

In an Awkward Predicament.

Is an Awkward Predicament. New York, Sept. 5.-Shareholders in the English railways have been fright-ened by an article by an American, just published in the Times, throwing doubt on the solvency of the railway systems of this country, says a Tribune dispatch from London. A large number of sell-ing orders were received on the stock atchange. The British railway share-helder has to face an ugly prospect and he is by no means free from re-ponsibility for the situation in which he became involved. The charge of prequentity brought against the British affway companies, certainly is exag-mation of truth. The shareholder is a-mation of truth. The shareholder is a-mation of the side of a liberal division if profits when improvements are rerofits when improvements are re-

of profits when improvements are re-quired, not to obtain an increase of the but merely to maintain the ex-isting position. Thus fresh capital is constantly being sunk in an outley which ought to be met out of the revente of shareholders. Influence, too, is generally thrown fa-to acare against proposals for bring-ing the rolling stock and general equip-ment up to date and a demand is now made for some means of cutting down expenses and indeesing the profits. A committee of the London and Morthwestern shareholders, represent-ing 54,000,000 of stock have been hold-ing conferences with the board in order to davise a feasible plan. The line which it is proposed to adopt is an arrement between the various trunk withins in order to lessen the competi-tion. It is probable however, that the chief result of the agreement will be increased rates, already too high, thus injuring the general trade of the coun-try.

BEADQUARTERS AT OGDEN.

Elipatrick Bros. & Collins Will Lease the Race Track. (Special to the "News.")

(Special to the "News.") Ogden, Utah, Sept. 5.—The removal to this city of the raffroad construction outfile of Kilpatrick Bros. & Collins. as related in last night's "News." means much for the city of Ogden. It is understood that the big concern will lease the old race track juits north of the city and establish there work-mong in which to give the machinery, harness, tents and the like the usual overhauling preparatory to doing an immense amount of construction work next year. The decision of the owners not to take their seneral headquarters, is significant that Utah will next year the the center of the heaviest opera-tions in railroad building and other construction work. This city will thus be the western headquarters for Kil-patrick Bros. & Collins, one of the very armets and the seneral headquarters largest construction companies in the country, and the general headquarters of the Utah Construction Co., another large concern and of Corey Bros, and Aiden, a strong corporation already operating in Utah, Nevada and Ore-ron, although organized during the resent year.

This will be glad news to the mining machinery men sere who made such a protest regard-ing the putting into effect of the new the recently. Under the new order of mains the rate will be within 15 cents of what it was originally up to this memore. Just why such a sweeping cut in the rate to Denver and no reduction from Denver west has been put into most is not at this time apparent. It
