A COAT OF BLACK MOIRE.

In this handsome coat we find utility combined with elaborate style. The lining is gray satin, with a very warm interlining; and the lace, "apuchin" hood, the wide lace-cuffed sleeves, deep cape and silk neck-girdle are touches of the very latest modes. The toque of white lace, red velvet and shaded ribbons is a novelty.

These new sweaters, both the hand-knitted and the less expensive machine-knitted ones, are very much in favor. They are worn not only for golf, or with gymnasium suits, but over thin waists with open-front coats.

AMONG THE CHILDREN OF THE TENEMENTS.

The recent visit of Miss Carrie Hale to our city in the interests of the National Sunshine Legion will make a brief review of the work of the organization of interest. It is told in the following story:

The foundation of the Sunshine Legion's broad movement to aid the children of the tenement homes, had its origin in an humble effort made by a small body of determined men and women to teach the beautiful lesson of unselfishness and kindness to little children of the streets. It is not instituted on charitable lines, as we believe that a work of this kind to be practical requires educational rather than charitable effort.

Five years ago, at Christmas time, we conceived the idea that there was a field for work among the tenement homes. All the world seemed cheerful and happy in anticipation of the joys of Christmas time, sunshine and mirth seemed to pervade every home and every being; but alas! we were soon to know that happiness was not everywhere—we found a congested section of the busy city where homes or better still—places of habitation—dwelt human lives, that knew little or no cheerfulness.

We found little girls and boys who knew not the pleasures of owning a doll, a toy, or a plaything. In fact they were content if they obtained enough food and clothing to enable them to exist, and as our own early experience had impressed us with this actual condition existing, a determined effort was decided upon to remedy these matters. We bought as far as our limited resources would allow a quantity of toys, and a visit to the tenement homes for the purpose of distributing our gifts, opened our eyes to the manifold needs of these people, whom the societies and varied institutions of the busy city appeared to have forgotten. Charitable societies, churches and kindred bodies were all helping to supply the necessities, but how few were the individual efforts toward bringing sunshine and cheerfulness into the tenement homes.

The first step was the formation of clubs of young women, who would interest their little friends in collecting picture books, toys, playthings, etc., with the intention of distributing these little sunshine aids in the homes of the poor. Some of these young ladies volunteered to personally hand out these gifts and by their visits they learned to know the pressing needs of those who dwell in the gloomy abodes, in the alley and side streets. From the information secured, we determined on a new line of that of cleansing and purifying the slums. We learned to know the needs for better tenement homes, and began an agitation toward the enactment of laws that would condemn the hovel and let fresh air and sunshine into the filthy nest spots. In order to do these things, it was necessary to arouse public interest. There were many feasible projects that appealed to us, and that we knew were sadly needed in every community, and while we had a semblance of organization, we determined to secure positive permanent results, but the main element was lacking, viz.—funds. We finally conceived the idea of a little child's paper, that would tell to the world the story of our work. This little paper in return for a small subscription is sent not alone to the subscriber, but an additional copy is sent each month to some little poor child, and as it is filled with bright pleasing stories it never fails to bring its beautiful lesson of sunshine to its dear little readers. The receipts that were derived from its sales have enabled us to carry on the work of the Legion and wholly from its sales we have been enabled to establish the Sunshine Legion Work in 225 cities. We are not a charitable society, and ask no collections from the people, other than the subscription alluded to, viz.—Sale of our publications. From this source alone, during the five years of our existence, we have expended \$25,000 among the children of the poor. We are advocating in each and every city the consummation of the following projects:—

Better Tenements.
Public Playgrounds.
Fresh Air Outings.
Children's Clubs.
Public Baths.

Settlement homes where deserving mothers can have their little ones cared for, while these mothers are enabled to earn a dollar toward their families' support. The Sunshine Legion support several of these places today. Since organizing, nearly half a million good books have been distributed among the tenement homes.

25,000 dolls and toys have been presented to the little folks and during the summer months we paid for 5,000 children Fresh Air Outings. At Thanksgiving and Christmas times we provided free dinners and toys to 12,000 children, and through our employment bureau we secured work for hundreds of poor women. We would ask, dear reader, if we are not entitled to the name Sunshine Legion.

Our work is non-restricted by denominational lines, we know only one religion, and that we teach: "Love thy neighbor as thyself."

We seek to teach the children of the tenements the lesson of kindness and humanity, that is all.
