

## OUR OWN STATE.

The branch office of the Deseret News in Ogden is at No. 466 Twenty-fourth street, where advertisements and subscriptions will be received. The "News" is delivered by carriers in Ogden every evening on the same terms as in Salt Lake City.

## OGDEN NEWS.

OGDEN, UTAH - - - JUNE 19, 1901

## SESSION OF CITY COUNCIL.

Mayor Browning insists on Retrenchment, and Wants City Work Done in a Business Way.

By of P. Conclave Entertained and Feasted—Tax Values to be Raised—Fruit Evaporating Plant.

Council met last evening and transacted the following business:

Before taking up the regular order of business Mr. C. F. Middleton representing the Weber Canning company was given the freedom of the floor and made a proposition to the city council to the effect that if the council would furnish a ditch to carry the water from the canal down 24th street along Washington street to the northwestern corner of the city, the company would abandon their ditch from 24th northward. The matter was referred to the committee on streets with power to act and to report at the next meeting of the council.

## MAYOR INSISTS ON RETRENCHMENT.

The mayor again called the council's attention to the fact that they were spending more money than the revenues of the city warranted and informed the council that if it is the future they only want recommendations they must take the responsibility of paying the bills as he would not sign some of them unless an effort was made to do the work in a business way. The committee was ordered to report.

Mr. Brown of the committee on laws reported introducing an ordinance to revise four blocks on Washington Ave., but as the report was not read, the committee was ordered to report.

Claims and pay rolls amounting to \$2,000 were allowed.

City Recorder John V. Bluth reported that in answer to a notice that municipal licenses were due he had received the reply from the Ogden Plant, Oil and Chemical company asking that he report from crowding the collection of this license until the present suits were determined. He asked the council to instruct him whether or not to continue the collection, this suit for each particular license period during which the license remained unpaid. Referred to the committee on laws with the city attorney.

He also called attention to the fact on June 14 the chief of police had ordered all slot machines closed and that the licenses heretofore issued were being paid with him for pro rata rebate on the period as yet unexpired. He presented three licenses aggregating \$70.00 for rebate. Referred to the committee of the whole.

The Ogden General Hospital presented a claim of \$28.14 for care of inpatient patients and Studebaker Bros. \$1,014.18 for three sprinklers. Referred to the committee on claims.

The Stewart Iron Works presented a claim of \$3.35 for a drinking fountain at the cemetery which was referred to the committee on public buildings and grounds.

Messrs. Brown and Flyeare introduced an ordinance creating paving district No. 1, but as the matter had been filed with the recorder after 7:50 o'clock p. m. Mr. Jones objected. Mr. Brown sought to introduce it under the provision of rules but the motion was lost.

After a short session of the committee of the whole the council adjourned without report for two weeks.

K. of P. CONCLAVE.

The Grand Lodge of Knights of Pythias of Utah commenced a two days annual session yesterday at the hotel in this city, which is largely attended.

The morning session yesterday was occupied in hearing the reports of the officers and transacting various matters of importance to the lodge. During the afternoon the visiting officers were the guests of C. P. Jennings and H. C. Wardleigh and were given a drive up the canyon to the Hermitage where a trout and chicken dinner was served. Last evening was spent at Glenwood park, where they were treated to a German lunch and a general good time.

Visitors cannot say too much in praise of the reception they have had from the local lodge, and are delighted with the beauties of Ogden and the grandeur of Ogden canyon.

This morning the lodge was engaged in electing officers for the ensuing year.

TAX VALUES TO BE RAISED.

The Board of county commissioners as a board of equalization passed a resolution ordering the following property owners to appear before their assessors should not be increased according to the following schedule:

	Ass't. Inc.

Improvements, A. W. Agee.....	650 1,700

FRUIT EVAPORATING PLANT.

The fruit evaporating plant of P. G. Lamoreaux, at Raymond's creamery on Washington avenue, will soon be under way, as the contract for its construction has been let.

Yesterday Mr. Lamoreaux called upon the committee men in regard to the

disposition of his product and is highly pleased at the encouragement shown him. The big wholesale house of Fred J. Kiesel & Co. alone agreed to take many times the entire output of the plant. These agreements on part of the jobbers are conditioned upon the product equalling that from California, which Mr. Lamoreaux guarantees will be the case.

