EUROPEAN RATES ARE FELT HERE

They, With Eastern Influences, Maintain Local Financial Conditions.

CLEWS RECOGNIZES WARNING

Bank of England in Announcing Increase in Rate of Discount Gives Notice to All Nations.

In the local money market this week the demand for money has been very strong, with rates well maintained. But this latter feature has been due in part to sympathy with the eastern markets, and with the increase of rates in Europe. There seems to be a fear that the period of low rates and easy money has passed, for the present at least. The revival of business in the east is now in full swing, which will doubtless make a demand for money that will sustain a fair interest rate. [illegible]

VIEW OF CLEWS.

Henry Clews in his last circular letter says:

[illegible]

HARDWARE TRADE.

The hardware trade reports business as still active for the current week. [illegible]

LUMBER TRADE.

The lumber trade reports a condition of continuous activity. [illegible]

WHOLESALE DRY GOODS.

The wholesale dry goods trade reports [illegible] to the usual steady business, a good trade, shipping out blankets, quilts, flannels, and winter goods. There is no complaint this fall of either shortage of cars, or delays in shipments from the east. Jobbers report the fall dress goods market as moving, with a leaning toward fancy woolens in supplementary supplies, while staple lines for spring are shown as strong. [illegible]

RETAIL DRY GOODS.

In the retail trade, dealers report that the present fine weather is detrimental to their business, as people will not buy goods to any extent until the advent of cold weather. However, trade is very fair considering, particularly in sales of fur suits. [illegible]

Nature makes the cures after all.

Now and then she gets into a tight place and needs helping out.

Things get started in the wrong direction.

Something is needed to check disease and start the system in the right direction toward health.

Scott's Emulsion of Cod Liver Oil with hypophosphites can do just this.

It strengthens the nerves, feeds famished tissues, and makes rich blood.
