

# INTERIOR GLIMPSES OF A GREAT INSTITUTION.

AMONG the finest business offices of the commercial world are the administration buildings of The Peru-na Drug Mfg. Co., of Columbus, Ohio.

The ever accelerating rivalry of modern business equipments has transformed the dingy, unwholesome places of business of a generation ago to veritable palaces where aesthetic adornments and splendid architecture find their highest expression.

No lavish of costly materials is withheld, no perfection of detail or elegance of finish is spared.

Vying with the royal mansions of mediæval splendor, the up-to-date palace of commerce, where the tremendous currents of trade are regulated and controlled with swiftness and accuracy, combines every convenience, comfort and artistic decoration that art and wealth can produce.

Administration Department of the Peru-na Drug Manufacturing Co., Columbus, Ohio.

DR. S. B. HARTMAN, PRESIDENT.

OFFICE OF F. W. SCHUMACHER, VICE PRES.

ADMINISTRATION OFFICE.

## A SHORT HISTORY OF PE-RU-NA.

THE remedy, Peru-na, is in reality a very old remedy. The basis for the formula by which Peru-na is made first appeared in "Doctor Beech's Family Medicine," which was published more than forty years ago.

The formula was then known as the Neutralizing Mixture. Dr. Beech's Family Medicine was quite extensively used among a religious sect in Southern Pennsylvania, known as the Mennonites.

It became an early ambition of Dr. Hartman to put this formula before the world in such a way that others besides the Mennonites might derive its benefits. After considerable modification of the formula and perfection of its pharmaceutical qualities, he finally succeeded in establishing the remedy under the trade name of "Pe-na-na."

At first, the Doctor prescribed it only for his regular patients, but very soon the demand became so great for Peru-na that he was obliged to establish a manufactory devoted exclusively to its production.

The story of the growth of Peru-na reads like a romance. When once the people began to find out its true merits, its popularity became phenomenal. Never before in the history of medicine has a remedy become so universally recognized and so widely used.

BOOK KEEPING DEPT.

It is in this elegant office that the greater part of the work is performed of carrying on Dr. Hartman's prodigious correspondence.

Five hundred letters coming daily from all parts of the civilized world, asking for advice, counsel and instruction on various subjects in which a physician is usually consulted, are answered every day under the direct management of Dr. Hartman.

This correspondence makes available to millions of people the vast experience and resources of one of the most renowned physicians of the present age. Information on every detail of health and disease is sought and supplied daily, bringing to the most distant home professional guidance and expert knowledge, absolutely free of charge.

A single consultation with a physician with the renown of Dr. Hartman would cost even the poorest of the people at least \$100, but through the perfect organization and immense equipment of the Peru-na Drug Manufacturing Company, Dr. Hartman is enabled to give to all inquirers freely the ablest opinion and the most valuable assistance without charge.

An untold multitude of catarrh victims of both sexes are by the assistance of this continuous consultation permanently cured.

The doctor gives special attention to that class of ailments which afflict womankind. Many thousands of women are cured every year, a large per cent. of whom would otherwise have found their way to the operating table or to the hospital.

One of the latest achievements of this sort are the offices above referred to, where the immense business of supplying the world with Peru-na is transacted. The main business office has a floor space of 10,000 square feet, furnishing ample room for the one hundred trained clerks employed in this department. This room, glimpses of which are given in the above sketches, is the same of Twentieth Century achievements.

Abundantly lighted, day and night; perfectly ventilated; symmetrically heated and provided with every detail of the most exquisite sanitation.

Heavily beamed and paneled ceilings of stucco and cement, with old ivory finish, bespangled with myriads of electric lights, sustained by a score of massive pillars on marble pedestals. Freecord walls, Italian marble wainscoting, tile floors, solid mahogany woodwork, mantels and furniture, decorated glass skylights, plate glass partitions, open fire-places of ornate and beautiful design.

All these have been brought together in harmonious relations by two years' labor of skilled architects and artists.

## SECOND ZEMSTVO CONVENTION.

Opens in Moscow and Discusses New Governmental Organization for Russia.

PROJECT WAS WELL RECEIVED.

Deliberations to be Subject to Broadest Publicity—Freedom of Speech And Press Declared For.

Moscow, May 5.—The most ambitious and thorough project of the new governmental organization contemplated by the receipt of March 3, namely, a popular assembly, is being discussed by the second great zemstvo convention, which opened here today.

The first day was devoted to explanations and familiarizing members with various details of the program, making clear points in doubt. The project was exceedingly well received by the delegates and probably will be adopted in its main lines by the congress.

It is noticeable that the program confines itself entirely to the proposed representative assembly, not mentioning the executive, the intention being to avoid any attempt at definition or limitation of the powers of the emperor.

Those beginning the discussion of the project the members adopted a resolution favoring participation by the people in the work of the Boulikan commission, only if the popular representatives are elected and not selected, and are given an equal voice with the government representatives.

