# He Has No Fighting Heart Left After The Drubbing Received on Commings Field.

Denver University's hard luck in having to play games that might bring it wnown with a bunch of cripples, recalls Utah's disastrous sensor of 1905, in which Utah had a team in the pask of condi-tion three weeks before the Rouider game, when it hoped to crown a football iteer by defeating the then champion of the intermountain west and the car-

lears east to Indiana as well. But with everything lovely Russell re-ceived one or those troublesome ankle crusses in a practise game with the Sol-ners and his root got warse steadily un-til be couldn't be parced against Bouilder, Then betwee came along. The game was easy. Utah won with a handy score, but a ginut named Foles with a football due that would have ruled him off the held forever in a better regulated com-munity, fumped on Barton, ittak's ginart guard, and fook away the only heavy man in the center trio, with a broken shoulder.

non in the center trip, with a presen-shoulder. And then came the Boolder game with its back field and no center trip, and a disastrons defeat just when the season seemed tipe for remarkable success.

CONDITIONS REVERSED. CONDITIONS REVERSED New this same Denver team, with new plavers, of course, is up against the same program. Twice defeated Couch Kooh-ler is lown at Los Angeles for a game that would put some pride linte mountain football, if only memnian football could win over the southern coast style. But Koeller has come to his oppor-tunity like Urah went to her Boulder game after being brutsed and battered in defeating Denver. In Los Angles his team, which played here has Saturday, is now resting, and surging the bruikes received by its 69-minutes of contact with Utah. COLLECTION OF CRIPPLE.S

Koehler's greatest wish is proba-bly that he might have his team back in the condition it trated out onto Cum-mings field Saturday for the first whistle instead of in its condition at the end of the came.

When the germs of Malaria get into the blood they destroy the rich, intritive qualities of this vital fluid and reduce it to such a weak, watery andition that it is unable to furnish the system with the nourishment and atength necessary to keep it robust and healthy. The complexion grows pale and sallow, the appetite fails, digestion is deranged, a bilious condition of the system is set up, and often chills and fever make life miserable for the person in whose blood this insidious poison has taken root. There is but one way to rid the system of Malaria and that is to purify the blood difference of the direct of the system of Malaria and that is to purify the blood of the germs of the disease, and S.
