well located in a well known mining camp and in the neighborhood of good producing mines. Careful investigation should be made as to the management of the company. If the management is good, that of itself is a recommenda-tion for the present because mod is good, for the property, because good management will select good proper-ties. Stocks of Tintic, Park City and Bingham camps are generally good, if the management and the property are as recommended above."

# CONVENES IN MILWAUKEE.

Circulars of the International Mining Congress Issued.

Circulars are now being passed round Announcing that the International Min-ing congress will assemble in Milwau-kee, Wis., at 10 a. m. Tuesday, June 19th, 1900. The mining industry is repesented as being "the powers that will most easily, naturally and permanently build up our foreign trade, restore pros-perity among the people and lay a firm financial foundation for the present and future temperature." future generations."

The congress will not confine its consideration alone to that of mining for gold and silver and their by products, but all things kindred to the mineral and metallic classes will receive atten-tion. Some of the benefits likely to flow from such a congress are set forth in the circular, such as the exchanging of practical ideas, the bringing about of needed changes in the federal mining laws and the securing of better recognition of the mining industry in the natonal government. Mr. Holbrook of Provo is a member of

the executive committee and P. T. Farnsworth is on the finance committee of which S. B. Milner is the secretary The basis of representation is as fol-

# WANTED PAY FOR A MISTAKE.

Rev. David Utter, formerly of Salt Lake, and pastor of Unity church, Denver, secured his missing bicycle yesterday by offering a large reward. The reward was not paid, for it was very evident to the minister that the wheel had been held under peculiar circumstances. Mr. Utter was attending a meeting one day in the Turck flats and had left his new chainless at the curbing. A negro porter, working in a drug store at Colfax and Josephine, rode a cheap wheel up, and departed with the clergyman's. Nothing was heard until the reward was offered,

State. The company was incorporated in Iron county a short time ago to de-velop the Johnny group of mining claims in the Stateline district. The capital stock is placed at \$200,000, di-vided into chares of \$1 each. C. O. Newell is president, J. G. Brown, vice-president; Frank M. Whison treasurer and W. J. Dooley, secretary. These with Elizabeth J. Wilson and Elia Newell, constitute the board of direc-tors. Machinery for Young America. The gasoline hoist and pumping plant Young America's new plant at the started for a preliminary trial and lim-bering up Friday, and when some slight bering up Friday, and when some slight alterations are made in the settings, the pump will be started, perhaps to-morrow (Sunday). General Managér W. B. Andrews is expected to arrive this evening and work on the grading for the mill will begin at once. The mill, which will be a ten-stamp affair, was purchased a few weeks ago in Utah and is all framed and ready to set up. and is all framed and ready to set up. The first consignment is already on the road between here and Elko and the balance will be forwarded as -rapidly as teams can be secured to transport it. It is the intention of the company to hurry work as rapidly as possible, and it is hoped to have the mill in operation in a few weeks after it arrives on the ground. The underground workings continue to develop a good grade of milling ore, with no signs of aching the limits or walls of the vein. Everything now being hoisted is milling ore, and as the mill will be erected directly at the shaft, there will be

handling which is the shart, there will be practically none of the expenses in handling which is the great obstacle in working low-grade ores.-Tuscarora Times-Review.

## COPPER GLANCE OPTION.

First Payment Becomes Dat on the 26th Inst. The terms of the option secured by Mr. McMillan, trustee for eastern par-ties, on the Copper Glance mine at at Bingham, calls for first payment of two cents a share on the 26th inst. As soon as the first installment of \$5.000 fr turned over it will be necessary for the purchasing parties to put on a force of four men for twenty-five days a month for six months. On Decen three cents a share or \$7,500 is due, the bal-ance being payable on or before June 26, 1900. Out of a total of 250,000 shares all but 20,000 are secured under the option. It is reported that very good ore has lately been encountered at the depth of 300 feet, which runs well in copper and gold, and this has caused some of the stockholders to feel doubt-ful whether they want the deal to be

# consummated or not. BRIGHAM CITY COPPER.

#### A Vein Over a Foot Wide is Now Being Worked.

Superintendent J. M. West of the Brigham City Copper and Slate company is securing supplies today prepar-ntory to starting work on the company's claims near Brigham City. A pay streak of copper something over a foot wide has been encountered in the lunnel, which has been run on the vein a dis-tance of 134 feet. Assay returns on samples shown today are said to show momenter of 20 contents of the the upwards of 30 per cent couper. It is the intention to put up buildings for the men and push work on the copper vein this winter. In the spring, work is to

be commenced on the ledge of slate also located on the company's claims.

## VALUE OF LEAD STOCKS. The United States Investor Talks About

Utah. The United States Investor has the following to say in response to certain enquiries concerning the value of lead "There seems to be a demand for lead properties and eastern investors are in-vestigating the different camps of Utah.

Large transactions have been recently consummated whereby not only copper mines have been transferred, but also lead mines.

"Investments made in these stocks, if carefully made, are sure to return good profits to the investor. Treasury stock of good companies offers some of the best chances for investment. These stocks are usually sold at rather a low These price at first and the money is spent n the development of the property. It takes from two to four years to bring good prospects to a paying basis. In the meantime, however, the stock has advanced many times the original investments. Selections should be care-fully made, and properties should be

bottle

The Geyser-Marion reported at the local refinery today with a 400 pound batch of gold cyaniaes.

Miss Bessie Shirley, of the Mine and Stock Journal, will leave for Colorado the latter part of the week.

A contract for 100 feet of work on the Yankee Consolidated tunnel was let yesterday. The tunnel is now in about 1.100 feet.

The test run on 1,600 tons of Grand Central second class re, recently made at the Sicax mill, is said to be very satisfactory.

Prest. Hunter, of the Daisy mine at West Dip, is here from Fort Wayne, Ind., for the purpose of inspecting the mine

Three of the directors of the New Yosemite company are visiting the com-pany's claims at Birgham. Some ore is being taken out.

P. T. Farnsworth arrived in town this morning from his periodical visit to the Horn Silver at Frisco, which is reported to be looking very well.

H. S. Joseph reports a good showing of ore in the tenth level of the Galena mine at Fish Springs at a depth of 600 feet. Some of the ore is said to run as high as \$58 a ton in gold.

It is thought that the 400 foot level of the Cleopatra mine at Tintic will be reached soon after the end of the month. Drifting will then be started towards the ore bodies.

Drifting on the ledge is still in pro-gress from the 400 foot level of the Joe Bowers Extension. Milling ore has been encountered and the condition of the workings is add to be been stored. the workings is said to be improving.

Returns issued from Washington in August last by D. T. Day, chief of the division of mineral resources, show that while in 1880 the mineral output of the United States was \$259,319,000, it has since grown to \$697,820,720.

Superintendent J. C. Reynolds of the Bunker Hill came in from the mine last evening and left again this morning. Some nice looking ore is being encoun-tered in the east drift, and the appearance in the west drift indicates the near approach of vein matter.

It is said that while the ore bodies on the upper levels of the Bullion-Beck are much improved there is nothing worthy of being called a strike. Prospecting work is being energeticall pushed below the \$00-foot level. Th Ballion-Beck mill, recently leased by Fred May and A. E. Hyde, will shortly be started up, and the ore on the Beck dump will be operated on.
