### COL. CLAYTON HOME. Found an Awful Cold Wave in the East -Ius s is Not Bad.

Col. Nephi W. Clayton returned home this morning from a month's absence in the east. He went as far east as New York, which he reached in the middle of a cold spell. Cri. Clayton found the money market easy, with investors looking for western loans. The westbound train that carried the colonel from New York was four days in reaching Detroit, as it froze up and the engines died four times en route, while there were long delays in getting thawed out. Then the ferry boat on the Detroit river froze in the ice while crossing, so that Col. Clay-ton had a rather chilly experience of it. At Detroit there had been over a month's steady sleighing, with ideal wintry weather.

weather. The colonel found Miss Clayton doing finely in her musical studies under Al-horto Jonas in the Detroit conservatory, and her instructors speak of her in the highest terms Mrs. Clayton and her son are remaining at Detroit with Miss Clay-ton for the present, and the colonel re-turning alone.

## WILL KEEP OUT UTAH SALT Effect of Price War Now Raging on the Pacific Coast.

Announcement is made through the Associated Press from San Francisco that the long threatening war there between the Imperial and Amalgamated Salt companies, has occurred, and the result is that prices in coast markets are being forced way down. Inquiry at the offices of forced way down. Inquiry at the offices of the Inland Salt company, in this city, de-velops that to only effect this has on the Salt Lake producers will be to shut Salt Lake salt out of the Pacific coast markets until the warfare is over. Salt from this point has been shipped freely into Spokane, but as the freight into Spokane is 525, cents per evit, there would be no money in attempting to hold that trade at the prevailing prices in Pacific coast markets. Col. Clayton sigs the war may last only a day or two longer, and it may last until the weaker of the com-batants thinks it has had enough.

#### NEWELL GIVES FIGURES.

In answer to a question by Mayor Roylance, Prof. Newell stated that the annual inflow of the lake was 431,000 cre feet, and that the evaporation was 398,000 acre feet. This great evapora-tion could not be saved in mountain reservoirs, as much of it came from the low hills, but they hoped to save a great amount of it in the lake by reducing its area.

VOTE OF THANKS.

A vote of thanks was given Messrs. Newell and Pinchot, and they were invited to come again whenever oppor tunity offered. The meeting was very interesting and the feeling very friendly throughout. It is likely the Utah county people will take steps to secure some concession from the Salt Lake county people in the way of using water, which is now claimed by the latter, for the lands which will be drained by the low-

ering of the lake, as indicated by some of the speakers at the meeting.

The suit was not connected by defendant in court although he filed a sensational answer and cross complaint when the action was first instituted against him. In his cross-complaint Austee asked
