MEET.

Testerday afternoon a meeting of the brticulturists of Weber county was held in the county court house for the se of listening to addresses from H. E. Van Deman, who is travelthrough the Northwestern States In ing incode the NorthWestern bettes in De interest of horticulture for the Pan American Exposition to be held at Buf-talo. New York, from May 1st to No-tember 1st, 1901. Prof. C. B. Close, horalturist of the Agricultural college, Logan, also spoke. The meeting was presided over by Charles A. Hicken-loper, and C. W. Child acted as secre-

The first speaker was Prof. Van Dean, who said the purpose of his visit in this city was to awaken an interest ng the fruit growers of the State of th to send exhibits of their fruits nd agricultural products to the expo-

Annum Simmons, Peter Hansen and Thomas Jarvis appointed appraisers. M. E. Price vs Mount Nebo Land & Irrigation company: defendant James Gardner siven thirty days in which to

The remedy is in the form of of pleas-ant tasting tablets or lozenges, contain-ing vegetable and fruit essences, pure aseptic pepsin (government test), gol-den seal and diastase. The tablets are sold by druggists under the name of Stuart's Dyspepsia Tablets. Many interesting experiments to test the di-gestive power of Stuart's Tablets show that one grain of the active principle contained in them is sufficient to thoroughly digest 2,000 grains of raw ment.

that gentleman fully believed belonged to him. Acting upon this belief, he took the colt up and put it in his corral. Shortly afterwards Mr. Christensen went to get the colt and while there, it is alleged, struck Mr. Longhurst over the head, knocking him down, took the colt and left shartly thereafter. Mrs. catharties, which simply irritate and inflame the intestines without having any effect whatever in digesting food Longhurst found her husband in an insensible condition. Christensen arrested on a charge of grand larceny which was finally withdrawn for lack of evidence. Yesterday he was called to answer to the charge of assault, with

If the stomach can be rested and assisted in the work of digestion it will very soon recover its normal vigor, as no organ is so much abused and over-

worked as the stomach. This is the secret, if there is any secret, of the remarkable success of Stuart's Dyspepsia Tablets, a remedy practically unknown a few years ago and now the most widely known of any treatment for stomach weakness

This success has been secured entirely upon its merits as a digestive pure and simple because there can be no stomach trouble if the food is promptly digested Stuart's Dyspepsia Tablets act entireon the food eaten, digesting it com-etely so that it can be assimilated inblood, nerve and tissue. They cure dyspepsia, water brash, sour stom-ach, gas and bloating after meals, because they furnish the diges-tive power which weak stomachs lack and unless that lack is supplied it is useless to attempt to cure by the use of "tonics," "pills" and cathar-tles which have absolutely no digestive

Stuart's Dyspepsia Tablets can be found at all drug stores and the regu-lar use of one or two of them after meals, will demonstrate their merit better than any other argument.

President Rigby of Fremont Stake, and father of Sheriff Rigby of this county, is lying near death's door at the dents. The school meets some little opposition, but generally speaking the people are interested in it, and are supresidence of his daughter here, with porting it both with their kindly words and money.

The city council at its special session A concent was given by the members last evening granted the request of the sugar factory people for a change in the right of way to the factory grounds of the academy choir and elocution class Saturday evening, which proved a success socially and financially. The library is increasing rapidly in the number of books. Nowhere will there be found a more earnest set of students Logan, Cache County, Feb. 14 .- Great preparations are being made for the re-ception of the Legislature in this city than are attending this school. The polysophical society meetings are well tomorrow. The joint college and city committee held a meeting last evening attended by the public, and interres at which all details were arranged. The ing programs are gone through with train bearing the solons is expected to arrive at about 11:30 a. m., and will be

each meeting.

hay is selling from \$6 at \$7 a ton. The "Star Valley Ploneer," a weekly newspaper devoted to interests of Star Valley Stake, will make its first ap-pearance about Feb. 15th. It will be printed by the Ploneer Printing com-pany of Afton, Wyoming. We extend to it a hearty welcome and bespeak for it a long and useful life.

