

Idaho News From Her Main Cities and Towns.

POCATELLO TEEMED WITH STALWARTS

Politicians and Newsmen Have Strenuous Times in Gate City.

IRRIGATION CONGRESS NEXT.

Monte B. Gwinn Hustling to Make the Session at Boise the Best Ever.

Special Correspondence.
POCATELLO, Aug. 2.—One of the prominent men of the convention which was a feature here this week was Monte B. Gwinn, a former partner of the late Gov. Frank Steunenberg and a prominent sheep man of Idaho. Mr. Gwinn is an enthusiastic Borah man and since Monday until the time of the Republican convention practically settled the controversy, Mr. Gwinn buttonholed delegates and generally sang the Borah siren song. In fact Mr. Gwinn was one of the chief lieutenants of the Borah forces.

PLUGGING FOR CONGRESS.

However he found time while so engrossed to put in a plug for the Irrigation congress which will convene in Boise during the first week of September. In addition to his other duties Mr. Gwinn is the chairman of the executive committee which has charge the success of the National Irrigation congress. With no appropriations from the legislature to help out to any extent and no big fat checks from the railroads who have been in the case in some past conventions, Mr. Gwinn is getting along and hustling in the direction of ways and means for the entertainment of the strangers who will flock to Boise September 5-8. To all whom he encountered at the Republican convention this week he affirmed that it was the duty of every citizen of the state of Idaho to make it a personal duty to see that the effects easterner were given a good impression of the Gem State.

"This coming National Irrigation congress means a great thing for Idaho in every sense of the word," he said. "Utah, who was in a measure instrumental in aiding Boise in securing the convention, is doing her share and some of the live men of Salt Lake and Ogden are holding up their end of the log. We anticipate the best congress yet held. The fact that Vice President Fairbanks is coming to Boise together with some of the big men of Congress in itself assures success. Idaho will have a great amount of advertising in consequence and the easterners will see object lessons in the reclamation of arid lands. While appropriations have been made for irrigation purposes in this state there will have to be many more before all the available water is utilized. The slogan "One Hundred Millions for Irrigation" must be kept up and the west must continue to sing that song so as to keep the matter before the country. Appropriations have been made for schemes throughout the West but they are liable to stop there and the work be half finished in consequence."

"One of the things we are playing up strong is to bring representative newspaper men of all the leading papers and magazines of the country to Boise next month, in a special train if possible. We will treat them as well as we know how and show them all we have in exhibit in the way of irrigation projects complete and in operation, in course of construction and projected."

"Everybody is working to this end for we one and all feel the value of printer's ink as a medium in the upbuilding of a community, section and a state. While we of course are for Idaho before everything else, we do not propose to be selfish about this. We expect our contiguous states to help in entertaining and showing the best they have and ultimately join us in the benefits derived from a visit from some of the brainiest men in the newspaper business."

Mr. Gwinn says that Boise will take care of the delegations, all right, and there need be no fear that the undertaking will be too large for her well known powers of hospitality. The various committees are working together in harmony, he says, and everybody is straining every nerve to make the occasion a real letter one.

On all sides is there the warmest favor of Utah and a desire to return favors of the past.

MAY CUT LOOSE.

Among the many editors present here this week in attendance upon the state Republican convention is O. H. Moon, editor of the Journal at Coeur D'Alene. During the trials and tribulations incident to the fight for their rights upon the part of the four northern counties of Idaho Mr. Moon expressed himself to the effect that the northern panhandle of Idaho was destined ultimately to be severed from the Gem State and be taken upon Washington. "It is bound to come sooner or later," he said, "because the interests of this section of the state are in every manner opposed to those of Idaho proper. The northern portion of the state of Idaho properly, not to say geographically, belongs to Washington. Northern Idaho is essentially a timber country while the balance of the state to all intents and purposes is comprised of sagebrush and arid lands that are being developed by irrigation. It is only a matter of time before the state of Washington also will be divided into two smaller states, because practically the same conditions prevail in that state today as they do in Idaho, and what is a good thing for one section of the state does not prevail in another section, and the consequence is that there is constant friction between the residents of one portion and those living in another. It is impossible to please all, and no matter what is done there is always one section which thinks that it is getting the worst of it. But in no state is this so pronounced as it is in Idaho, where the north and the south have such divergent interests."

CANYON DEMOCRATS PATTED "PTOMAIN."

Special Correspondence.

