EVENING NEWS. PAPIER-MACHE. THE WELSHMAN WHO EX-JETS OF GINGER. PLORED THE DARK HOW THE SUBSTANCE IS MADE AND The man who is airaid to express his CONTINENT. Etc. THE USES TO WHICH IT IS April 9, 1887. laturday, . APPLIED In the Chalaquan is an article treat 8 ing at some length on the achievement "A dollar you can't teil me what that match-box is made of," said Dick, handing the object mentioned to his of Africa's most recent explorer, Henry M. Stanley, from which we glean the following. After referring to his search for Livington, it adds: But Stanley has done greater deeds TO NAVIGATE THE AIR. W00D, ry M. Stanley, from which we glean the handing the object mentioned to his friend, Harry Dolt. "Don't bet, in the first place," re-plied Harry, "and don't care in the second. 'Spose all a man wants to know is if it'll hold matches and isn't ico his for his nocket." H 角 С SHIP BUILDING FOR THAT PURPOSE. The Aerial Steam Navigation Com-pany of San Francisco is a corporation organized in accordance with the stat-utes of California, and its object is to the dreams of the "Never saw such a fellow as you in "Never saw such a fellow as you in But Stanley has done greater deeds than this. The great lakes had been visited, Livingston had crossed South Africa, discovered Lake Bangweolo BURTON racit F utes of California, and its object is to startie the world, if the dreams of the projectors are ever to be realized. It is no less than the construction and operation of an airship. The hour of trial is said to be near at hand. The great "vessel of the air" is approach-ing completion and a trial trip will be made within a few months. The ever-lasting fortune of the company will then be made or it will uterly collapse. and the grandest falls in the world-Victoria-and had explored the eastern Р IRON, shore of Lake Tanganyika; but the sources of the Congo, most of the country through which it runs, and its 08 H wonderful tributaries were unknown West, Stanley, beginning where Livings-tone left off, has done more for geographical science, civilization, and Ø your supposed announcement in that match-box?" then be made or it will utterly collapse. The moving spirit in the enterprise is "Prof." William Patterson, who is not unknown to fame on the coast. The ALL ALL sommerce than any other African ex-PIG "Did you ever see a piece of polished ebony as light as that?" OB 0 Sch plorer. Steamers now ply on the waters of "Polished pancake! It's nothing but company had its inception in July of the Upper Congo and its tributaries, "The hours for the matutinal repast TOUR Ż paper-mache. Any child can tell which afford an aggregate of seven are from 7 to 9," replied the waiter. last year, Mr. Patterson being sponsor R 7 **P**₄ He was modest, and fixed the capital stock at only \$100,000, in 50,000 shares at \$2 each. Upon these articles of in-corporation the following officers were that.' housand miles of navigable streams "Perhaps so. But, admitting the A railroad is already planned round the rapids of the Lower Congo to Stanley COKE, H fact, there is a child of about six-and-twenty solid winters in front of me A ath. Pool, and missionaries are advancing, with purpose of peaceful conquest, in-SEN who can't tell how paper-mache is ∢ chosen: President, J. G. Severance; Secretary, Charles E. Travers; Treasto the very heart of the "Dark Contin-ent." Even European women are travmade." an 8 "I'm very much given to minding my urer, Howard Livingston; Manager, William Patterson; Engineer, J. A. Hante; Directors, J. G. Severance, S. X own business, and, the making of paeling the route which, before Stanley per-mache is no part of it. But I think ~ accomplished it, the world hardly exit is an open question whether you could accurately describe the process yourself. By the way, why does it in-terest you?" . Tilton, Howard Livingston, C. M. pected white men would ever success fully undertake. Seely, M. D., and William Patterson. CHARCOAL, The practical gronaut of the concern is Mr. Patterson. The airship in course Stanley has made it possible to es tablish legitimate commerce with the populous and productive interior, and in the near future to reach the seat of the abominable slave traffic, and break bie teaches that it is not often safe to "I have the prosperity of Pittsburg at heart. Some people seem to think of construction is designed by him and D RSSAN approved by the engineer, in the latter case no regard being had to the old saw, "the more Haste the less speed." that all we can or ought to do here is to it up, to civilize the people, and to give gopher a rattlesnake. it up, to civilize the people, and to give them the Gospel. Stanley is the foun-der of the great Congo Free State, to the development of which the King of Belgium is devoting much of his thought and his royal fortune, and for thought and his royal fortune, and for make iron, steel and glass. Now, with our splendid advantages in point of Mr. Patterson is exceedingly enthusifuel, I think Pittsburg would be a firstsstic and confident. He has the theory rate place for the manufacture of pa-per car-wheels." "That's quite another matter. Now, of aerial navigation down pat, and is confident that he will solve the intersting problem. The grave obstacles I'm prepared to lisien. But you know that others have encountered count not efit of the whole world, the power and with him. He has an apparently abid-"Well, cotton