EDITORIAL NOTES.

York is suffering from the ravages the unanimous opinion of the Con of the weevil, a small, white worm ference. Committee, composed of an eighth of an inch long.

Societies for promoting the cold nization of Palestine have been formed in several towns of Bulgaria. These societies have connected themselves with similar organizations in Roumania.

The reclamation of the Zuyder Zee will soon begin. A dike 241 miles long is to be made of sand, faced with clay, and so high that it will be 6} feet above the greatest tide level. The undertaking will occupy from seven to ten years, and will cost about \$16,000,0000.

Th Missourl legislature has passed a bill forbidding the sale or manufacture in the State of any imitation butter, no matter whether represented to be genuine or not. The oleomargarine makers made a test case, but the court of appeals decided that the law was constitutional.

It has been pointed out by a Ger, man newspaper that the order of the Sultan prohibiting Russian Jews from settling in Palestine only affects Jerusalem and the surrounding locality, since the greater p'rtion of the Holy Land is not official- that the incumbents shall hold their ly described as Palestine, but as offices for a certain period "and un-Syrla, where the Jews are permit- til their successors are elected and ted to settle.

There recently arrived in Jerusa- ment. lem thirty Arabian families, from Southern Arabia. They are accompanied by a rabbi speak the Arabic but when it came to the Conference and Hebrew languages, have the Committee it was accepted with Law and Jewish ceramonies, and some others by way of compromis many of them are artisans. They claim to be Israelites of the tribe of its objections to the other's amend-Gail-descendants of those that fled ments. In the Conference Committo Arabia prior to the destruction of tee Mr. Blackburn desired a change the first Temple.

The scheme for making an artificial sea in the interior of Africa, mentioned a short time since in this paper, has been abandoned.

It is worthy of special note that during the consideration in Congress of the Amendment by which the Governor of Utah was empowered to fill vacancies under a certain pro table contingency, the soundness of the "hold over" principle was admitted and declared. During the discussion of the measure in the Senate, it could not be denied that the principle would hold good in the

LAW.

Territories as it does in the States. And during the debate in the The bean crop in western New House it was plainly expressed as members of both houses, and was not disputed by a single member of either the Senate or the House. If members had been familiar with the Utah statutes they would have seen that the Amendment was

totally unnecessary. They were under the impression that there was no provision by which the failure of the August election could Le remedied, and that unless Congress legislated for the emergency the whole Territory would be without a legal officer. They were mistaken in supposing that all the Utah local officers are to be elected the same year, and they were not aware in

how many instances it is provided by our statutes that the terms of office shall continue until ;su cessors are elected and qualified. What they designed, as they declared in so many words, was that "no auarchy should arise through the failure of the August election," and to prevent this they so worded the Aminument that the Governor

should fill such vacancies, and such on'y, as might be caused through the failure of the election. It follows then, beyond a doubt, that in those cases where the law provides guatified," there is no vacancy and therefore there can be no appoint-

The Amendment was rejected by the Committee on Appropriations, each House receding from some of in the amendment concerning Utab, to make it clear and beyond question that no appointments should

hold until their successors are elect- | near Lake Ione, who was implicitly

THE PLAIN INTENT OF THE citement compels union and activity. And thus the means intended to des'roy, actually help to keep alive and vigorous a system designed by the Almighty to prevail over everything that rices up against it.

"God moves in 's mysterious way,

His wonders to perform." OYSTERS IN THE GREAT

SALT LAKE. An effort is to be made once more to raise oysters in the G.eat Salt Lake. The telegraph states that an order has been received by Fish Commissioner Blackburn from Mr. House, an old resident of Corinne Utah, for two barrels of seedling oysters for cultivation in the lake. The statement is erroneously made that "this is the first attempt to cultivate the oyster in Salt Lake." A thorough trial was made several years ago at the mouth of the Weber River. The seedling oysters arrived in good condition and were planted and tended carefully. But the conditions were found to be unfavorable. Too much salt impregnated the water at a distance from the river, the mud that washed into that the South does. He is lazy, the lake from the river's mouth was shiftless, thievish, and a general the lake from the river's mouth was unsuitable to the bivalve, and the oysters scon " petered out " leaving not a sign of their existence. Shiftless, thieviah, and a general nulsance. I've talked with a score of 'em, and they are as ignorant as our horses. They vote my ticket, but they can't tell me why. They

It is possible that Mr. House may be more successful at the mouth of Bear River, than the promoters of the scheme were at the influx of the the scheme were at the influx of the "When you return home you'll do Weber, but his attempt is not the the South Justice?" first of the kind. We should be very much pleased to be able to chronicle the successful cultivation of the oyster in the great saline lake of the North American Continent.

CHIGAGO,14.- A Pittsburg special says: The labor situation assumed a new phase on account of the reported sale of the working men's organied sale of the working men's organi-zstions to one of the old political parties. It is alleged that the com-ing convention of workingmen in Philadelphia is to be packed with "rounders" and "feelers," who can work outside the laboring class and carry out the plans of the politicians. Jarrett is con-equeutly preparing a circuler designed to prevent this scheme, and it will be signed by officials representing 40,000 working-men in th ; Pittsburg district.

The Commission appointed to inves. ed and qualified. But every mem- trusted by his neighbors, has abof all proper tion to the probable advantage?. It was also reported that several positive losses might be expected to result from it, among them the destruction of a number of fresh-water wells, which would be filled up and rendered uselass, to the detriment of the people on the neighboring slopes who are now in the habit of resorting to them.

A dispatch to the New York Sun says that the revolution in Ecuador headed by Eloy Alfaro has proved most successful. He landed near Emeraldus, as already reported, and commenced to organize a government and discipline his forces, which were continually increased by hundreds who flocked to his standard. The effort of Veintemilla to retain power as Dictator was his downfall. Town after town revolted, and declared in favor of Alfaro. Veintemilia took refuge in Guayaquil, in which city he is so detested that he dared not leave his residence. The most stringent measures were adopted against his enemies in the town, but all to no purpose, as, after much plotting, they expelled him from power. This decisive movement has put an end to all probability of continued distorbance, and the republic may be considered at peace. It is believed that Veintemilla will be exiled.

Anyone attempting to speak to Anyone attempting to speak to the Emperor Alexander, exposes himself to imminent danger. Even when walkingin his park he is watched by unseen protectors. In the couse of his rambles a short the couse of his rambles a short time age, the Emperor came upon some workmen.
