COLD BRINE PIPES.

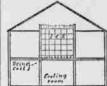

COLD BRINE PIPES.

Making Them Available in the Wirch of Coming Mills.

Professor P. H. King has prepared for Heard's bairyann a sharted and it institution of a method proposal by him for ceiling mills and keeping it could be means of pipes circulating cold through the refragrants. The system roughts also, of course, the see of impart of Professor King's two as to save the see water as fast as it is method and make it help forther in the work of refrageration. The latins pipes produce greater cold.

Directory King explains his plan as fallows.

The strangest dexice, everything considered, where a permission could be be exceeded, would be one which utilised to be everted, would be one which utilised the cooking rower of the ice without the labor and tosses of rehandling the

for after it has been stored. In other secrets, where its is available three should be an inclument or ice offerage changes or studied with reference in the cooling room that the lotton of the winds of the cooling brins is circulated through the cooling brins is circulated through the cooling brins is circulated through the cooling muits as any nocided to de the work, with no other labor than simply pumping the brins through this refragerating coll and the milk cooler. I present here a diagram illustrating this induction to the cooling man and the cooling of the cooling
