

DESERET EVENING NEWS.

Thursday, May 7, 1896.

AS TO THE FESTIVAL.

Promoters and Other Citizens Will Meet at Calder's Hall Tonight.

GENERAL INVITATION TO PUBLIC.

The Promoters Make a Report of What the Festival Will Include—Show and Merriment.

The promoters of the summer carnival will meet with other prominent citizens at Calder's Music Palace this evening at 8 o'clock, in further discuss affairs in connection with the enterprise. An invitation is extended to ladies to present and join in the work. The promoters have made the following request:

The proposed midsummer festival is rapidly becoming an assured fact, and it ought to be. It deserves the hearty interest and support of every patriotic citizen of Salt Lake and Utah. No more important enterprise has been held in our city and State is now in contemplation; and, to the honor of such men as Governor Wall, H. C. Chambers, P. H. Lamm, John Q. Cannon, George M. Scott, H. F. Nuttall, W. D. Jenkins, John C. Cutler, T. G. Webber, Wall, and President Free Americans of the Chamber of Commerce, W. K. Cannon, and their associates, it must succeed—and exceed gloriously.

The 4th, 5th and 6th of July are to be the great days of the festival. There will be a grand day to honor the memory of our fathers and mothers and the boyhood of youth in Utah and a children's day, when "Utah's best crop" in healthy nature, will display itself to thousands in all the beauty of its growth. The 4th will be the "Utah State Fair" will be National day, and never has Columbia's proud yet eagle-spirited leader, more exultantly and joyously done so—or so—will at this first Independence Day celebration of Utah's a people, a sovereign community of the American Union.

There will be grand parades of United States troops, and of Utah's gallant National guards, three regiments representing wounded heroes in Utah history, where all history seems a drama of wildest romance. There will be, of course, a king and queen of the revels, to whom the keys of the city will be surrendered by the Mayor of Salt Lake City Council. There will be illuminations and torchlight processions, flying of colors in glorious variety, flares, festoons, lighting and fun.

The nights will be filled with music, and the stars that fill the firmament day shall fold their tents like the Ark, and suddenly sail away. All the world will be welcome, every one will be open as "Every hotel will stand open to the last guest." "On with the dance! Let by golly, we'll do it."

The railroad will make special rates, as have rates. If ever, now made in the country before. Coming to a particular will be easier, than was ever before. At the hotel, there will be no charge. Expenses will be borne by the county, and from regions will gather, known and they will all be ready to give their services.

Besides all the charms and delights of the festival itself, they will have countless wonders, glories and beauties to enjoy. There is beauty as well as sentiment as O. C. can add to the scene. The fair will be grand, from Alpine Valley and gardens, to Napoleon bay and river, would not surpass if it even dreamt, that vast gallery of the gods. The superb glories of the Wasatch and Ogallala mountains, the grandeur, magnificence and variety of the wondrous valley of New Jordan, all beauty laden with fruit and flowers. The marvellous waters of the American, impatiating in games of pool, as well as

mixing up with the soft and velvety peaks of Androscoggin range from its extreme base, bathed in perpetual splendor and beauty. There will be something for all to see, and wanting you to leave in your arms over its gateway to the master Holy Land and over all with its glorious past and guides, as over here its sages, poets and philosophers.

This will be the grand carnival of Utah, from everywhere—the strange and interesting features of a certain semi-civilization has no parallel on earth, and our friends from far and near will be as an ordinary story book.

Today that notable date in time and place, the Internation, in which a white or a golden sun has been over the heads of 20,000 seated people, is seen only black away, and the sun has shone as bright as an ordinary sunrise.

Travelers and excursionists, sightseers and wonder-hunters will come from the north and the south, the east and the west, and thousands of visitors will spend hundreds of thousands of dollars—of gold silver dollars—in Salt Lake.

J. J. Mayson, chairman of the committee, has issued his circular letter to Denver last year, and Secretary Culver of the Salt Lake Chamber of Commerce has the subscription of \$2,000 directly to the business of the Carnival Committee. That much was spent in Denver, and another have gone.

Salt Lake will get back in money a hundred times what her proposed collection will cost. It will increase as rapidly as every vacation season, and those interested in the business will spend hundreds of thousands of dollars—of gold silver dollars.

Utah Microscopical Society.

The Microscopical society of Utah will hold its regular meeting tomorrow, Friday, evening at the usual time and place. The subjects to be discussed will be: "Microscopic Observations on the Microscopic Structure of the Human Skin," by Dr. F. A. Morrison. "How to Microscopically Strike a few plants," by Mr. M. C. Stevenson. These will be followed by the exhibition of slides.

These meetings are full of interest and are open to all who wish to attend.

A Household Trick.

D. W. Fisher, of Canarsie, New York, has invented a new device for the home. His "New Discovery in the Home" is a powerful impulse will be given to the housewife in the preparation of vegetables, fruits, etc., and the preparation of soups, stews, etc., and give the cook a mighty short hand.

The device, when introduced, will be sold at \$1.00. Address, D. W. Fisher, 200 Main Street, Brooklyn, N. Y.

The device will consist of a small metal ball that will roll on a track, to assist in the preparation of vegetables, fruits, etc., and give the cook a mighty short hand.

The device will be sold at \$1.00.
