TERMS IN ADVANCE.

Local and Other Matters.

FROM TUESDAY'S DAILY, SEPT. 23.

Postmasters Appointed.—The following postmasters have been appointed for Utah: Lycurgus Johnson, Ashley, Wasatch County; David J. Willson, Hillsdale, Iron County; Mrs. M. A. Sheirley, Logan, Cache County.

Defeated in Denver.—The Salt Lake Deserets, who left for Denver Saturday morning, to play a series of five games with the Brown Stockings of that city, were beaten yesterday afternoon by a score of 10 to 6. The second game of the series was to take place this afternoon.

Badly Burned.—The Junction states that on Sunday afternoon Mrs. A. W. Taylor, of Harrisville, started to the well after a bucket of water, leaving her two children, boys aged respectively 2 and 4 years, asleep in the house. Hearing the older boy scream, she hurried back and found the bed on fire and the younger child's clothes in flames. Hurrying him to a place of safety and giving the alarm, the neighbors assembled and the fire was extinguished. The little fellow was badly burned, but it is hoped not fatally. The cause of the fire is supposed to have been a match in the hands of the older child.

The Plowing Match.—One of the interesting features of the coming Territorial exhibition is the plowing match which is to take place on the farm of Jacob Pearl, West Temple Street, a mile and a half south of the city market. The premiums are a number of plows and \$75 in cash, which will be distributed to contestants in three divisions. The first is free to all under 25 years of age, the second to sulky plows, the third to all. The rules for the match are as follows: The quantity of ground for each team is one quarter of an acre; the teams to start at one time and each plowman to do his own work without an assistant; each plowman to strike his own land and plow entirely independent of adjoining land; each plowman to finish with two back furrows to fill up the dead furrow. The points to be considered in the first division are durability, ease of management, quality of work, depth of plowing and time; in the second, simplicity, adjustability, ease of management, quality of work, superiority of hitch, and draft; in the third, time and quantity alone. No premium will be awarded unless the ground is plowed six inches deep.

The Fair.—Saturday evening the directors of the D. A. and M. Society held a meeting to make further arrangements for the coming exhibition. Six hundred complimentary tickets were voted to the poor, and the price of admission set at 25 cents and 10 cents. We are requested to publish the following, special attention being called to the alterations and additions to the list, including a miscellaneous list:

In the first and second divisions, Class "G," horses, will read as follows: In division first—None will be permitted to compete in this division but such as furnish a pedigree from Wallace's Stud Book or the American Turf Register, and must have been owned in the Territory three months prior to the first day of the fair. In division second—None will be permitted to compete but such as furnish satisfactory proof of cross of either sire or dam, having a pedigree as provided in division first.

George A. Lowe, Esq., has offered as a premium, a cider mill complete for the best collection of not less than 20 varieties of apples, and not less than six of each variety. Apples competing for this premium will be placed in groups for exhibition, and will not be permitted to compete for separate premiums.

The directors will provide the necessary facilities for the exhibition of imported machinery and agricultural implements, and propose, as an inducement to manufacturers and dealers in these articles, to appoint an examining committee, composed of practical men, who will give all articles in this department such consideration as is necessary for a report on the respective merits of each. The report will be published. This class will consist of wagons, threshers, reapers, mowers, horse rakes, gang plows, walking and sulky plows, harrows, cultivators, rollers, scrapers, hay-balers, and every other kind of machinery or implement necessary for agricultural, mechanical or other purposes.

The miscellaneous class is intended for all articles which may have been omitted in any other class. It is the intention of the board to afford an opportunity for the exhibition of any worthy article or animal, and persons who desire to exhibit anything not found enumerated in the several classes will thus be enabled to do so. The same attention will be given this as other classes by the awarding committees, and suitable premiums will be awarded, according to the merits of the articles exhibited.

FROM WEDNESDAY'S DAILY, SEPT. 24.

Gone to be Tried.—Lillard, the Nephi burglar, went to Provo this morning, in charge of Sheriff Turner, to be tried in the First District Court for his crime.

Tracklaying Again.—Tracklaying has recommenced on the Utah Southern Extension. The work has been discontinued for several weeks on account of a lack of iron, but as this material is again being shipped, the work will go on as long as the iron lasts.

"Dispatch" Notes.—The winter terminus of the Utah and Northern will probably be at Sheep Creek, 30 miles north of the present terminus, near Williams' Junction.

