## STRANGER DIES FROM EXPOSURE

Recent Inmate of Ogden Hospital Wanders from Bunk House And Freezes to Death.

## FOR RELIEF OF DESTITUTION.

Have Meeting Called to Devise Plans for Helping Unemployed—Suits for Divorce—"Good Citizens."

Ogden, Jan. 13.—Saturday afternoon the county officials of Boxelder county were notified by the Southern Pacific officials that the body of a man had been found near Promontory Point station, who is supposed to be T. Bauch, laborer, County Atty. Call came to Ogden Saturday evening, and yesterday morning, in company with Undertaker Larkin went out to Promontory Point and brought the body into Ogden last evening.

According to the best information given Mr. Call by the laborers who had seen the dead man, he went to Promontory Point about a week ago, seeking work, and started to work that day. That night, as there was not a bunk empty, he was given a bed on the floor. During the night he got up and moved around in the bunk car, awakening some of the laborers, who told him to go to sleep. He laid down again, but the next morning awakened early and went out without either shoes or coat or hat. That was the last seen of him alive. The men supposed he had left for Ogden and were started to find his lifeless body about 300 feet from the bunk house.

The suspicion is he was mentally unbalanced, being weak from a long spell of sickness, having only recently been released from the Ogden hospital. He wandered around among the rocks which cut his feet badly until overcome with the cold and was frozen to death. The man is about 40 years of age, with three or four weeks' growth of beard on his face, dark hair, slightly gray, slim build, 5 feet 7 inches tall, wore blue overalls and striped blue shirt. County Atty. Call remained in Ogden today in connection with the case.

## PROBLEM OF RELIEF.

Public Meeting Called to Formulate Plan to Relieve Destitution.

Ogden, Jan. 13.—What methods to pursue to best provide labor and board for the idle men now in Ogden is the paramount issue in the minds of the city fathers and prominent citizens. The first important step in that direction was taken by the Ogden Municipal association in passing a resolution asking the city council to establish a public employment bureau where men out of employment can earn enough to get food and a place to sleep, for a few weeks until spring opens up and employment will be more plentiful. For the purpose of coming to some definite conclusion on the proposition of providing work, a meeting has been called for 8 o'clock Wednesday evening at the city hall, which will be attended by the mayor, city council and prominent citizens to develop a plan of relief. The public is invited to attend and give expressions as to the best method to follow out in the matter.

A device for unloading sugar from the centrifugals in sugar factories has been patented by David Cowan, formerly of Lehi, and Edgar Roberts and Angus H. Gibson, machinists of the factory here. One of their devices has been attached to a centrifugal here and is proving very satisfactory. In its normal position it is held in place by a screw which is turned by hand. The device cleans the screen much better than when cleaned by hand which makes it possible to spin the sugar much quicker. Hon. George Austin and others who have seen the device speak in the highest terms of it, and there is no doubt it will find ready sale in factories where centrifugals are used. The device was invented by a Lehi, California, will be brought here for burial; however, her people here have not yet heard from Mr. Wines and no arrangements have been made for the funeral.