Nampa, Idaho, Aug. 2.—While the Republicans were nominating their state ticket at Pocatello, the Democrats of Canyon county put things into motion, with the calling to order of the Democratic county convention, here this afternoon, at 2 o'clock. Senator Dubois' friends had control of the convention, and passed a resolution pledging its support for his re-election as United States senator.

HON. BURTON L. FRENCH,

Idaho Congressman Who Was Nominated by Acclamation to Succeed Himself.

The following men were elected delegates to the convention to be held at Coeur D'Alene City, on Aug. 6: J. L. Leawell, J. M. Bennett, A. D. Garrison, M. A. Bates, J. C. Rice, C. H. Arbuckle, R. V. Schree, J. J. Walling, Fred Davis, Fred G. Mock, T. W. Hunt, C. L. Calender, D. Murray and S. E. Cheesey.

An artesian flow of excellent water, a little too warm for drinking purposes, has been struck by J. W. Cline, who is boring a well for the Short Line, at a point south of the Hyde Park school building, and a short distance west of the cold storage plant. Water began trickling over the top of the 10-inch pipe Friday morning when the well had reached the depth of 35 feet. The flow has increased and it now runs 50 gallons per minute.

Mountain Home turned out to the ball game to the number of about 100, Sunday, accompanying their ball team to Nampa. The brass band was brought along and rendered some first class music for the occasion. The Nampa team proved too strong for them, winning by a score of 11 to 4. Mountain Home made her two scores in the first and second half and after that did not get a man to third base. Manager Fisher is quite proud of his aggregation of players and expects to carry off all the trophies at the future games.

Richard Denyer, the teamster for the Central Lumber company, met with an accident Sunday evening, which cost him the loss of his left foot. He attempted to cross the railroad track between the cars of a moving freight train, when his foot was caught on the rail and the car passed over it. It was a miracle that the man did not lose his life in making such an attempt. He was taken to Dr. Murray's office, where he was given medical aid, and was sent to the hospital at midnight to have his foot amputated. Word has been received from his wife at Albany, Oregon, that she is on her way to his bedside.

NORTH FORK DRY BELOW ST. ANTHONY.

Special Correspondence.

Salem, Idaho, July 31.—The great Snake river is dry below St. Anthony, and the farmers at North Salem are suffering for the want of water. The sudden fall of water is most surprising to everybody.

Miss Anna Christensen of Bloomington, Idaho, is visiting friends and relatives here.

A gang of men has commenced work on the bridge across the north fork of Snake river between Salem and Parker. It is a wise move, as the old bridge was nearly toppling in.

The first crop of alfalfa is about harvested and is reported to be good. The grain crops are abundant and everyone is busy taking care of the same.

Mr. and Mrs. Bert Holman were made happy by the coming of a baby girl. Mother and child are doing well.

Mr. and Mrs. James Furman were presented with a baby, a son, who died shortly after birth.

The consolidated water ditch is filling out against ditch companies offered for taking all the water to which they are not entitled. The consolidated is one of the oldest ditch companies on the north fork of Snake river, and should be entitled to its share of water.

GRAIN AND BEETS GROWING "LIKE WEEDS."

Special Correspondence.

Parker, Idaho, July 31.—The past two weeks have been remarkably hot, which, while there was sufficient moisture, was the very thing needed. The hay crop is mostly in and is somewhat light compared with other years. The grain and beets are sowing and growing like weeds this smoky hot weather. Small fruits are excellent, large fruits thinly in evidence. River is falling fast, but plenty of water so far.

The attendance from Parker at the quarterly conference at Montpelier was fairly good. The conference was visited by Apostles Penrose and Whitney, who occupied most of the time in speaking on topics of vital importance to the Latter-day Saints, especially the sacredness of the sacramental ordinance, and the sincerity in the offering of forgiveness. "Forgive ye one another in your hearts" being particularly emphasized. On the afternoon of Saturday, July 28, two hundred were rendered by the local church, Rev. Lot Edwards of Regensburg, aged 17, only, who accompanied by Bishop Wiley, violin obligato by Pro. Wiley. The lady has only had home training, but is well to the front in ability and execution. Second Prof. Wiley and company.

In the evening a grand concert was given in the Maryville ward house by Prof. Wiley and others, the grandest musical treat never enjoyed by the people of that neighborhood. The company wound its way to the North Fork falls on the following day having scored a success. They had an enthusiastic and appreciative audience.

Health of the people is good and exercise enough to promote digestion.

FRONT CONFERENCE HELD AT MARYSVILLE.

Special Correspondence.