All ward organizations of the Afton ward are in complete running order. The tithing for the Afton ward amounted to over \$3,000 for the year

SCIENTIFIC MISCELLANY

Meisorites became known in the nineteenth century, the fall of stones at L'Aigle in 1803 having given the first accepted evidence that world fragments reach us from space. During the century eleven such showers were noted. At L'Aigle 2,000 or 3,000 stones fell; at Pultusk, Poland, 100,000 stones are esimuted to have fallen in a shower in 868, the total weight being 400 pounds at Estherville, Iowa, about 750 pounds of meteoric matter fell in 1879; and near Forest City, Iowa, several thousand stones fell in 1890. A mass of meteoric iron fell at Mazapil, Mexico, in 1885, at a time when observers were watching for Biela's comet, and during a star shower. About 285 observed meteoric falls were recorded for the century, but only five of these were meteoric irons. In recent years a dozen or more important collections of meteorites hav been built up. The largest is that of Vienna, which represents most of the known falls-more than 500-with a total weight of seven tons. So import ant have these specimens become that one especially rare one has been valued at four times its weight in gold. In these meteorites 29 elements have been dis-covered, but all of them exist also in the earth.

In the sun-glass treatment of Dr. H. T. Webster, cancerous growths are burned off by the concentrated rays of the sun, and it is claimed that cures have been effected by three or four cauterizations at intervals of a week. The parts are burned each time so as to smoke freely. It is suggested that not only is the malignant growth destroyed but that adjacent tissue is stimulated and given increased vitality.

A complete record of the plant kingdom has been begun by Prof. A. Engler, who will be aided by the Prussian government and the Imperial Academy t Sciences. Each of the 280 families will form a monograph by itself, with a separate index. The great undertaking will occupy many years.

A magnificent marine worm of the genus eunice is one of the present at tractions of the Berlin Aquarium. like the worms with which we are familiar on land, these creatures, of which specimens are occasionally taken by dredges near Rovigno, on the Adriatic Sea, are beautiful in form and color. The specimen held captive at Berlin is about three feet long and as thick as one's finger. Around its mouth are five long feelers, with gills on both sides like incessantly moving feathers of a rusty brown color, and it has more than 300 legs. Bundles of muscles extend into every part of its marvelous body. By day this worm remains covered by sand, only its head being visible, but at night it crawls out to get the meat on which it chiefly subsists.

Fermentations of various kinds are produced by microscopic fungi, like the yeast plant, or by enzymes, chemical substances like diastase and pepsin, experin Buch ner seem to indicate that all fermentations are due simply to chemical action, the presence of the living cell being un. necessary even in yeast fermentation. Quantities of yeast were sterilized by drying in vacus and then heating several hours in a current of hydrogen at 100 degrees and 110 degrees C., and this yeast was then ground up with sand, kieselguhr and glycerine solution. Liquid pressed from this mixture had nearly half the fermentive power of the

CASTLE DALE.

The Snow Fall - Death of Isaac Evans - Academy Notes.

Special Correspondence. Castle Dale, Feb. 12 .- Southeastern Utah has been blessed with a beautiful fall of snow. Castle Valley is especially benefited. Before the snow our farmerds had become so desperate that many had concluded to abandon their farms and go to the mines or railroad for employment. But a happy change has some. Encouraged by the prospect of plenty of water for irrigation next season, preparations are being made to utilize every available acre of ground. On the Cedar mountain, where last year only four inches of snow fell, it is

now two feet deep. The health of the people is good. No smallpox to bother us, and only a few

cases of fever. DEATH OF BROTHER EVANS.

A death occurred yesterday morning. which has cast a gloom over our quiet town. Brother Isaac Evans, who has been a sufferer for some time, passed peacefully to his rest. He was a native of Wales, and with his family, a wife and seven sons, joined theChurch and emigrated to Utah thirteen years ago. Being a coal miner by trade, he settled at Sodfielid. For some time past he has made Castle Dale his home. Brother Evans died in full faith, and was strong in the belief of the divinity of bactor built's mission. of Joseph Smith's mission. Two of his sons were killed in the Scofield explo-sion. The other five will lay their father away tomorrow.

EMERY STAKE ACADEMY.

fold at all grocery stores-order it next time.

For the weakness and prostration following grippe there is nothing so prompt and effective as One Minute Cough Cure. This preparation is highly endorsed as an unfailing remedy for all throat and lung troubles, and its early use prevents consumption. It was made to cure quickly. F. C. Schramm,

AFTON, WYOMING.

New Ward Organized - The Star Valley Pioneer.

Special Correspondence.