forms the basis of the influence of the great nations of Europe ng faith in his ultimate success. The paper used. The sheets are pasted tofaith of Darlus Green in his flying ma-chine was not greater. In conversaare pledged. Stanley's sudden recall from this country by the King of Belgium, will ether with dextrine until the mass is tion with a reporter yesterday, he said: "Oh, yes, there have been obstacles to overcome. Capitalists have been slow to take hold, but, mark my words"-pointing his index finger straight at the scribe's south eye and relation his wice to a concert nitchhick enough to go under the hydraulic press. There they are squeezed in to any desered form, which, when dry, prevent thousands of his countrymen PAPER! PAPER from looking upon the African explorer and civilizer. His early life gave little is as hard as, and a good deal lighter, bulk for bulk, tkan any wood." promise of a great career. He was christened John Rowlands, and re-mained John Rowlands until he was nearly grown up; when he gave it up for that of the New Orleans merchant "Brief enough; go on!" "This product is poreless, fiberiess, sapless and knotless. It is subjected raising his voice to a concert pilch---"mark my words; we'll get there just the same." for twenty-four hours to a high drying heat. Then it can be worked with any who adopted him, but who, dying soon kind of tool. The varnishing of it is a mere detail." "It is from this substance that are THE SUIP DESCRIBED. after, left him nothing but the name. Having thus forever settled that par-ticular point, the professor took a drawing of the proposed airship from his inner coat pocket, and proceeded with a minute description of the same. Stanley was born in Denbeigh, Wales, in the year 1840. His parents dying when he was three years of age, he was manufactured all those bracelets of large black beads studded with Scotch DESERET NEWS COMPANY, sent to St. Asaph's poorhouse he remained ten years and got sufficient education to enable him to teach one imitation diamonds, all those necklaces, with a minute description of the same. The drawing shows the vessel to be cigar-shaped, the upper portion being the balloon proper, the lower half the deck upon which the freight and pas-sengers are to be carried. "You will observe," continued the atrial navigator, "that the deck of the bottom itself, the two forming one critindrical whole. In this my ship differs from any which has ever been constructed. The propulsive force, being placed at the point where the balloon and car are joined, I am able to obtain a much better control us the balloon and car are joined, I am able to obtain a much better control us the balloon and car are joined, I am able to obtain a much better control us the balloon and car are joined, I am able to obtain a much better control us the balloon and car are joined, I am able to obtain a much better control us the balloon and car are joined, I am able to obtain a much better control us the balloon and car are joined, I am able to obtain a much better control us the balloon and car are joined, I am able to obtain a much better control us the balloon and car are joined, I am able to obtain a much better control us the balloon and car are joined, I am able to obtain a much better control us the balloon and car are joined, I am able to obtain a much better control us the balloon and car are joined, I am able to obtain a much better control us the balloon and the propulsive force-placed in year before he started as eabin boy for New Orleans. As "Stanley" he served in the Confederate army, was taken prisoner, entered the United States uavy, and became ensign. In 1886, after a trip as newspaper cor-Manufacturers and Dealers in respondent in Turkey and Asia Minor, be revisited Wales and gave a dinner NEWS PRINT, BOOK, to the children of St. Asaph's, and told them what St. Asaph's .had done are known as Japanese work, are mere-ly papier-mache. The Japanese know but one kind of gilding, while we have two-the dead and the brillint. We have, likewise, a liquid nacre taken from the scales of the whitebalt that well imitates the white currant and Stanley appears in his picture with white hair, which must be very becom-ing to his ruddy face. The characteristic which most im-presses you before he begins to talk, is degged determination. You see it in the lines of his firm set chin, in the WARDS. MANILLA AND STRAW Brighton,..... Labelle,.... have had the propulsive force-placed in a car suspended at a distance below the balloon. In such cases a head wind could not be prevented from driving the balloon backward while the aero-certain transparent berries. The nafull, bull-dog-like cheeks, in the carecould not be prevented from driving the balloon backward while the aero-naut endeavored to propel it ahead. "There are other essential differ-greaces between my ship and all oth-ers," said the balloonist. "For exam-ple, I do not propose to be encumbered with sandbags or any other kind of ballast. In lieu thereoi I intend car rying machinery which will enable me to create the force necessary both to propel and to raise and lower the abin " PAPERS! propel and to raise and lower the ship." ser Parties desiring any of the above, are in ther fellows do that."-Pillsburg ills hair became wh Chronicle. awful strain of bis three THE MACHINERY. vited to call and examine our Stock and Prices ence in traveling fit to the Congo.