MARYSVILLE, Ida., July 30.—Marysville was honored by the stake presidency, who convened the stake quarterly conference here, held on the 28th and 29th inst. We were favored with the presence of Elders C. W. Penrose and O. F. Whitney, the stake presidency and many of the bishops and counselors from various wards in the stake. The instructions from the presidencies and others were most timely and encouraging.

The Democratic county convention was held at McQueen's hall, Preston, on the 28th inst. It is reported that it was one of the largest conventions held in the county for some time. The delegates elected to attend the state convention at Coeur D'Alene on the 6th inst. An older, David Clark, T. D. Davis, John E. Jones, from Cache Valley, S. J. Callon, Orson Henderson, Clinton Meacham, Otto Gassman. After the convention a number of the visitors attended the special exercises in their honor at the hot springs. The feature of the afternoon was the match ball game between Malad and Preston. The game was exciting from start to finish, the final score being 5 to 2 in favor of Preston. Mr. Flife, who pitched for Preston, and Sanderson, who caught, had the distinction of putting out all of the men who were put out on the opposite side. The Preston team was materially crippled by not having their full quota of men present. Preston now has the honor of holding the championship of the county.

Last week a very serious accident happened to George Wilcox, delivery boy for Roberts & Hawkes. The accident happened while he was making the morning delivery. In some manner his lines became crossed and the horse became frightened and ran into a tree.

George was thrown from the wagon and was caught between the hub of the wheel and the ire. The knee joint of the right leg was crushed and the leg broken above and below the knee.

Medical attention was immediately summoned and the injured limb dressed. At last reports he was recovering as rapidly as could be expected.

On Tuesday evening a birthday party was given in honor of the fifty-first birthday of Mrs. C. C. Pratt of Preston and Prest. W. C. Parkinson of Hyrum, at the home of Mrs. C. C. Pratt on First South street. So far as is known Mrs. Pratt and Prest. Parkinson are the oldest pair of twins in the valley. A number of relatives and friends were in attendance at the party and report having had a very fine time.

Last week Misses Emma Prewin, Chilla Ball and Ethel Ball of Salt Lake were visitors of Miss Anna Parkinson. The ladies were on their way to Bear Lake where they go to spend a few weeks in the mountains.

Miss Sarah Ady of Cohoes, New York is visiting with Mr. and Mrs. John C. Greaves.

A number of people are going from Preston to Logan to be in attendance at the circus which is being held there today.

Miss Mand Osgood of Bear Lake is visiting with Mr. and Mrs. A. W. Hart.

There will be a dancing party held at the academy this evening.

The Preston Military band has just received their new instruments. The instruments are of the celebrated Conn make and cost the band about \$500.

Last Friday a girl was born to Mr. and Mrs. James Johnson, Jr.

On Monday Mrs. Montrose of Clifton underwent a serious operation, from which she is reported to be recovering nicely.

A son of Jacob Peterson of Monk Creek, is quite ill with pneumonia. The boy's father is now filling a mission in Scandinavia.

Mr. and Mrs. John C. Greaves, Jr. and Mr. and Mrs. Summer Pond of Gentile Valley are visiting with Mr. and Mrs. John C. Greaves of this place.

SUMMARY.

Sale for the abnormally high temperatures which continued generally in all parts of the state, the weather during the week just closed was devoid of marked features. Temperature conditions did not vary greatly from those of the previous week, the average daily excess ranging from 2 to 5 degrees. Except on the 28th and 29th the maximum in the northern and western counties of the state were above 90 degrees and readings of more than 25 degrees were frequent. The highest temperature from which reports were received occurred at Lexington on the 28th—102 degrees. On the morning of the 28th fresh to brisk northwest winds set in over the western counties and maximum temperatures remained below 90 degrees. Generally in this division of the state, the day proving the most pleasant of any since the heated period began, the minimum on the following morning ranged between 42 and 55 degrees. A marked rise in temperature occurred on the 28th and the maximum readings on this date were the highest for the week in the southwestern counties. In the eastern part of the state the average daily excess in temperature was about 3 degrees, with maxima of 90 degrees or slightly above. The minimum in only a few instances exceeded 60 degrees.

The week was the driest of the season to date, no measurable precipitation having been reported. Clear skies were the rule and there were long periods without clouds of any kind. Water for all purposes appears to be plentiful.

WEATHER CONDITIONS THROUGHOUT IDAHO.

THE REPORT for the climatological service of the U. S. weather bureau for the state of Idaho gives a summary for the week ending as follows:
