

CORRESPONDENCE.

Funeral of Elder J. E. Hyde.

LOGAN, July 17th, 1878.

Editors Deseret News:

The remains of Elder Joseph E. Hyde, reached here to-day about 2 p.m. His funeral services were held in the basement story of the Tabernacle at half-past 3; quite a large congregation assembled to pay the last tribute of respect to the deceased.

In consequence of the advanced stage of decomposition of the body, it was deemed wisdom not to open the coffin for the inspection of the remains, nor was it taken into the congregation, but was stationed immediately outside until the services were ended, whence it was taken to the cemetery, followed by a large number of vehicles filled with sorrowing relatives and friends.

The peculiar circumstances connected with the demise of the deceased, gave a heartfelt interest to the occasion, the deceased having but recently left on a mission to England. Although in poor health, he felt, as some of his friends did, that a change of atmosphere would prove beneficial to him, which has proved not to be the case, and the fact of his having died upon mid-ocean, produced a solemn feeling, seldom experienced. He left his family and home as an ambassador of life and salvation to a fallen world, sent by the highest authority on earth, and while in the discharge of his duties, with his armor on, death claimed him as a victim.

Presidents Thatcher and Preston discoursed appropriately, whose remarks were terse, and seasoned with the spirit of God, and which pered peace and comfort to the bereaved.

Elder Hyde was 36 years, 3 months and 27 days old, was highly respected in this community, being a man always ready to work for the interest of the kingdom of God. He leaves a wife and five children.

Respectfully,
JAMES A. LEISHMAN.

Heat—Water Flume—Mining—Tem.

ST. GEORGE, July 13, 1878.

Editors Deseret News:

We are now passing through the "heated term." Thermometer 105° in the shade and still rising, and will probably reach about 118°, if we do not soon get rain. No doubt you have enjoyed a "Turkish bath," and had to pay for it. You can get one here any time this month on the south side of a wall free of charge. But you know too much of a good thing is sometimes worse than not enough, and some of our citizens think this as they are leaving us for a cooler climate, and, like the ducks and geese, will return south to winter.

The eastern water flume is completed, and proves to be a success. It is 650 feet long and about 11 feet on the average above *terra firma*. The cost of this work will exceed \$3,000. But the benefits derived therefrom will be invaluable to the health and happiness of the people.

The Grand Gulch Mines have come to another collapse, though it is supposed to be only a temporary cessation of work. Mining copper seems to be uphill business in this locality, we are so far from railroads or navigation.

The work on the Temple still continues, though the attendance is much less during this hot weather. The men and women who labor there seem to rejoice in their labors, and those who come from a distance should remember that "the laborer is worthy of his hire," and that all must eat to sustain life.

There has been and is considerable sickness here, though few deaths have occurred. I hear of the death of an aged lady this morning, Judge Thomas' wife.

THE DAUSMAN & DRUMMOND TOBACCO COMPANY'S

This 16 ounce army pound is marked into 16 equal spaces (1 1/2 x 1 1/2), each space representing an ounce. It being justly divided, the consumer is satisfied with his allotment, and the retailer knows that he has given neither too much nor too little; as he is liable to do where the lump is not so marked. This lump also renders it unnecessary for the retailer to have more than one package of Tobacco open at a time, as he can accurately cut any size lump needed from a 12 ounce lump down to a single thick pocket piece. It is the only plug of Tobacco marked for the benefit of the dealer and consumer. All others marked with tin wood, leather, or other tags, or in any other manner are solely for the benefit of the manufacturer.

It saves interest, as a single package gives the dealer the sizes he requires, it is not necessary to keep six or eight open at a time as is usually the case.

The manufacturer is able to make a better chew in a pound lump than in a smaller one for the same money. No loss can accrue from change of styles or variation in prices. Most dealers know by bitter experience how great an advantage this is. It is manufactured with the utmost care and each plug is perfect in chew and style.

For sale by all Wholesale Dealers.
