Ever since 1876 the dynasty Liberal cabinets have little by little, especially under the auspices of Senor Sagasta. given back to the people with univer-sal suffrage, the majority of the liber-ties and rights introduced by the revolution, but up to the present, no min-istry has dared to attack the constitution of 1876 as far as liberty of con-science with its corollaries, seculariza-tion of public education and liberty of discussion and criticism are concerned The points at issue between the vati can and the Spanish government are the control of the cemeteries, civil marthe control of the centeries, civil mar-riages, public education (all matters which have been settled by the ensuing legislation) and the big question of the religious congregations not included in the concordat of 1851. The church op preses the municipal control of cemeteries and demands that the practise of allotting portions of the cemeteries to Spaniards and foreigners who do no subscribe to the state religion shall be discontinued. In respect to the question of civil marriages, the church wishes to have it laid down that civil unions between Spaniards are only legut when celebrated according to canor law, which is absolutely opposed to th actual system. Before, during and since the revolution, civil marriage al-ways has been held to be legal. Farther, marriages between Catholics in Catholic churches and chapels must be registered in the civil registers to have any legal validity. Consequently the clergy are forced to do this or to have a civil registrar present at the coremony. Births and deaths are also coremony. Births and deaths are also registered by the civil authorities with wonderfully improved results as far as the preparation of statistics and the proper maintenance of records are con-

vere summoned, but the injured man was beyond help. The remains were afterwards removed to the undertaking parlors of S. D. Evans, where they now its awaiting further investigation of the deplorable occurrence.

## A MENTAL CLOUD.

For some time the mental condition of Judge Bennett has been somewhat unbalanced, and while he was in the best of health physically, his mind had been gradually weakening for several years past. # BIG BRITISH CRUISERS.

## Offensive Power Immense, Speed Greatest Ever Attained.

London, Oct. 11 .- The Daily Tele graph today says that three armored cruisers now under construction, the Inflexible and Indomitable on the Clyde and the Invincible at Elswick, about which much secrecy has been main-tained by the admiralty, are in reality battleships, of as heavy broadside fire as the Dreadnought, but very much faster. These vessels will in fact be the most wonderful ships ever built for any navy, in that they will have great-er offensive power than any two battleships now in commission in any fleet in the world, combined with ex-traordinary speed, far in excess of anything hitherto attained. Following are the dimensions of these vessels: Displacement 17.250 tons:

530 feet; breadth 781/2 feet; mean draught 26 feet; weight of the hull inficiently to permit approach to the mouth of the lock where one man was cluding armor and backing 111,100 found unconscious and, it was believ-ed, dead. The other missing were sup-posed to be still in the lock, where the Each vessel will carry eight new 12-

inch guns. Although these vessels have each two guns less than the Dreadnought, the Daily Telegraph continues: They will have power in broadpide fire, due to a new arm of the guns, four in two barbettes fore arm of the guis, with a training arc enabling them to be used on either side, and four more in two barbettes placed in echion in the center of the ship so as to bear on either beam, ahead or astern. They thus will have six guns for fire ahead or astern and the will be able to bring the entire armament of eight guns to bear to either port or star-board. Consequently the fire of these vessels in chasing will be as heavy as the head or stern fire of any three for-eign battleships, while on the beam it will equal that of any two other battleships. These vessels are designed for a speed of 25 knots and may attain 27 knots on their trials. They will be propelled by turbine engines. The construction of the hulls is on the same principles as adopted by the Dread-nought, but they are less heavily armored.

### STEAMER VENTURA SIGHTED.

Honolulu, Oct. 11.-The Oceanic Steam-hip company's steamer Ventura, which was reported as being overdus here yes erday, was sighted early this morning.

The minister of education, Dr. Jimine, a leading member of the Canalejas group, has taken the initiative in the secularization of education without waiting for the papal nunch to force his action. In a circular, he asks all the educational authorities, primary and secondary, to forward to the minis try within a month a list of all non educational establishments which are not legally authorized. The decree hits hardest the schools kept by the religious orders, where many of the teachers are foreigners, neither propery domiciled in Spain, nor provided with

panish university degrees. In addition to all these measures, the Dominguez cabinet makes no secret of the fact that it intends to open the question of revision of the concordat and make all religious associations amenable to the ordinary law on cororations.

The present cabinet has the unani-mous support of the Liberals and even the Republicans in wishing that clear, precise and severe laws should oblige the religious congregations to submit themselves to the supremacy of the civil power, and to cease to be a reactionary ud ultramontane militia at the beck and call of the papacy, a milita at the beck as in most Catholic countries, has not been looked on with invariable appro-bation by the secular clergy and the hierarchy.