It was also resolved that the deliberations of the commission should be subject to the broadest publicity and that as a necessary preliminary to any satisfactory result the abolition of martial law and the establishment of the right of assembly, free expression of thought by word and press should be declared.

PLAN OF THE CONGRESS.

Moscow, May 6.—The December zemstvo congress at St. Petersburg attracted great attention on account of the drawing up of a bill of rights starting the Russian bureaucracy-ridden state and ending, followed by many bodies since, but the second zemstvo congress, which has just assembled here, is expected to play the part of a constitutional convention and to formulate the long deferred constitution of the empire. Its decision will have weight with representatives of the congress, as the congress is composed of 132 delegates from all parts of the empire, and the government and the Boulikan commission may be expected to meet privately, no permission having been given, and representatives of the press, generally, are excluded; but the following complete outline of the project is given:

The proposal contemplates a body consisting first of a house of popular representatives elected directly on the basis of universal manhood suffrage, and second, a house of zemstvos, or county, the members being chosen by provincial zemstvos and municipal assemblies, the two houses to be co-ordinate. The franchise for the house of

## PRESIDENT'S HUNT.

Though Gone All Day He Got Nothing.

Glenwood Springs, Colo., May 5.—Ice-coated mountains, with their slippery trails, could not keep the president away from today. At noon the clouds lifted and the snow and rain which have fallen continuously for four days ceased falling. With the first appearance of the sun the parties started out. The search was continued until dark, it was unsuccessful.

An early start will be made tomorrow, and the president hopes to get one more bear. He has not been discouraged by the bad weather. His health has been excellent and the wild country has been a good day for the chase. The most will be made of it, and the arrival at Glenwood Springs delayed until tomorrow. With that in view, the president will be started from camp early tomorrow.

## NO ALARM SENT IN.

Chicago Crowd Let Fire in Peabody Coal Co. Yard Burn.

Chicago, May 5.—Fire tonight broke out in the coal yard of the Peabody Coal company, at the intersection of Twenty-eighth street and the Pennsylvania railroad. The damage was but slight, however, the total loss being not over \$200.

The flames were first discovered by the engineer of a passing locomotive, who sounded the alarm. A large crowd soon gathered, but none of the people could turn in an alarm through a fire box, because of the feeling against the Peabody company, which is a strong factor in the teamsters' strike.

The blaze was seen from a distance by a policeman, who notified the fire department. The police declared that the fire was caused by an incendiary, but they had no direct proof to offer of that fact.

## HOCH'S TRIAL.

He Courted the Cook When His Wife Was Away.

Chicago, May 5.—Testimony as to Johann Hoch's relations with his sister-in-law, Mrs. Fischer, while his wife, Marie, was away, was given today by Miss Gusie Hoelzapfel, the trained nurse who at-

tended Mrs. Hoch until a few days before Mrs. Hoch's death. Miss Hoelzapfel was called by the prosecution to testify against Hoch, who is on trial before Judge Kersten, charged with wife murder.

Notwithstanding Hoch's apparent affection for his wife, Miss Hoelzapfel said that he had spent most of his time in the kitchen with Mrs. Fischer, whenever his sister-in-law was at the house. Miss Hoelzapfel said that she had demonstrated with Hoch, had told him that his wife was jealous, and after that he spent more time in the sick room and less in the kitchen. The nurse said that she had given injections to Mrs. Hoch by order of Dr. Reese. Witness admitted giving cocaine to Mrs. Hoch on three occasions when the patient had passed a sleepless night.

Hoch showed signs of the severe strain which he is undergoing, and was very restless during the first part of today's court session.

## Criminal Law Reform in China.

New York, May 4.—A recent memorial presented by Wu Ting Fang, former minister at Washington, has just been confirmed by the cabinet. The proposal of the memorial is to abolish the punishment of whipping, and to substitute imprisonment with hard labor as substituted for minor offenses.

Young offenders will be confined separately from criminals and will be taught some trade. Prisoners will be fed by the government. The memorial refers to American and European laws, showing the bad results of whipping and the great improvement due to lighter punishments and the employment of prisoners at useful tasks.

## Striking Miners on the March.

Elmira, N. Y., May 6.—The striking miners of Morris Run, Pa., and sympathizers from Blossburg 1,000 strong, and marched to the other mining towns. A band accompanied the marchers, and another large number of the imported miners agreed to lay down their arms and shovels. It is reported from Morris Run, that Mother Jones is on her way to that place to help the strikers.

## Investigating Tobacco Trust.

New York, May 6.—The federal grand jury today has been investigating a secret investigation into tobacco affairs concerning the American Tobacco company and its subsidiary companies. The investigation is being made by Henry W. Taft, brother of the secretary of war, who has been appointed a special assistant United States attorney for that particular purpose. Mr. Taft is authorized for the statement that the investigation is being conducted under the provisions of the anti-trust law.

