This Machine is the harvest gathering of twenty years' experience in the manufacture of Agricultural Machinery, and takes rank with the Printing Press, Engine, Lath and Locomotive in the qualities of precision, stanchness and durability.

Its foundation is a single piece of solid iron, of shape to resist all possible strains.

Its gearing is shaped to standard gauge, and each cut out of solid iron, with mathematical exactness.

The working parts are permanently fixed and fully protected from water, dust, grass and all other external causes of disturbance.

By these means, we reduce friction to the lowest point, stop the self-destruction common to all rough cast machines, avoid breakages in harvest, secure easy draft and the same durability which pertains to cut gear in other kinds of machinery. The WORLD has been tested four years in the hands of the most intelligent and reliable farmers in the land, who unite in declaring that, comparatively.

"There is no other Harvester."

Correspondence.

PROVO CITY, March 8, 1871.

Editor Deseret News: Dear Sir,—On the 6th inst., as per previous arrangements, a meeting of the citizens of Utah County, interested in the organization of a County Co-operative Stock Herd, was held at the basement of the meeting house in this city. Bishop A. O. Smoot, presiding.

The Bishops and leading men of all the settlements of the County were present, except from Lehi, Cedar Fort and Fairfield, which were not represented.

On the call of the President for reports of the amount of stock subscribed, and the feelings of the people on this matter, the majority of the representatives reported a general desire for such a measure, and a liberal subscription, while in two or three settlements a feeling of fear, or to wait and see how the business would pay, seemed to prevail.

A number of excellent speeches were made by the brethren and a good feeling prevailed, after which the committee, consisting of Hon. Geo. W. Bean, L. John Nuttall and John B. Milner, appointed at a previous meeting to draft a constitution or articles of agreement for organization, presented said agreement, which was read, and, after due consideration, on motion of William Bringham, was received and adopted.

The name of the association being "Utah County Co-operative Stock Association," with a capital of one hundred thousand dollars.

The meeting then proceeded to the election of officers, which resulted as follows, viz.: For President, Myron Tanner, of Provo; Vice President, William Bringham, of Springville; Directors, Orra Well Simons, Payson; John Morgan, Goshen; David H. Holladay, Santaquin; Albert K. Thurber, Spanish Fork; Gideon D. Wood, Springville; Isaac Bullock and Elijah F. Sheets, Provo; John Brown, Pleasant Grove; Thos. J. McCullough, Alpine, and Washburn Chipman, American Fork; Secretary, Alexander F. McDonald, Provo; Treasurer, Abraham O. Smoot; General Superintendent, Lyman S. Wood, Springville.

After remarks from President Smoot on the progress of the Provo Woolen Factory, the meeting adjourned.

At a meeting of the Board of Directors of the Stock Association, held on Monday evening and Tuesday morning, Washburn Chipman, of American Fork, and Joseph S. Tanner, of Payson, were appointed business agents; and John D. Holladay, of Santaquin, James A. Bean, of Provo, and Henry H. Boley, of American Fork, were appointed appraisers.

The General Superintendent was instructed to procure suitable herd grounds, receive stock and start the business forthwith.

This is another move in the right direction and no doubt will tend to uniting the people, and those who may feel a little fearful at present, will ere long have a desire to be found among the willing and obedient.

Yours, very truly,
L. JOHN NUTTALL,
Secretary of meeting.

The Celebrated Elgin Watches, Finest Diamonds, Jewelry, Silver-Plated Goods, Optical Goods, Spy-Glasses, Spectacles for the million, Microscopes for Miners, Bank-Note Detectors, etc., etc., for sale by Carl C. Asmussen, New Rock Building, opposite Salt Lake Exchange. w42 2m

Twenty-Five per cent. Saved by using DOOLEY'S YEAST POWDER in the preparation of biscuits, rolls, pastry, etc., over any of the ordinary baking powders in the market. This is occasioned by the full net weight in each package, and the fact that it is composed of articles strictly pure, healthy and nutritious, which insures satisfactory results every time. By using DOOLEY'S YEAST POWDER, thirty pounds more bread can be made from a barrel of flour than by any other process of raising dough. A trial will satisfy any one of its standard excellence. For sale by Grocers generally. c91 3eod w61
