VERY LEARNED STATEMENT

Testified to Finding No Vein Outcropping on Mammoth Lot 35-Places Apex in Grand Central Ground.

Upon resumption of the Grand Central-Mammoth mining case at ness and heart trouble. Mr. Hayden Nephi yesterday morning, Prof. Walter was a director in many railroad com- P, Jenney was put upon the stand by the Grand Central. The professor is

a noted expert and mining engineer, Chicago, Dec. 7 .- According to West-ern raliway officials, the flow of travel Tintic mining district. It will be re-Chicago and the East toward the membered that he was the chief witness in the noted trial between the Bullion-Beck and the Eureka Hill some nitien years and the European and some nitien years ago. Prof. Jenney testi-ned to having spent thirty-nine days upon the Grand Central-Mammoth ground which is in dispute and to having carefully examined the ground. His surface examination consisted in the additional trains to accommodate the examination of lot 58 from the south end of the claim to several hundred feet north of the 1,100 foot line. He stated that he had found a vein under-ground, which was a form of fissure

the vein, but said that. In some cases the vein was a true fissue. He had found two fissures along the line of the ore in the Grand Central workings from Hill, wyo, as prices. It is said that the telegraph operators employed by the Santa Fe on its lines west of Albuquerque are preparing to strike The Oregon Short Line is installing The Oregon Short Line is installing

the beds were curving to the east, the strike of the beds north of this point being south from 30 to 40degrees east. Northerly and southerly from the point of connecting. The strike, he said, was north about 70 degrees west. This was also the case in the deepest workings in the disputed territory. The bounding fissues on the 700 level

of the Silveropolls ground were about of the Silveropolls ground were about 25 feet apart, between these the ore bodies were found. He was of the opinion that the ore past continuously The advancement of H. H. Shepard to through the dyke from the Cunnings-the position of general western freight ham stope at the south end of the

Grand Central. Generally speaking, there was a set of fissures running through the terri-tory on the Fin tunnel level, with another fissure running up from the 800-foot level in the Grand Central.

He found another fissure bending westward, which indicated a bend in the vein further north. He said that further south the ore was deposited in a set of rudely formed fissures crossing north and south nearly, and going down into the ground almost verti-

Those who always want the best are the sort of people who use Three Crown Baking Powder. It is better than others and saves you money at the same time.