The Frontier Index and the Miner.—Two papers of Butte City, Montana, complain of a lack of support and hint at a probable collapse.

Native Mineral Wax.—Mr. Julius Kern, a miner, called this morning to present this office with a fine specimen of native paraffine or mineral wax, from a new bed discovered by him, last Sunday, in Klone Cañon, about 60 miles east of Springville. The sample weighs over 10 pounds. It is a finer quality than some we mentioned in our columns about two years ago as "Utah-cerite," or Utah mineral wax. The history of this interesting and apparently abundant substance is as yet imperfectly known. Professor Newberry of the School of Mines, Columbia College, has made the mineral wax a subject of attention, with a view to its utilization for insulating purposes. That gentleman considers the mineral wax a true ozocerite, as described by Dana. It is highly probable that there are several varieties of this substance, which may eventually find important uses in the manufacture of substitutes for gutta percha and India rubber. We congratulate Mr. Kern on his "strike," and hope he may be successful in finding a market for the commodity.

Grant's Reception.—A meeting of the business men of Salt Lake was held last evening, at the office of Bennett & Harkness, as the first step toward a reception to be given to General Grant, should he decide to visit our city, on his way across the continent. An executive committee was appointed, consisting of the following named gentlemen: Messrs. E. W. Morgan, Jacob Lawrence, R. C. Chambers, Henry W. Lawrence and J. M. Dooley, into

whose hands the matter of general arrangement and preparation were given. A finance committee, consisting of Messrs. T. R. Jones, L. U. Colbath and W. F. James, was also appointed to raise funds to defray the expenses of the memorable event.

The first step necessary was to ascertain whether General Grant purposed visiting this city, and the illustrious gentleman was therefore telegraphed last evening.

The message set forth that a meeting of the kind mentioned had been held, that a letter would follow with further particulars, and asked if the General intended stopping here. At last accounts, no reply had been received. The letter was sent off this morning.

Kicked by a Mule.—A sixteen year old son of Mr. Samuel Bringhurst, of North Jordan, met with a serious accident yesterday morning, about 10 o'clock, on the State Road, near South Cottonwood. He was driving a team for a young man named Frost, while the latter was riding his companion's mule, and reaching a cross road where Frost was to turn off, got down from the wagon to mount his own animal and come on to the city. The mule, acting stubborn, Mr. Samuel Bateman, who happened that way, rode up to its side and endeavored to coax it along. Young Bringhurst then went forward to get upon its back, when the animal threw up both heels, kicked him in the abdomen, and while he reeled back, struck him again in the face. His nose was smashed in and a long cut made the full length of his forehead. In spite of his injuries, though, the boy did not even fall, and, notwithstanding Mr. Bateman's endeavors to persuade him to remain at a house near by until he should go for assistance, insisted on mounting the mule and riding to the city. His grit kept him up all the way, but he was feeling rather weak last evening.

FROM THURSDAY'S DAILY, SEPT. 25.

A Premonition.—Among the last words uttered by John Hilton, previous to his death, this morning, were these to his father, "Father, I knew when I started away this morning that I was going to be killed, but I had not the courage to tell you."

Married.—We once more have the pleasure of recording a happy marriage. This time it is Mr. Edward B. Clark and Miss Wealthy Richards, both of Farmington, who were to-day united in marriage by Apostle F. D. Richards. The bridegroom is a son of Elder Ezra T. Clark, of Farmington; the bride, daughter of Elder Franklin D. Richards and his wife Mary T. Richards.

The Park Connection.—Park City and Salt Lake were connected by the electric wire at about 8 o'clock last evening. Messages were immediately sent over the line and a system of communication established. Park City is flourishing, and bids fair to become, if it is not already, the most important mining town in Utah. The new telegraph line is a valuable acquisition to its other advantages and will facilitate the transaction of business and help the enterprise of the place still more.

Emigrants Arrived.—The emigrants destined for this city and points farther south arrived last night, safe and sound, in care of Bishops L. W. Hardy and R. T. Burton, who went to Ogden yesterday to meet them. A considerable portion went south this morning, destined for Sappete, Sevier and other southern localities, and another lot will leave to-morrow. The company are in excellent health, have had an exceedingly fine voyage, with nothing to mar their peace or pleasure.

The Fair.—The Territorial Fair opens on Wednesday, the 1st of October. Arrangements have been made with the Superintendents of the Utah Central, Utah Southern and Utah Western Railroads for free freights on articles to be exhibited at the fair, and conference rates to the exhibitors. They hope to effect the same arrangements

with the manager of the Utah and Northern Railroad Company, which, when accomplished, will be duly announced.

