SLEPT IN A SNOW STORM.

"I Passed One of the Most Pleasant Nights of My Life" - Heaches Raymond Today.

Yosemite, Cal., May 17.-President Roosevelt, John Muir and Rangers. Leidig and Leonard are encamped in the Bridal Veil meadows tonight near the banks of the Merced in a grove of pines and firs; almost within the spray of the beautiful Bridal Veil falls. The chief executive is resting after one of the most memorable days of his life.

At 3 o'clock this afternoon the party arrived from the Vernal falls at the Happy Isles. Although the party had been hovering above the Yosemite since early morning, first at the heights of Glacier Point, then above the great panorama wall near the Vernal falls and later at the Nevada and Vernal falls, yet this was their first entrance to the floor of the valley. There were but few there to meet him because his point of entrance was not known to any one, not even to the members of his party. He spoke kindly to those there and then came down the valley vis Camp Curry and to the Sentinel hotel Shortly before 4 o'clock the party was seen approaching the Sentinel hotel. A few moments later they had arrived at the hotel and were greeted by President Wheeler and others.

The president alighted and for a few minutes he spoke pleasantly to a few members of his party.
'We were in a snowstorm last night

and it was just what I wanted," said he, smiling. The president was dressed he, smiling. The president was dressed in a khaki suit, army hat and around his neck was a dusty looking handker-chief much the worse for wear.

In a few minutes he mounted his horse and with John Muir and Presi dent Wheeler proceeded to the Jorgen-sen studio 200 feet up the river, where the party was joined by Mr. Jorgensen. This building has the honor of being the only one he was in while here. They remained here over a half hour and here the president expressed himself fully about the Yosemite and the Si

A lunch was awaiting him and, though his appetite was keen, he refused to eat, having in mind the camp meal at the Bridal Veil meadows. However, he joined the party in a glass of who.

"This is the one day of my life," said he, "and one that I will always remem-ber with pleasure. Just think of where I was last night. Up there," pointing toward Glacier Point, "amid the pines and silver firs, in the Sierran solitude, in a snowstorm, too, and without a tent, I passed one of the most pleasant nights of my life. It was so reviving to be so close to nature in this magnificent forest of yours."

His host conducted the party through the rooms of this studio, the president remarking. "Had I not wanted the complete rest that I have had, it would nave been one of the greatest pleasures of my life to have spent the time in this building.'

When shown the dining hall with its beautiful Dutch finish and furniture, his eyes fairly glistened and he said: "You know I am Dutch myself."

When Mr. Roosevelt came out of the studio, accompanied by the others of the party, he walked back to the bridge and then held an informal reception lasting ten minutes or more. A boo descriptive of the valley and key of the valley, made out of manzantia, were presented to Mr. Roosevelt. "Here is a good Republican," said a Democrat pre-senting his wife. The president smiled and warmly greeted both. A little baby was brought to him in its father's arms. He shook its tiny hand and with a merry twinkle said, "I have a half doz-A former member of the Seventh in-

fantry, Mr. McPherson, that was so close to his rough riders in Cuba, was warmly greeted and for a moment the beauties of Yosemite were lost sight of and the stormy days of the charge up the incline of Santiago were recalled and discussed

The president appeared perfectly at home and the people felt that they were greeting an old friend. Cameras and

kodaks were snapping on all sides.

As he crossed the bridge, three cheers were given him. Then he passed under the arch and rode, unaccompanies. under the arch and rode, unaccompanied by any one, down the street of Yosemite village. A small boy said, "Hullo, Teddy." The president stoned his horse and a frown darkened his face. He rode up to the boy, the dignity of the president gone and in its place the face and severity of the father and parent. He gave the youngster a short ecture on manners that he will never forget. Several times he stopped to greet some one or answer a salutation and then disappeared in the pine-clad road that leads down to the camping place for the night. About two miles place for the night. About two miles below town he was met by a party consisting of Gov. Pardee, Judge Henshaw and Yosemite Commissioners Givens and Henshaw. The meeting was purely informal and much enjoyed by all.

Within the shadows of old El Capitan, hilled by the spirit of Pohono, the Indian name for the Bridal Vell, warmed by a rousing camp fire, President Roosevelt is resting tonight. It has been a hard day for him. Since early morning he has been in the saddle, viewing, admiring some of the grandest scenery in the world. Tomorrow morning he will take the Raymond limited stage at 6 o'clock, lunch at Wawona, and arrive at Raymond in mond limited stage at 6 o'clock, lunch at Wawona, and arrive at Raymond in the evening, where his special train awaits him. For two days and two nights he has been lost to the world and its curious, gaping crowds in the almost trackless wilds of the high Sierras, accompanied by a handful of trusted friends.

When the first ound trip and was directly in front of the Wheeler & Wilson factory, where a crowd of at least 300 persons had gathered, a bombardment of stones began. In the meantime stones were flying in a shower and one struck Mayor Mulva-hill on the head, bruising it badly. The other five cars operated on the streets received exactly the same treatment as they followed the first car into the barns.

### TENT CATERPILLAR. What an Arboriculturist Has Discove

John P. Brown of Indiana, editor of Arboriculture, is in Salt Lake looking in to forest situation in the west. Mr. Brown has recently been investigating the conditions in the Pike's Peak district, especially that section of the watershed from which Colorado Springs draws its water supply. The aspen thickets about the lakes and reservoirs in that district he says, have suffered severely from a pest of enterpillars which has practically stripped the trees of foliage. This particular peat Mr. Brown designates as the tent caterpiller, and says that there are millions of eggs on the growth this year which will be hatched out and if this pest is not dealt with the trees, so necessary to retain the snow, will ultimately die off. He sounds a cote of warning in this direction pertaining to the watershed from which Salt Lake draws its water supply and suggests that a sharp lookout be kept for these destructive insects before it will become necessary to spend a great deal of money in the removal of them. has recently been investigating the condi-
