

Can Consumption be Cured?

DENVER, Col., May 23.

To the Editor of the Chicago Tribune:

SIR: Under the above caption, I trust you will grant me space in your wide-spread journal for the benefit of your consumptive readers, to whom, I doubt not, you are a friend; and, I am sure, if anyone is in need of friendship, sympathy, and encouragement, it is the consumptive invalid. I wish to make known the prescription and hygienic rules that have restored me from the second stage of tubercular consumption to the enjoyment of perfect health. There are also other cases I could cite, that have been restored by the same means; among the number is a niece of mine, residing in Vermont, who had all the symptoms of the advanced stage of pulmonary disease, such as hectic fever, cough, emaciation, and purulent expectoration, and who is now well, and enjoys uninterrupted good health. As I wish to be as brief as possible, I will not trouble you with a history of my own case, but will merely say that all my friends who knew my condition regard it as a most remarkable cure. I do not wish to hold out vain hopes to the invalid, but, from observation in my own case and many others, I would advise all consumptives of both sexes to give this method of treatment a trial and I trust it may prove as efficacious as in my own case.

I obtained the prescription from a gentleman who had been cured of consumption and asthma, by its use during a residence at Guayaquil, Ecuador. The prescription is as follows:

Cundurango bark, one ounce.
Extract Carrogeen (sea moss), one-half ounce.
Calisaya bark, one-half ounce.
Podophyllin (Mandrake), 20 grains.
Powdered horse-radish, one-half ounce.
Port wine, one pint.

The dose is a teaspoonful in a little water, half an hour before each meal.

The following instructions should govern invalids: Take outdoor exercise. Live in the open air, exposed to the sun light, and dress in light colors,—the nearer white, the better; this is important. Take deep in relations of pure air, moderately at first, but latterly from three to five times per day, five minutes at a time; this will, in time, expand the chest and lungs. Do not despond; be hopeful. Eat plenty of good, nourishing food. Take a bath daily in cool or tepid water. Avoid night air and damp weather.

The climate of Colorado has great repute as a resort for invalids. The air is pure and dry,—very little rain falling, and thus being almost perpetual sunshine. There is no fever and ague or damp night air known here. Thousands, it is said, whose cases were considered hopeless, have here found permanent and gratifying relief, and those who come in the early stages of the disease generally get well. The altitude outside of the mountains varies from 4,000 to 8,000 feet above the level of the sea. Consumptives coming to Colorado should seek the lower altitudes at the start.

MRS. MARTHA SOMERBY.
Chicago Tribune.

Didn't Want Much.

"Waiter" the waiter replied, "Sir?" "Waiter, I am a man of few words, and don't like to be continually ringing the bell, and disturbing the house; I'll thank you to pay attention to what I say, and to remember that although there are three ways of doing things, I like only one way in those who have subordinate stations and minds. In the first place bring me a glass of brandy and water (cold), with a little sugar, and also a teaspoon; wipe down this table, throw some coals on the fire, and sweep down the hearth; bring me in some candles, pen, ink and paper, some water and a little sealing-wax; tell the hostler to take care of my horse, dress him well, stop his feet, and let me know when he is ready to feed; order the chambermaid to prepare me a good bed, take care that the sheets are well aired, a clean night cap, and a glass of water in the room; send the boots with a pair of slippers that I can walk to the stable in; tell him I must have my boots cleaned and brought into the room to-night, and that I shall want to be called at five o'clock in the morning. Ask your mistress what I can have for supper; tell her I should like a roast duck, or something of that sort; tell your master to step in, I want to ask him a few questions; he is in the inter-

est of the Liberals, I believe, and so much the better, for I have a friend who will stand for the town at the next vacancy; send me all the directions; change this five shillings worth of stamps into coin; none of the silver to be worn; when does the mail arrive with the letters, and what time in the afternoon does the mail leave? Are there any soldiers quartered in the town, and how many? Just tell me what time it is by the clock on the landing, and leave the room." This portrait is from life.

An Interesting Sight.

"We have seen," says a writer, "from two to six great hearty boys sitting by the kitchen stove, toasting their feet and cracking jokes, while their mother, a slender woman, has gone to the wood pile for wood, to the well for water, or to the meat house for frozen steak for breakfast. This is not as it should be.

There is much work about the house too hard for a woman; heavy lifting, hard extra steps, which should be done by those more able. Boys, don't let your mother do it all, especially if she is a feeble woman. Dull, prosy housework is irksome at the best. It is long work, too, it being impossible to tell when it is done; and then, on the morrow, the whole is to be gone over with again. There is more of it than one is apt to think.

We wish some busy, all-day housekeeper, the arrangement of whose house is about as inconvenient as it can be, a not uncommon state of things, would count her steps taken in one day, and let us have the result in miles; let it be noted how many times from the stove to the wood pile, to the pump, and up and down stairs, and especially how many times from the stove to the buttery."

We know a mother of seven "great hearty boys," who will say, "It wasn't my boys, this writer saw toasting their feet, etc., while their mother went to the wood pile for wood."

We think most of those boys ever regarded it as a duty and a pleasure to help lighten the burden, and save the steps of that dear mother. And now she is old, the thought of it is a source of comfort to her and to them. And we trust the above exhortation will lead all our young friends to be ready to help and comfort their mothers.—*Well Spring.*

A lady in Clinton, Iowa, gave a burglar a very severe flogging with a dust-brush the other night. She said she wouldn't have done it if she hadn't been under the impression that it was her husband just getting home.