WEDDING BELLS.

Marriage licenses were granted to the following couples:

Parley P. Eldredge, 36, and Miss Sarah E. Benip, 39, both of Ogden City.

James J. Gibson, 21, and Miss Clara Hadley, 12, both of West Weber, Weber county.

BRIEFS AND PERSONALS.

The freight agents spent yesterday in Ogden. They were given a drive up Ogden canyon by Supt. G. H. Corse of the Union Pacific.

John Jones, the boy who ran away from his home in this city a few weeks ago has been located at Preston, Idaho, and will be brought home by the sheriff.

J. E. Malloy of Pocatello is in Ogden on business.

The annual meeting of the representatives of the Fossil Consolidated Oil company will be held Friday evening at 8 o'clock in the basement of the Reed hotel.

Mrs. E. H. Hall of Park City is spending a few days in Ogden visiting with friends.

J. A. Donaldson and wife of Chicago are spending a few days in Ogden.

Miss Edith Haigh of this city, of Barnaby, Minn., are the guests of Miss Edith Haigh of this city.

CIGAR STORE BURGLARIZED.

The Wells cigar store in the Tanner block was broken into by unknown burglars last night and \$75 worth of goods stolen. The store is on Twenty-fourth street and Lincoln avenue. No trace of the robbers has been discovered as yet.

SACRED HEART EXERCISES.

The graduating exercises of the Sacred Heart academy were held this morning. A very large crowd was in attendance and the program published in Monday evening's "News" was carried out. Every number was applauded. The color scheme was white. The young lady graduates were also dressed in white.

Eczema, salt rheum, tetter, chafing, itchy poisoning and all skin troubles are quickly cured by the famous Witch Hazel. The certain cure. F. C. Schramm, Prescription Druggist, McCormick Bldg., Cor. Main and First South St.

LEHI.

FOURTH JULY PROGRAM.

Grand Celebration with Parade is Being Arranged for.

Special Correspondence.

Lehi, Utah, June 18.—The 4th of July celebration in Lehi, Utah, is being arranged to have the greatest and grandest celebration ever held in the history of Lehi and while the citizens of Lehi think they have the most attractive and attractive parade in the state, no means will be spared in making it suitable for the occasion. The parade also will be a notable feature as expense will not be considered in making the parade the greatest ever witnessed in our city. The general committee has appointed a number of sub-committees to arrange all the details of the grand occasion.

The program for the morning exercises are as follows: Parade from 8 to 10 o'clock a. m. Thomas Austin, marshal of the day. Meeting 10 a. m. at the church. Exercises at 10 a. m. at the church. Exercises at 10 a. m. at the church. Exercises at 10 a. m. at the church.

The main attraction of the afternoon will be a match game of ball between two crack teams on the city ball grounds; the silver ball will occur in place on the grand stand and render selections during the game.

A surgical operation is not necessary to cure piles. DeWitt's Little Early Balm saves all that expense and never fails. Beware of counterfeits. F. C. Schramm, Prescription Druggist, McCormick Bldg., Cor. Main and First South St.

NEPHI.

Big Damage Suit Against Gemini Mining Company.

Special Correspondence.

Nephi, June 18.—In the district court the case of Timothy Downey against the Gemini Mining company has been on for trial all day before Judge Marionaux and a jury and will likely last over tomorrow. Downey alleges that the Gemini company, by falling down a chute which was made at the foot of a ladder in the defendant's mine last July, and that the boards covering the top of the chute were taken up while he was at work above, and that he was not notified of their being taken up and knew nothing of the hole that was left there where for months before it had been covered. He asks damages for \$15,000.

WILL CELEBRATE THE FOURTH.

A mass meeting of the citizens of this place was held in the court house last evening for the purpose of arranging for a suitable observance of our national holiday. Various committees were appointed and it is their intention to give a fine time on that day.

The infant son of Deputy Sheriff P. F. Christensen died last night.

BOARD OF EDUCATION.

The board of education finished their final meeting today. Most of the business transacted was in the nature of abatements to indigent and poor people, including off mortgages.

## IMAGINATION AND ITS USE

Lecture by Prof. Dewey Before B. Y. A. Summer School, Educational Value of Imagination.

