## Compelled by Circumstances.

HAT is what the makers of bicycles write when they say that their new wheels will be lighter for '05. The "circumstances" mean just this: "The STRAENS that superb road wheel, that strong wheel with lines of beauty and grace in every detail; the wheel that has passed the experimental stage and demonstrated to the whole world that one maker at least knows how to give us a road wheel, has compelled the other makers to write their trade that they will have 20 pound road wheels for '05." Only one year behind the STRAENS with their promise. Can they do it? Naturally, can they make a road wheel that will stand up? They said it couldn't be done. That they couldn't do it, and posthumously the STRAENS, saying it wouldn't stand up, but it did. Now, we don't think conditions have changed with them. We believe they will fail. We don't think they know how to so handle their materials as to make the light wheels that will stand road work, and we believe their promise will be a barren one, just as their statements that their wheels were 20 pounds this year were not true, their so-called 20 pound wheels actually weighing 25 pounds.

A lady said to the writer: "I have been riding a wheel, built like a watch, and what do you think it weighs? I was told it weighed 20 pounds and it actually weighed on the scale at the Salt Lake Hardware Co., store 25 pounds. What do you think of that?" We didn't dare to think. Our think machine had stopped running.

TRY THE STRAENS. TRY THE GENDRON. We have a sample of the '05 GRIENT, 25-26-27-28.