WANTED

FIFTY COAL MINERS.

At the Mines of the Wyoming Coal and Mining Company, Rock Springs, W. T. Men with families preferred. Apply at the Mines to W. H. MELLOR.

140,000

SINGER SEWING MACHINES

WERE SOLD DURING THE PAST YEAR.—Scientific American, June 10, 1871

The Singer Manufacturing Company,

AT THE

WORLD'S FAIR,

Constituted by the homes of the people,

Received the Great Award of the Highest Sales! and have left all Rivals far behind them! As the following article shows:

"SEWING MACHINE SALES FOR 1870.

The magnitude to which the manufacture of sewing machines has attained is shown by the "SWORN" returns (to which anyone can have access) of the manufacturers for the year 1870 to the owners of the leading patents, on which they pay a royalty. According to these returns the number of machines sold by each manufacturer in 1870 is as follows:

The Singer Manufacturing Company.....	127,831.....	Difference.
Wheeler & Wilson Manufacturing Company.....	81,203.....	44,628
Howe Machine Company.....	75,156.....	52,677
Grover & Baker Sewing Machine Company.....	57,402.....	70,431
Weed Sewing Machine Company.....	35,002.....	92,831
Wileox & Gibbs Sewing Machine Company.....	28,890.....	98,943
American Buttonhole & Overseaming Company.....	14,571.....	113,260
Florence Sewing Machine Company.....	17,660.....	110,173
Gold Medal Sewing Machine Company.....	8,912.....	118,921
Aetna Sewing Machine Company.....	5,808.....	122,027
Empire Sewing Machine Company.....	3,560.....	124,273
Finkle & Lyon Manufacturing Company.....	2,420.....	125,453
Parham Sewing Machine Company.....	1,765.....	126,067
Wilson.....	510.....	127,333

And several other Companies who sold a few Machines.

It will be seen by this table that the popularity of the Singer Machines far exceeds that of all others, their sale being one-half greater than even that of the famous "Wheeler & Wilson" Machine. This is owing to the fact that the Singer Company have lately commenced making, besides their old and well-established manufacturing machine, what is known as their "New Family Machine," which is selling at the rate of nine to one better than the old style. Their total sales for 1869 were 86,781 machines against the 127,831 of 1870, showing an increase of one half in the latter year.—*New York Sun.*

The total Sales of "Singer" Machines are very nearly

THREE QUARTERS OF A MILLION!!!

Two Thirds of which were Sold within the Last Three Years, and all are in SUCCESSFUL DAILY USE!

And still there are Agents, for even the poorest Machines, who persist, in the most "unblushing manner," in decrying ours, as if it were possible for the "Overwhelming and Rapidly Increasing Majorities of Singer Purchasers" to be mistaken.

We are not so vain as to suppose that these large sales are due to superior business capacity so much as to the superior merits of the Singer Machines, as well as the

OBSERVATION OF THOSE WHO BUY AND USE,

And are personally interested in comparing the merits of the different Machines before making a selection.

THE

'NEW FAMILY SINGER' SEWING MACHINE,

WITH ATTACHMENTS FOR ALL KINDS OF WORK.

We claim and can show is the cheapest, most beautiful, delicately arranged, nicely adjusted, easily operated, and smoothly running of all the Family Sewing Machines. It is remarkable not only for the range and variety of its sewing, but also for the variety and different kinds of texture which it will sew with equal facility and perfection, using silk twist linen or cotton thread, fine or coarse, making the INE LOCKED-ELASTIC STITCH, alike on both sides of fabric sewn.

The only STITCH that is Universally Approved, or is at all adapted to FIRST-CLASS WORK.

Thus, beaver cloth, or leather may be sewn with great strength and uniformity of stitch, and, in a moment, this willing and never-wearying instrument may be adjusted, even by a child, for fine work on gauze or gossamer tissue, or the tucking of tarlatan, or ruffling, or almost any other work which delicate fingers have been known to perform.

All Machines Sold Guaranteed to give Entire Satisfaction!

Terms to Suit All!

OTHER MACHINES THOROUGHLY REPAIRED AT REASONABLE RATES!

WE MAKE NO CHARGE FOR CARTAGE WITHIN SALT LAKE CITY!

BEWARE of Spurious Needles, Poor Silk, Twist, Linen and Cotton Thread, Bad Oil, etc., Which may render the Best Machine Useless. The Singer

Company manufacture their own Needles, Silk and Twist; furnish

Linen and Cotton Thread and Oil—all of Superior Quality—

but which can be relied on only when obtained through their

Principal or Branch Offices.

THE SINGER COMPANY have, for the past three years, been unable to supply the demand for their machines, though much has been done to increase their manufacturing facilities. Much more is being done at home and abroad in enlarging their present manufacturing, building new ones, availing of the best machinery, and the services of the most skillful artisans, in the hope of being able to accept propositions for agencies, where such are not already established, though they are now tolerably well represented throughout the civilized world.

Be Sure to get the Best. Before you Purchase be sure to see the "Singer" at the Central General Agency, Singer Sewing Machine Depot 2. C. M. L., EAST TEMPLE ST., second door South of Eagle Emporium, SALT LAKE CITY.