Afton, Uinta County, Wyo., Feb 12. Change in Stake Presidency - New -We are enjoying fine winter weather. The snow is about one foot and a half deep, and the days are clear and warm. Considerable canyon work has been done this winter, it is no uncommon Iona, Bingham Co., Idaho, Feb. 7 .- At the Priesthood meeting of this Stake held here January 5, 1991, Elder Steele announced the resignation of Elder Joseph S. Mulliner as second counselor in the Stake presidency, on thing to see fifteen or twenty teams in a string coming out of the eanyon in the stiernoon loaded with saw logs, mostly mahogany, red pine, birdseys or queking asp. We have an abundance of timeback being asp.

queking asp. We have an abundance of timebr both green and dry from two to six miles from the saw mills, which have been kept busy during the win-ter turning out first-class building material

ORGANIZE A WARD.

That the people of Star Valley are prosperous and progressive has again hood of Bingham Stake was a notable one, for the large number of all grades been demonstrated by the necessity of organizing a new ward midway between of the Priesthood in attendance, as compared with previous meetings. At the close of the gathering another Aften and Bellview wards, the new ward to be known as "Mount Pleas-Wednesday, Feb. 6th the Mount tion of creating a new county out of the northern portion of Bingham and a Pleasant meeting and school house was completed. It is today the best finished house in the Stake. A cordial invitation was extended to the people of the various wards to attend the opening exercises held Friday, February 8th, and as a consequence the house was filled to its utmost copacity. A very interesting and entertaining program was carried out. The Bishops of Afton and Belleview wards congratulated the people of the new ward, and gave some very timely advice. At 12 o'clock a most sumptuous and gant dinner was spread, and enjoyed by

creased expense. A vote was taken, showing a majority in favor of the movement. While this vote dees not In the afternoon a children's dance was given, followed by a grand ball in the evening. bind the people to accept the division of the countles, it will no doubt have

It is expected as soon as Stake President Geo. Osmond arrives home from Cheyenne (where he is attending the State legislature as one of our State senators) a ward organization will be effected.

The quarterly conference of the Star Valley Stake will convene at Afton Sat-urday and Sunday, Feb. 15th and 16th. We have experienced considerable sickness this winter and our schools have been closed part of the time, but at this writing the health of the people is good. Stake Superintendent of Sun-day Schools Edmund McLathle, has been confined as his hed for about three been confined to his bed for about three

veeks, but is slowly recovering. Our schools are open now, and about weeks; 150 children are attending the school at

The smallpox epidemic has not as yet reached Star valley, for which we are truly thankful.

A very substantial branch house has been erected at Afton by the Consol-idated Implement company of Salt Lake City. The people of Star Valley will appreciate this very much. Our genial friend and brother, E. W. Croft,

original yeast.

Mining for wood is a curious industry of Mengtze in Upper Tongking, A pine forest was here smallowed up by the earth at some time in the past, and the trees-some of them three feet in diameter-now lie in a slanting position beneath about 25 feet of sandy soil. Being imperishable, the wood from these timber mines is prized by the Chinese for coffins.

Gold from sea-water is still a dream of inventors. An English patent has been taken out for a process consisting in running the water into tanks and adding milk of lime to decompose the odide of gold, the metal thrown down being removed with the sludge and amalgamated or smelted.

Records of rivers extending back. ward more than 500 years have been

found in Korea.

The list of new atmospheric gasses now numbers five, the late researches of Drs. Ramsay and Travers having shown that the so-called met-argon has existence, its indications having been due to carbon accidentally intro duced in separating the oxygen. By fractional distillation of large quantities of liquid air, evough of the existing gasses has been obtained to show their characteristics and properties. All All are as inert as argon and helium. Neon is of a brilliant orange-pink color, krypton is pale violet, and xenon is sky-blue. The result of a study of the spectra will published. The inert elements soon be seem to form a regular group between the halogens, or salt-forming elements, and the alaklies, these being the atomic weights: Helium, 4; neon, 20; argon, 40; krypton, 82; xenon, 128.

Phosphorus is prepared electrolytical ly in the Dile apparatus, lately patented in Germany. This apparatus consists of a cylindrical vessel, the bottom of which is formed by a positive electrode of carbon, while the negative carbon passes through an opening in the top and is provided with a screw and hand wheel for raising or lowering. The raw material-phosphoric acid mixed with a quarter of its weight of charcoal-is introduced through a funnel-shaped opening in the top. The chief advan-tage claimed is that the production is continuous, and it is not necessary to remove residues after treating each lot of material, as in other processes.

A powerful engine cannot be run with a weak boiler, and we can't keep up the strain of an active life with a weak stomach; neither can we stop the human machine to make repairs. stomach cannot digest enough food to keep the body strong, such a preparation as Kodol Dyspepsia Cure should be used. It digests what you eat and simply can't help but do you good, F. C. Schramm.
