The Wasatch Stake board of education has decided to make the academy the official school of the Stake.

COLLECTING DOUBLE BOUNTY.

There is a strong suspicion in the county clerk's office that some one has "worked" the county about \$10 worth on bird heads for which the county is paying a bounty. After the heads are counted and examined they are burled by the janitor. A few days ago he dis-covered that the grave had been robbed and some 200 heads, lately buried, had been removed. Since then a batch of heads, smelling louder than usual, and bearing other evidence of having been buried, have been presented and the bounty collected on them. The sheriff is investigating the case.

ACCIDENT TO EMMET BOYER. Yesterday afternoon while Mr. P. H. Boyer and his 14-year-old son Emme were driving from Provo to their home in Springville the team became frightened and ran away near the county infirmary, and both were thrown from the wagon. Emmet had one of his ankles dislocated and the bone fractured. He was taken into the infirmary and a do tor was called who dressed the wound-ed limb, after which the patient was taken to his home. Mr. Boyer was not seriously hurt.

are among the best known of the many dangerous wild plants and shrubs. To touch or handle them quickly produces swelling and inflammation with intense itching and burning of the skin. The eruption

soon disappears, the sufferer hopes forever; but almost as soon as the little blisters and pustules appeared the poison had reached the blood, and will break out at regular intervals and each time in a more aggravated form. This poison will loiter in the system for years, and every atom of it must be forced out of the blood before you can expect a perfect, permanent cure.

Mr. S. M. Marshall, bookkeeper of the Atlanta (Ga.) Gas Light Co., was poisoned with Poison Oak. He took Salphur, Arsenic and various other drugs, and applied externally numerous lotious and salves with no benefit. At times the swelling and inflammation was so severe he was almostablind. For eight years the poison would break out every season. His condition was much improved after taking one bottle of S. S. Bounteous Rains - Slight Damage Done by Floods-Crops Doing Well.

Special Correspondence. Cameville, Wayne County, Aug. 23.— We have had some nice rains during last week; there has been some floods in the valley, but less severe than last year. Some little damage was done to the roads and to some ditches. We were able to put the water back in our canal with half a day's work. Fruit and melons and other late crops are doing well.

HYRUM.

First Quarterly Conference of Hyrum Stake-Interesting Features.

Special Correspondence. Hyrum, Cache Co., Aug. 26.—The first quarterly conference of the Hyrum Stake of Zion commenced at 10 o'clock Sunday morning in a beautiful grov on the pavilion on the public square of Hyrum city. There were present on of Hyrum city. There were present on the stand Apostles John Henry Smith and Marriner W. Merrill, J. Golden Kimball, of the first council of the sev-enties, Jöseph Morrell, of the Cache Stake, President William C. Parkinson, and a full attendance of the bishops, their counselors and various orders of the priesthood. There were about fif-teen hundred people present. The in-structions were seasoned with a rich outpouring of the Holy Spirit. The subjects spoken upon were the proper observance of the Sabbath day, the sacredness of the name of Deity and the general duties and responsibilities of the Saints. A number of young men were called upon and bore testimony to the work of the Lord.

One new feature in Cache valley was

inauguratd at this conference, and from the many words of praise from our visiting friends, was highly appreciated. A committee of young men and women prepared a sumptuous lunch in the academy for all visitors, both on Sunday and Monday... In the evening the beautiful grove and pavillon was illuminated with

electric lights and the young people held conjoint session. The instructions of President Kimball and the powerful address on temperance by Apostle Smith

There are miles of smiling fields today where a year ago it was an unbroken, barren prairie. People who visited this neighborhood 15 to 18 years ago complained that willows would not grow hereeven on the ditch banks; but the trouble now is to subdue them; and the monotony of sage or buck brush is broken by lines of shade trees hundreds of thousands of which have been plant-

WIT OF A CIRCUS MAN. Adopts a Clever Ruse to Announce a Performance.

There was a man at the circus last night who can give the members of the Topeka Saturday Night club cards and spades and beat them at their own

This statement is made without mental reservation and with a full appreciation of the lung power and resourcefulness of the average Saturday Night club member,

It was the duty of this particular circus man to mount a stand in the middle of the ring, announce the performance and dwell at considerabl ength on the attractive features of the coming concert program. It is the same old gag, which was introduced as far back as Nero's time, when the people were invited to stay for a little private wrestling match after the big performance was over.

Topeka people did not propose stand for it. The man with the big voice waited until the "highly skilled medicy of contortion, ladder acts and up-to-date vaudeville specialty" stunt was done and then sung out: "Ladies and gentlemen-

He got no further. Tom Doran asked him to cut the rest of it out and 7,000 people backed up the demand.
"Ladies and..."
"Here, here," "Cut it short." "We don't need that," etc. came from the

audience, followed by a perfect storm of hisses. Five times did the circus man attempt the announcement and just as many times was he stopped. Then a hard expression settled over his face. He waved his hand and the

Then a ring master with a brogue and a dress suit came forward. "Dis is no concert announcement," he said, disgust plainly written. "Listen and he'll tell you about de next act." This was a different proposition, so

the crowd quieted down. "The ladies and gentlemen will listen"-with an ley emphasis-"while I announce Monsteur Joseph La Fleur, with terriffic headlong plunges, backward drops and descending somer-saults from the top of a high ladder to the stage. Originated and performed only by this marvelous model of physically perfect man.

"Hooray," yelled the crowd, now thoroughly satisfied. So Joseph La Fleur did his great act. He climbed to the top of the ladder and did hair raising stunts while the

audience held its breath. The La Fleur dropped and there was a sharp clicking of teeth and an agonized "ah!" from thousands of peo-ple who saw that in the fall he had struck the edge of a box—as it seemed —full with his chest.

Two attendants ran forward and picked La Fleur up. Then they waved frantically for help. Tom Doran —'s never a word, but his face showed infinite pity. Harmon Wilson tried to climb over the seats to help the unfortunate man. Will

"Is there a doctor in the audience?" he called, appealingly, while the crowd sat in horrified silence. 'If there is," the man continued, "I want him and everybody else to stay until after the Fleur got up, bowed and smiled

and the generous crowd gave them all the hearty applause the very clever trick deserved.—Topeka Herald. VEGETARIAN DIET FOR THE MASSES.

Baelz gives the results of observations he has made on the Japanese, among whom the lower classes are al-most entirely vegetarians. They are so, net from choice or principle, however, but from necessity, since whenever they are able they buy a little meat or fish, and regard it as a great luxury. Their main article of diet is not rice, as us-ually supposed, because this is too expensive, and is used mainly by the well-to-do, but barley and buckwheat and the soya bean, which contains twice as much albumin as the best beef, and costs one-quarter as much, while in addition it contains twenty per cent of fat. The fallacy of Voit's dictum that 120 gm. of albumin daily are necessary for an adult is shown, for, as essary for an adult is shown, for, as evidenced by the habits of the Japa-nese for generations, it is twenty to thirty per cent too high, while it is demonstrated that a race may live on an almost exclusively vegetable dlet and yet be capable of vigorous and protracted labor. The prevailing type of metabolism investigation, in which metabolism investigation, in purely arithmetical results of analysis of the income and outgo are made, is
