THOMAS, 13.—On the 17th ult. the Dessalines captured the ernment law, but government public opinion, and the clause lodging such vast possible power in the hands of one man might defeat the well considered feeling and sentiment of the country. His opinion was that the provision proposed admitted the possibility of a Senator designed by the President pro temperarilly to occupy the chair of the Senate, going back to the president provision of the senate, going back to the president of the Senate, going back to the president provision and the La Patric. It is said the faddle wheels of the latter steamer were damaged and a shell in the Senate. There had never tilled seven man. The Desaglines

in the Senate. There had never been shown in the Senate any disposition to take a petty advantage of the absence of a member on either side of the chamber, and he hoped the Senators would pause before agreeing to the proposi im.

Garland moved to amend the new rule by striking out the three day limitation and injecting instead, "But such substitution shall not extend beyond an adjournment," which is the provision at present in force. He opposed allowing a longer time than the actual sitting of the Senate for a delegation of tuch power.

Edmunds thought it quite obviour in the present condition of the Senate, there being no Vice President, that it would be a great convenience to adopt this rule if it can be lawfully and properly done.

Chicago, 12.—The result of the meeting of the national committee scams to have little political significance. It is true Logan's home has been selected for the convention, but Chicago was selected so far as can be learned, irrespective of the presidential caucus. For example, it got the vote of Platt, of New York. It might be eaid that this was part of the plan of Arthur to keep the al liance with Logan, expecting that if the latter could not get the nomination, that he would turn his votes over to

THE PILGRIMAGE TO MECUA In view of the fact that the French government is actually considering the expediency of jointly occupying the Holy Oity of Mecca with other civilized powers, in the hope of so controlling the yearly pilgrimages thither as to prevent the engendering and spread of cholera epidemics, the New Orleans Times notes some curious facts connected with this constant.

This pligrimage belongs to the class of Fera or divine ordinances Wired From Washington, 13.—The object of the resolution introduced by New in the resolution introduced by New in the national republican committee yesterday, is to put the national convention and all arrangements and matters pertaining thereta, into the hands of the national committee. There will not be a clissus' committee as in the last convention, but a committee of five, appointed on motion of New, together with the chairman and secretary of the national committee, have the entire control of the building, lasuing tickets and all matters convention.

Greenville, Miss., gives the following to make the resolutions to the trouble there obtigatory upon every Mohammedan once during life. None of sither as a state of the real convention of the municipal election.
