

MINING, BUSINESS AND STOCKS

OHIO COMPANY AT POCHE, NEV.

Several Car Loads of Equipment Forwarded to Southern Mining Camp.

TO SUSAN DUSTIN CLAIM.

Where New Shaft Will Be Sunk—Preparing to Do Big Things.

The Ohio & Kentucky Mining company, which owns a big slice of the best part of the mineralized zone of Poche, has begun operations.

Several days ago several carloads of machinery have been shipped from Salt Lake and the order included a large hoisting plant, which is to be set up on what is known as the Susan Duster lode mining claim.

The Ohio & Kentucky company is the possessor of nearly all of the original Godde mining interests in Poche, and has been ready to begin a vigorous and extensive campaign of development for some time.

Several carloads of timber have been forwarded to the front to be used in replacing some of the old workings which have been rendered unsafe during the year in which the properties have been inactive.

While very little has been heard of the Ohio & Kentucky company, it is one of the strongest concerns that has entered the famous southern Nevada camp.

The American Flag Mine is Making a Splendid Record.

The American flag is going steadily forward, says the Record of Park City, and though little is being published regarding the property, it is making a splendid record, and sufficient quantities of high grade ore is being taken out which more than pays expenses, and a surplus is being piled up in the treasury for future development or more likely future dividends.

VIRGIN FIELD FOR PROSPECTOR

Mountains Around Malad, Idaho, Said To Contain Good Mineral Indications.

LITTLE WORK HAS BEEN DONE.

Thunder Mountain Miners Investigate Country and Locate Claims.

The advocate, a Malad, Idaho, publication, contains the information that quite a little prospecting has been in progress in the vicinity of that prosperous town lately.

"Patrick Devine, a miner from the Thunder Mountain district in Idaho, who has been in this valley for the past two months, called at this office Monday and gave us some news concerning the development of a prospect in the mountains northeast of town, which shows up so well that a company has been formed and money advanced to carry on development work."

"Atty. McDougall is one of the directors and other parties interested are from Salt Lake and Poetello, including also Mr. Devine and his partner. They have located a group of claims in the mountains between here and Marsh valley, the rock carrying good values in gold and silver. They are going to take out about 20 tons of ore and ship it so as to determine the real value and learn how much of a haul would be necessary to guarantee profits."

"Mr. Devine says that surface indications are very good, and as there has not been much prospecting in these mountains, an inviting field is offered to the practical miner and prospector."

"We hope that the efforts of these gentlemen will result in the discovery of something that will repay them big."

NEW DIVIDEND PAYER.

Bingham and New Haven Company Gets Into Line.

The news has reached Salt Lake that the directors of the Bingham & New Haven Mining company have posted the interim dividend of 10 cents a share on the issued stock, which amounts to \$2,600,000, the total capitalization of the company being 400,000 shares.

This is believed to be the first regular quarterly distribution for this Bingham mine.

COPPER AT GOLD BUTTE.

Harry Shipley Receives Good News From Southern Nevada Camp.

Harry Shipley, the photographer, is in receipt of a letter from Gold Butte, Nevada, which contains some very gratifying news about recent developments in a group of copper claims in which he is interested and which were located early last spring by his uncle, J. E. Shipley, an expert Colorado miner.

The property is situated about eight miles south of the town of Gold Butte and consists of eight full lode mining claims on which is shown some well defined ledges. Samples taken from several openings and sent to this city for assay gave returns of 11.6 per cent copper, \$1.65 in gold and 2.7 ounces in silver.

As the development of the Gold Butte district continues the fact becomes more evident that the region west of Boise is a certain prospecting ground, representing eastern capitalists, has been in Boise three weeks, and has spent considerable time looking over different mining sections that could be made tributary to this city. He has been making his investigations quietly and is not talking for publication.

From a friend of the engineer the Capital News learns that the investigations made have been more than satisfactory.

It may be stated positively that if the Salt Lake, Idaho and Montana railroad becomes a certainty through Boise, a smelter of large size will be erected here, and that work will begin upon the plant in time to have it completed as soon as the road could be in operation. The smelter would mean the expenditure of a large sum of money here and would make a permanent payroll of nearly 400 men, all receiving good wages.

The financial people are waiting to see if Boise is going to meet the requirements of the railroad company, and will thereby secure an outlet to build through here on the road to Butte. The matter of closing with the railroad is becoming of more importance every day. The city would not only get a large smelter, but a number of other valuable industries would locate here if it was certain that the railroad would pass through this city.

It is to be hoped the Boise Commercial club, or those having large property interests, will wake up to the importance of immediate action.

BOND ON DAGMAR.

Walter Fitch Said to Have Acquired Title Property.

Since the visit of Walter Fitch to the Dagmar-Northwest property last week work has been resumed under the direction of W. H. Moeller, says the Eureka Reporter. It is understood that Mr. Fitch and associates have secured a bond upon the Dagmar property and also upon some adjoining claims owned by Mr. Moeller. They intend to spend some money in developing the ground upon which a great deal of work has already been performed. The showing in the Dagmar workings when work was suspended some time ago was highly encouraging but the owners who are principally local people could not afford to continue the work at that time. The ground is located about a mile northwest of the Bullion Beck mine.

THE GARFIELD SMELTER.

The new Garfield smelter is getting under a good head of steam and preparatory furnaces, at least a portion of them, were taken into commission on Saturday last; also the MacDougal roasters.

CONCENTRATES.

George Gunn returned from Ely, Nevada, on Saturday.

The Shenandoah properties at Good Springs, Nevada, have reported in the local market with ore.

The total ore and bullion settlements reported at the close of last week amounted to \$219,800.