District Court Orders—Weddings—M. I. A. Excursion to Saltair from Utah, Alpine, Nebo and Juab Stakes.

Special Correspondence.

Provo, Utah, June 18.—The afternoon lecture delivered by Prof. Dewey yesterday, was on the topic of "The Imagination and Its Use in Construction."

"The subject will be made clearer and more definite by calling it the power of producing images because there is an idea that imagination has to do with the unreal and fantastic. The imagination in the sense in which the doctor uses it is the ability to realize that which is not present, rather than to produce that which is not a reality, and in this sense the imagination is the faculty of the pupil's mind with which the teacher has to deal in making the pupil understand that which is not present, and this is necessary in history, geography and even arithmetic. Producing images is generally considered an operation of the eye, but there is also in psychology much of the imagination of the touch. People who have this faculty of producing images often think it so common that they consider it strange that any one should speak of it and those who do not have it are inclined to doubt that others have it.

In geometry many good visualists will do good work without drawing the figures, they simply imagine the figures and solve the problem. Mr. Frank Hall, superintendent of a blind asylum, has written a very interesting article on "Imagination in Arithmetic," and takes the position that much of the difficulty experienced in arithmetic is on account of the lack of ability to imagine, although arithmetic is generally considered a study void of any imagination or connection with illustrations were given of the inability of solving arithmetical problems when there is no image of the problem in the mind.

A child who has received an image of a cube in his mind from examining it does not after that need a cube in order to count its sides so as to know how many plus it is. A child who has been properly trained uses his mental construction and sees the image of what he has to solve or describe before he commences the work.

This imagery is still more important in the study of geography, which is almost altogether dependent upon the visual imagination, a mental feature being projected in the mind of landscape, rivers and mountains. A child must, however, have seen the thing which he is studying, or something near enough like it to become a mental image of it in his mind. The teacher should begin with sense perception and work as rapidly as possible towards imagery.

History must remain to a large extent incomplete unless the child has a picture in his mind of the personages and events of history. So in literature, if time is taken to picture one or two scenes in a poem and have the children form a picture of the scene they will enjoy and see the beauty of the poem better than by having much attention to the construction of the language.

Reasoning is generally thought to have no connection with imagery, the logical definition is to take two truths and from them produce a third. That is a logical definition and tells what happens when we reason; but the psychological fact is that we take two truths of cases, we take two images and produce a third from them, and if the two pictures are firmly fixed there is very little difficulty in getting the third picture true.

The imagination should be controlled and it is a mistake to suppose that it takes more imagination to mentally realize the absent unreal, such as a fair tale, than it does to realize the real, such as the characters of biography and history. Children generally have sufficient imagination if it is rightly directed.

BEFORE THE LECTURE, Boahard and Pryne Bros' quartet favored the audience with one of their best selections, which was so highly appreciated that an encore was given.

The lecture of the evening was on the "periods of development." Shakespeare was probably the first to classify the periods of life, which were both scientific and political.

First the period of infancy, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Second the period of childhood, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Third the period of adolescence, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Fourth the period of maturity, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Fifth the period of old age, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Sixth the period of decline, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Seventh the period of death, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Eighth the period of resurrection, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Ninth the period of eternal life, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Tenth the period of glory, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Eleventh the period of triumph, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Twelfth the period of victory, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Thirteenth the period of conquest, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Fourteenth the period of dominion, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Fifteenth the period of empire, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Sixteenth the period of kingdom, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Seventeenth the period of reign, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Eighteenth the period of rule, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Nineteenth the period of sway, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Twentieth the period of power, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Twenty-first the period of might, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Twenty-second the period of strength, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Twenty-third the period of vigor, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Twenty-fourth the period of energy, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Twenty-fifth the period of force, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Twenty-sixth the period of power, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Twenty-seventh the period of might, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Twenty-eighth the period of strength, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Twenty-ninth the period of vigor, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Thirtieth the period of energy, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Thirty-first the period of force, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Thirty-second the period of power, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Thirty-third the period of might, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Thirty-fourth the period of strength, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

Thirty-fifth the period of vigor, the first two and a half years; while this does not crack the first to classify the periods of life, which were both scientific and political.