A Dual Wedding.—Mr. James McAllister and Miss Minnie Irwin, both of this city, who were married in St. George on the 7th inst., returned home last evening. At the same time and place Mr. Daniel McAllister and Miss Rhoda M. Young, of St. George, were made husband and wife. Both bridegrooms are the sons of President J. D. T. McAllister. The last named lady is a daughter of the late President Young, the other, a young lady well known in this city.

We wish both the loving pairs a long life of prosperity and happiness.

Grand Jury of September Term.—The only business transacted in the District Court this morning, was the empaneling of the grand jury, this being the first day of the September term. The jury were called and examined as to their qualifications. Two or three were absent, and several others were dismissed on account of their belief in polygamy. This left but six remaining, who were accepted, and necessitated the drawing of 20 additional names. The jury were then excused until Saturday morning at 11 o'clock, that the talesmen might be summoned and appear for examination.

Returned Missionaries.—Elders N. C. Flygare, Charles Monk and Thomas Childs, just from the European Mission, called upon us this morning. The last number of the *Millennial Star* contains the following: "Elder Flygare, the president of the company has, during his late mission, extending over a period of about a year and eight months, presided over the Scandinavian Mission. He has labored with great diligence and wisdom, and accomplished a good work. He has conducted the affairs of the field that were under his supervision with the most exemplary prudence and care, leaving it in a most satisfactory condition."

Frightful Railroad Accident.—This morning, about half past eight o'clock, an accident occurred at Sandy, by which a young man named John T. Hilton, aged 18, a son of Brother David Hilton, one of our well known and respected citizens, met a cruel and untimely death. The young man, for the last six weeks, has been an employee of the Utah Southern Railroad, holding the position of freight deliverer along the line and required also to assist as brakeman when needed. The train started out at half past seven this morning, as usual, and had reached Sandy, where a switch was to be made. Young Hilton went between the cars to unpin the coupling, but did it a little too soon, and the detached car moving away, he lost his balance and fell across the track. The main train backing up, several cars passed over his body. Both his legs were broken and terribly lacerated and his right hand nearly torn off. He was immediately sent to this city by the freight engine on the caboose, arrived here about nine o'clock, and was taken into the company's office at the depot, and surgical attendance summoned. There being no hope of recovery, his father, mother, brother and sisters were also taken to his bedside. He was quite conscious when taken off the car, asked how long it would be before the doctor arrived, and made other remarks in a cool and quiet manner. When lying on the bed he told his mother not to cry and said, "Mother, if I have ever done anything—" and then stopped and did not speak again. His death occurred at 20 minutes after 11 this morning. He was an exemplary young man, well liked by all who knew him. We sympathize deeply with the parents and relatives, who seem almost heart broken at the sad occurrence.

MARRIED.

On Saturday, the 27th of September, by the Reverend G. M. Pierce, Mr. Henry H. Myers, of B. M. Co., to Miss Martha Sarah Reed, of the Ninth Ward of this city.

Catarrhal POISON

W. De Meyers' Treatise on Catarrh, explains the following important facts:

1. That Catarrhal Colic becomes a poisonous infection, at first local, and finally constitutional.
2. That, being Constitutional, the infection is beyond the reach of mere local remedies.
3. That whatever impurities exist in the nostrils, are necessarily swallowed into the stomach and inhaled into the lungs, thus poisoning the digestive, the respiratory and the genito-urinary organs.
4. That Catarrhal virus follows the mucous membrane and causes Weak Eyes, Deafness, Dyspepsia, Chronic Diarrhoea, rheumatism, Leucorrhoea and Consumption.
5. That Smokes, Douches, Inhalations and Insoluble snuffs, taken into the nostrils and throat, cannot possibly remove infectious inflammation from the organs named.
6. That an antidote for Catarrh must possess an inculcative affinity for, and the capacity of being absorbed by the purulent mucous wherever located.

Acting upon these theories, Mr. W. De Meyers has found a remedy for Catarrhal diseases, which proves to be infallible. His treatise, with overwhelming proofs and full explanations of the most important medicinal discovery since vaccination, is sent free and post paid to anybody. Write to the publisher, Catarrh Cure, is not yet in the hands of all Druggists. Where not thus procurable, it will be delivered to any address at \$1.50 a package. To Clubs, six packages for \$7.50. To the trade, liberal terms.