## Premier Tissa to Fight a Duel.

Budapest, May 6.—A duel between Premier Tissa and a member of the opposition, Herr Pozsgay, will be an outcome of a stormy debate in the lower house of the Hungarian diet. Premier Tissa had bitterly assailed the demand for the extradition of the Hungarian diet. The premier was interrupted by the leading orator of the opposition, who said it was "beyond patience that a fallen premier should speak with such insolence."

An uproar ensued, and the sitting was suspended. Afterward Count Tissa sent his records to Herr Pozsgay.

## Restrained from Picketing.

San Francisco, May 6.—J. D. Sprackles and brothers have obtained an order from United States Circuit Judge Morrow, restraining the Hagers and Stevedores' union from picketing their vessels, intimating their non-union employees or in any way interfering with the loading or unloading of vessels consigned to the sugar firm. The complaint filed in the circuit court alleges that the action of the stevedores and riggers in going on strike is in violation of the interstate commerce law.

Tonight dancing, Saltair, 8 o'clock.

## CONFERENCE OF EPISCOPALIANS.

Relation of Church to Other Denominations a Feature of the Discussion.

LOVELESS UNIONS DEGRADING.

So Declares Bishop Moreland in Speaking to the Subject, "Woman's Place and Work."

At yesterday's session of the Episcopal conference the various problems attracting attention in the seventh missionary district were broadly discussed, with Bishop Nichols of San Francisco presiding. The bishop is a most excellent presiding officer. He is quick, goes right to the point, and knows just when, where and how to do a thing. No time is lost when Bishop Nichols is in the chair. The question of the best means and methods in raising money for missionary work in the church was discussed, and in connection with this the developing of self help was brought out.

Then the relation of the Episcopal church to the other denominations in the Protestant communion was given considerable prominence. The conference agreed on a spirit of kindness in interpreting and in the church and the necessity of proceeding in the spirit of love and harmony, and the avoidance of anything suggestive of carping and criticism. The relation of the church to the world was also discussed, and the necessity of the church being in the front of the world in the development of self help was brought out.

The Ladies' Guild of the two Episcopal churches set a beautiful lunch in the basement of the cathedral for the noon lunch, and the rest was done justice to. In the afternoon, a women's mass meeting was held in the cathedral, and the discussion included the position and influence of women in the church, and in the institution connected with the church work. Much interest is being shown in this department of religious effort.

Dean Hink of Boise arrived this morning and is taking part in the exercises of the day. A mass meeting for men will be held this evening, in St. Paul's church where the work of the Brotherhood of St. Andrew will be taken up and discussed. The entire Episcopal community in this city and state is deeply interested in the proceedings of the conference.

## WOMAN'S PLACE AND WORK.

Bishop Moreland of Sacramento made, in connection with this subject, an address on "Woman's Place and Work." In this connection, he said: "The home is the unit and germ of the church, and the source must be kept clear. Too much stress in this connection cannot be laid on the subject of seriousness in marriage. The woman should be the wife, mother and maker of the home. A call to matrimony is as a call to the church, and should not be entered into lightly. Women should be patient and not hasten at the first provocation to seek redress from the courts. Something is due their homes, their children and their country. Loveless marriages are the degradation of womanhood just as sure as

the secret of a happy marriage is being united in the Lord. The Christian mother should preside over the home; it is a kingdom of which she is the queen. She should be the confidant of her daughters, the inspiration of her sons and the counselor of her husband. Leave the woman in the home and she will do more than in all other fields combined. She will keep her husband straight and lead her children in the straight and narrow path. The happy home depends more on the woman than on the man, but I am afraid that we will soon have to change the old phrase, 'God bless the home' to 'God bless the apartment.'"

The speaker was not in favor of apartment house life, and instead urged the cottage that a young couple can call their own. He also deplored the increase in divorces in the United States which in 34 years have amounted to 700,000.

## NEW BISHOP NAMED.

Elder Frank Stanley Called to Preside Over Twenty-Sixth Ward.

A change was made last evening in the Bishopric of the Twenty-sixth ward, made necessary by the departure in the near future of Bishop Lewis Hoagland, to take charge of the New Zealand mission. He was honorably released from his duties in the Bishopric, as were also his counselors, Don C. Rushton and Joshua E. Salisbury, the latter having removed to Idaho.

The meeting was attended by Elder George A. Smith, of the council of the Apostles, the presidency of the Pioneer stake, and a large number of the Saints. At it Elder Frank Stanley was chosen Bishop, with Don C. Rushton as first and George D. Bennett as second counselors. They were unanimously sustained by the congregation, and were ordained and set apart during the meeting.

After the services a reception was held in honor of the retiring Bishopric and of their successors. Refreshments were served, and an evening of pleasure was enjoyed by all present.

The new Bishop was formerly a member of the High Council, while Elder Bennett, his second counselor, has been state secretary and treasurer of the Y. M. M. I. A.