John Brooks, the veteran mill man, has returned from northern Idaho, where he has been engaged recently. He expects to remain here for some time.

It is reported that negotiations looking towards the purchase of the Majestic smelter at Millford, have been suggested by Good Springs, Nevada, operators.

Charles H. Doolittle, general manager of the Utah & Eastern Copper company, departed for the properties of that corporation in Washington county on Saturday night.

Col. O. P. Posey was in the city over yesterday. He now makes Goldfield his headquarters and states that Col. Heffron is located there in charge of some work in the interest of the Posey syndicate.

Articles of incorporation of the Blue Point Copper Mining & Milling company were filed in the office of the county clerk last Saturday. The company is organized for the purpose of developing the Blue Point mining claims, situated in the Bradshaw mining district in Beaver county, and has a capital stock of \$100,000, divided into shares of the par value of 10 cents a share.

The officers are E. J. Raddatz, president; John Frazer, vice president; F. M. Davis, secretary and treasurer; Fred Hodges, William Hanson, W. R. Warren, R. C. Hill and the officers composed the board of directors.

LOCAL MARKETS.

Today's markets are well supplied with edibles of various kinds, with increased shipments from California of sweet potatoes, the price of which will be lower next week. The day's receipts include a car of fine lemons, a car of bananas—much needed, and quantities of grapes of various varieties from Fresno, Stockton and Atwater.

Utah is sending in increasing supplies of vegetables, though California is sending in lots of lettuce and lima beans. There are a few slight changes in the wholesale prices of meats, and tomatoes are cheapening. There has been a great demand for lemons of late on account of the heat. The prices obtaining today are as follows:

ST. WAHRE STILL EXCITED

The Visitor's Gallery Was Packed To Its Utmost Capacity With Sightseers.

PACIFIC AGAIN THE FEATURE.

Trading Was Largely Professional—First Hour's Sale of Shares Made New Record.

New York, Aug. 20.—Further excitement attended the opening of the stock market today. There was an unusually large attendance of members. The visitors' gallery of the stock exchange was packed to its utmost capacity with sightseers. There was an accumulation of over Sunday buying orders and a principal of the early trading was in the Harriman stocks which led last week's movement. Union Pacific opened with a block of 14,000 shares at 184, to 184 1/2, later selling at 188. Southern Pacific started off with a block of 10,000 shares at an advance of 14 points over Saturday and being a new high record. Amalgamated Copper opened with a lot of 1,000 shares at an advance of 2 1/2. Other stocks that made substantial gains were Great Northern preferred with 6 points, Northern Pacific 3/4, American Smelting 3/4, Anaconda 3/4, Atchison 3/4, reading 1/2, Illinois Central 1/4. The buying orders were reported to have come from various out of town points, notably Boston, Philadelphia, Chicago, Cleveland, St. Louis, London also was a reported purchaser. Sales in the first hour were probably in excess of 60,000 shares.

The trading was almost entirely professional and most of it was covering by the shorts. Profit taking resulted in a number of recessions before the end of the first hour.

The sales of shares in the first hour totaled 84,500 shares, which was said to be a new high record.

Questions were on a large scale at the opening but the price movement in the closing days of last week Union Pacific brought from 184 to 184 1/2, 14,000 shares against 184 on Saturday and Southern Pacific sold at 184 to 182 1/2 compared with 184. The gains in many other stocks were much less substantial but there were a number of favorites which improved only a small fraction. Great Northern preferred gained 6 points, Anaconda and Smelting 3/4, Atchison 3/4, and Sloss-Sheffield Steel 3/4, and Illinois Central 1/4. Amalgamated Copper sold at 184 1/2 to 184 1/4 on Saturday and 184 1/2 on Sunday with 109 1/2 last week.

Enormous amounts of stocks were presented for sale on the morning of the 20th and there was a general reaction which ran from 1 to 2 points in the strongest features. Both Southern Pacific reacted to fractions under Saturday's closing as did Paul, Vermont and some others. Speculation was very feverish, many stocks making a spasmodic rally of a point or more before the end of the day. Union Pacific made an upward rush again to 188, but Southern Pacific was steadily held and hovered around the low point. Northern Pacific made a better start at 184 1/2. At 11 o'clock the market was unsettled but rallying generally above the low prices.

Despite the enormous volume of outside buying orders attracted by the rampant bull speculation prices were gradually forced downward under realizing by the professional manipulators. A heavy small fraction remained of the earlier substantial gains. St. Paul sold at 174 and Union Pacific 3/4 below Saturday's closing. There was a considerable shifting of bull operations later from the Harriman and others into Missouri Pacific and Reading and Atchison. The enormous buying of these stocks had a steady effect on the rest of the list. Missouri Pacific ran up 3/4, Atchison 3/4, and Reading 3/4. Lackawanna sold at a decline of 1/2 from Friday's closing.

The volume of business continued on an enormous scale and there were indications of a number of long dormant buyers. The room traders of the floor and a steady flow of orders were allowed to fall back, while Rock Island, Smelting and St. Paul were taken hold of and pushed steadily upward. The Harriman stocks were again steady at 184 for Southern Pacific and 184 for Union Pacific. Pennsylvania was driven down 1/4. The rise in Rock Island reached 24 1/2, the highest since St. Paul's. St. Louis and San Francisco second preferred 4 and Smelting 1/2. Bonds were neglected at noon.

LONDON STOCKS.

London, Aug. 20.—On the stock exchange today interest again centered in American issues which opened excited. There were indications of a general recovery and a considerable advance over Friday's official closing prices. Union Pacific leading with an advance of 1/4. Southern Pacific advanced 1/2. The Harriman stocks were steady at 184. The market continued in an excited condition.