## MUNYON'S COLD CURE

Nearly everybody seems to be taking Prof. Munyon's Cold Cure whenever a cold appears. It relieves the head, nose, throat and lungs so quickly that a cold need no longer be a tormenter of grippe, influenza or pneumonia. A trial of the Cold Cure is like a life insurance policy. Every one of his remedies is as sure as M. J. C. and is sold in all health stores. Munyon's Inhaler Cures Croup.

on an excursion to Saltair with the veterans of the Nauvoo Legion.

GARDEN CITY NOTES.

Hon. E. H. Callister made a brief visit to Provo yesterday.

The annual meeting of the Utah County Medical Society will be held on the 26th in the K. of P. hall. Officers will be elected for the ensuing year, and a banquet will be discussed by the members of the association.

J. C. C. Glandfield was down from Salt Lake yesterday on business.

Prof. L. E. Eggersten and family have moved over from Springville to remain during vacation.

A ball will be given in room D at the academy Friday evening for the students of the summer school.

Did Not Marry for Money.

The Boston man, who lately married a sickly rich young woman, is happy now for he got Dr. King's New Life Pills, which restored her to perfect health. Infidelity for Jaundice, Biliousness, Malaria, Fever and Ague and all Liver and Stomach troubles. Gentle but effective. Only 25c at Z. C. M. I. Drug Dept.

"The Doctors told me my cough was incurable. One Minute Cough Cure made me a well man." Norris Silver, North Starford, N. H.—Because I could not find relief from a stubborn cough, I did not despair. One Minute Cough Cure has cured thousands and it will cure you. Safe and sure. F. C. Schramm, Prescription Druggist, McCormick Bldg., Cor. Main and First South St.

LOGAN.

SEIT FOR DIVORCE.

Independence Day—B. Y. C. Alumni—Unlawful Fishing.

Special Correspondence.

Logan, Cache Co., June 18.—Mrs. Edith Bench today filed suit in Judge Hart's court for divorce from her husband, William Bench. She alleges failure to provide as the ground for action.

Mayor Anderson has called a mass meeting of citizens at the court house for the purpose of arranging a celebration of the Fourth of July in this city.

Justice Thos. N. Smith today issued a warrant for the arrest of E. D. Miles or Paradise, who is charged with unlawfully taking fish by means of a trap.

B. Y. C. ALUMNI.

At the recent meeting of the Brigham Young College alumni, the following officers were elected for the ensuing year: President, F. K. Nebeker; vice president, Miss Della Torgerson; secretary, David R. Roberts; treasurer, Miss Kate Lufkin; and member athletic board, G. L. Swenson.

Saves Two From Death.

"Our little daughter had an almost fatal attack of whooping cough and bronchitis," writes Mrs. W. K. Haviland, of Armonk, N. Y., "but when all other remedies failed, we saved her life with Dr. King's New Life Pills. Our little daughter had consumption in an advanced stage also used this wonderful medicine and today she is perfectly well." Desperate throat and lung diseases yield to Dr. King's New Life Pills. Infallible for Coughs and Colds. 50c and \$1.00 bottles guaranteed by Z. C. M. I. Drug Dept. Trial bottles free.

The bilious, tired, nervous man cannot successfully compete with his healthy rival. DeWitt's Little Early Balm, the famous pills for constipation, will remove the cause of your troubles. F. C. Schramm, Prescription Druggist, McCormick Bldg., Cor. Main and First South St.

COALVILLE.

WARD ORGANIZATION.

Completed on Sunday—Wedding Bells—Weather has Moderated.

Special Correspondence.

Morgan City, Morgan Co., June 18.—There has developed in the family of Ed. Preese of the North Morgan ward, outside the city limits, six cases of smallpox, brought about by the hardness of a young man in the family calling at the home of the McFerris to get a shave just as his wife was in the height of the fever the night before the doctor had pronounced the smallpox, but McFerris warned him and he said he was not afraid of it. Other cases are getting along well.

STAKE CONFERENCE.

Stake Conference was held Sunday and Monday. Apostle Lund was present and the most enjoyable time was had, and the spirit of the Lord was manifested in all the meetings. The singing was exceptionally good. Peterson choir furnished the music for Sunday morning afternoon. "I know that my Redeemer lives" was sung by the male quartet; Jos. Anderson, solo. Miss Sarah Fowler of Ogden in the afternoon sang "Calvary." South
