Saturday. . October 4, 1884./

EDITORIAL NOTES.

Premier Ferry regards the affair a Foo Chow as,"a feat of arms that does honor to the French navy." In M. Ferry's mind, Admiral Courbet "cov ered himself with glory." If glory is the name, it was certainly a very cheap sort of glory. Courbet, with his magnificent irom-clads, destroyed some Chinesejunks.

Few people are aware of the important work now under way in Northern Minnesola, to guard against the dangers of high water and the inconveniences of low water in the Mississippi River. A number of lakes in that region are being connected into a reservoir system, which is to collect and feed water as may be required.

In a recent sermon in Birmingham Cardinal Manning said that men were laboring to efface from the law of sthe land the very name of God. Politics were godless. Philosophy was godless. Science was godless. It was the same with education. There was no true education without religion. What had made England great? Not warfare, not conquest, not politics nor legislation. It was the one faith and the love of God and of the neighbor.

This is the way in which the sharp Chicago News insignates that a reporter has been drawing the long bow: That Pennsylvania dog that aroused the sleeping guests of a burning hotel and lugged babies out and went back to look for more and was burned to a engine room, and the basement concrisp is not dead. He is only sleeping. tains the drainers and agitators, and Whenever the same reporter wants him has a number of substantial arches for for another story the dog will be found as lively as ever and as willing to carry buckets of water up to the roof and yell through a speaking trumpet for the pipemen to turn the hose on the southwest corner.

General Sharpe has been interviewed fall of 49 jest. There are three Turbine plied that he thought the president ing they weren't very good. "Welf," water from the washing and other

THE DESERET NEWS COM-PANY'S PAPER MILL.

Norices have recently appeared in all our city contemporaries of the new paper mill crected by the Descret News Company. To-day we devote a portion of our space to a brief descriptio of this important enterprise. The old paper mill in the Sugar House Ward has been known to the public for years. It answered a good purpose for a time, but was inadequate to the increasing demands of the DESER-ET NEWS for print paper, to say noth-

ing of requirements in other directions. The water, too, at the old mill was so discolored as to render the manufacture of clear white paper impossible. It was therefore determined by the

company to build a new mill on another site and to furnish it with the best kind of machinery. After much consideration and examination of different places thought

was settled upon by the President and the mouth of Big Cottonwood Cañon. cleared and work commenced in Octo-

operations started in April, 1883.

feet long, which can convey the whole creek, and is carried through an iron

by a New York Tribune correspondent, wheels measuring respectively 30, 20% who asked him about the use of his and 13% inches, encased in an iron flesh that all capacity for locomotion name as a possibility in filling the wheel pit. The water flows into a cut had deserted him, and the garrison treasury vacancy. General Sharpe re- stone culvert and is carried back into carpenter at Governor's Island was the creek. A stream of splendid fresh could do a great deal better than that. | water for washing and other inside This is all right for the general to say, purposes is brought from a spring by a but it calls up the story of the woman flume half a mile long, and by an iron who apologized for her biscuits, say- pipe into the building. have to say."

The conference of the three Emperors in Europe is significant chiefly as that of men who hold the dogs of war in leash, and may let them loose at any Of the 3,201,971 able-bodled men under arms in Europe and costing 595,615,608 a year in taxation, these three Emperors have in command 1,599,728. They represent a vast burden laid on the industrial energy of the continent, keeping its people poor and driving multitudes of them across the Atlantic to find homes in the new world. Some fine day the European plowman and artisan will get tired of all this and will force his masters to disarm or fight.

"General Grant will receive a check for \$50,000 when he completes the manuscript of his story of the war, parts of which will appear in the Century material-"half stuff," is taken by the mag zine," so a close friend of the General said recently. He added that the great commander was writing as quality of paper, then reground in hard and fast as he could work, and heating engines, and taken down into will have the book completed in a very few months. He preferred to take a lump cash sum for his book rather stairs again to pass through the Jordan than to wait for copyright or commisengine, which cuts it up, into smaller sions. So he sells his book outright, consistency and makes it even texture; though he would probably make more then down it goes into the bases in the long run by keeping an interest
