STOCKS WERE IN GOOD DEMAND

on the Exchange.

NORTHERN LIGHT WEAKER.

Mirtha Washington Stronger - Star Con. Active-Grand Central Firm -Dalton & Lark Higher.

The mining stock market was in good form today with prices generally showing much firmness. Some of the stocks traded in were much stronger than they were yesterday. This is especially true of Lower Mammoth, which opened at \$4.10% and sold up to 4.25. Grand Central moved up to 7.221/2, while Con. Mercur, which has been languishing around 3.20 for some time past, astonished everyone by seiling up to 3.30. Ajax dropped 300 shares at 1.05% at the outset and afterwards sold up to 1.06%. Daly hung around 2.04, while Dalton & Lark sold up to 7. Eagle & Blue Bell moved up to 83. Mammoth sold down to 2.41, and May Day was a ititle weaker at 55. Northern Light declined to 9, while Sacramento advanced to 43. Sliver Shield opened at 9% and closed at 9%. Star Con. was in good demand at fluctuating prices. From 71 the stock weakened to 67% and afterwards sold up to 701/2. Tesora was weaker today while Ben Butler was stronger. Joe Bowers was very active, as was Martha Washington, which opened at 181/2 and declined to 171/2. Yankee Con. was practically unchanged.

BULLION FROM CENTURY MINE.

Lower Mammoth Jumped to \$4.25 E. L. Godbe Gives an Interesting Account of the Property.

NEW DEVELOPMENTS MADE.

New Strike in Century Vein - Immense Copper Deposit in San Juan County-Oil in Wyomings

Mr. E. L. Godbe came down from the Century mine in Park Valley last evening with a bar of gold bullion and a consignment of gold eyanides weighing 110 pounds. The gold builton was retorted by Percy Williams, who is now in charge of the mill, and is reported to be the finest looking bar ever produced at the mine. The value is said to be a little over \$2,000, With the future of the Park Valley

district Mr. Godbe is profoundly impressed. The camp in his opinion is destined to come prominently to the front this summer, when it is not improbable that the Century may be paying dividends. If it clears \$3,000 per onth from a small mill handling about tons of ore per day it is quite easy figure out the profits when the ore treated shall be increased to 45 tons In a brief description of the property, Mr. Godbe says it is opened by a tunnel which cuts three veins, which are named the Copper, July and Lizzle veins. The Copper vein contains a streak of ore which runs about \$5 per . In an upraise from the tunnel on second or July vein a fine body of ore was recently encountered which is about 4 feet wide and assays from \$5 to \$25 per ton in gold. The principal developments are seen in the Lizzie vein which has been opened up by drifts about 100 feet long. At one end of this

vein is sometimes about 12 feet wide, and it has never been found to be less than 21/2 feet wide.

The management has just started to drift on the Century vein at a point about 1,000 feet distant from the mill. Although the tunnel is not in any great distance Mr. Godbe says 18 inches of ore is now in sight which runs as high as \$20 per ton, though the average is

drift a winze has been sunk in ore which shows fine average values. The

obably somewhat lower.
The average value of the ore milled is about \$15 per ton and about 75 per cent is saved on the plates, the cyanide plant being used to further secure the values until the full extraction is now a little over 90 per cent. Mr. Godbe has used his own invention in the cyanide plant. In this new arrangement which is being patented the ore in the leaching tank is saturated with the cyanide solution from the bottom of the tank. All the while the leaching going on the finely pulverized mass kept constantly agitated near the bottom of the tank. The slimes are The slimes are fere so little with the extraction that the inventor says he can save 97 per cent of the values. About 12 hours is cent of the values. About 12 hours is required to leach the ore, which then runs out of the tank itself, doing away with the shoveling required in other mills.

IMMENSE COPPER VEIN

Found by Messrs. Wilcox and Pratt in San Juan County.

Edward Wilcock and Alva Pratt came up from Escalante last evening with some very fine samples of copper ore and petroleum found in San Juan county. Mr. Wilcock is in the merchandise business at Escalante, but finds time to engage in prospecting for the precious metals and, in company with Mr. Pratt and others, he has located four clams, covering the apex of a big copper deposit about fifteen miles east of the Navahoe mountains. The vein, which has an average width of 12 feet, extends for about one-fourth of a mile on the surface. No work has been done further than sinking a few holes at intervals. All of them show a fine Edward Wilcock and Alva Pratt came further than sinking a few holes at intervals. All of them show a fine grade of copper ore for the above distance. What is said to be an average sample of the copper was brought to town to be assayed. It will run between 10 and 15 per cent copper, in the opinion of Assayer Bishop, who pro-nounces it a splendid leaching proposiwho protion, as it contains an abundance of silica. Mr. Wilcock says the Petosky

company, operating a leaching plant company, operating a leaching plant in the Buckskin mountains, has tested some of the ore and found it to be an ideal leaching ore. The claims are about 90 miles from Escalante, across the San Juan river. The location is about 90 miles distant from Defiance station on

Messrs, Wilcock and Pratt also brought some fine samples of petroleum from a new find near the San Juan river. In travelling they stopped to fiver. In travelling they stopped to drink of a stream which runs into the river, and which was found to be very strongly impregnated witht the flavor of coal oil. This led them to explore the head of the stream where they found about a quarter of an acre covered with a black mass of petroleum product. Some of the stuff was brought to town and it gives great was brought to town and it gives great prom important discoveries in that vicinity in the near future.

ORE IS WIDENING OUT. Thirty Inches of Ore on 350 Level

of Martha Washington. Advices received today from the Martha Washington of Tintic state that the strike on the 350-foot level of that property is growing larger. Yesterday there was about 20 inches of ore in sight, but A. E. Snow says that Superintendent Steven Baldwin reports 30 inches of good ore today. Assays have been received from the new find, but the management does not care to but the management does not care to disclose them. It is said, however, that the ore will be quite as good as any shipped from the property. This means that it will run about \$1,000 or \$1,100 per car. Meantime a force of eleven men are opening up the property. A station will soon be cut on the 550 level and work in halps reached on the 250 and work is being pushed on the 350 level. The men at the back of the present activity confidently predict that stock will go to 50 cents per share.

WYOMING OIL FIELDS.

Flow of Oil Increasing Daily in the Union Pacific Co's Artesian Well.

Since the Union Pacific company, in boring for water near the new coal camp in Ploneer Hollow, struck oll, there has been a stampede of people seeking claims in that locality and making filings in the office of the counclerk in this city, says the Evanston Wyo.) Press.

Within the past two weeks claims covering in the aggregate eight thousand acres of supposed oil land, have been filed. These claims are mostly taken up by associations of men in Omaha and in Salt Lake, though quite a number of claims have been recorded by residents of Evanston and vicinity. It has been known here for years that oil existed in this locality, Nearly thirty years ago, I. G. Fiero of this city, working in partnership with the late Judge Carter, the last named gentleman being at that time post trader at Fort Bridger, took out several barrels of petroleum which they converted into lubricating oil. Experienced parties now living here, who used this oil on machinery, declare that it was the very best lubricating oil ever used. Its wearing quality was phenomenal, and it

would never gum.

There is, no doubt, an immense body of petroleum in this locality awaiting development. Two gentlemen who came in from Pioneer Hollow yesterday morning report that the yield of petroleum oil from the artesian well which the Union Pacific company is sinking is increasing in quantity, every day. The pump is kept continually busy taking out the oil, and it is thought if the tools were taken out of the well that it would flow without any pumping. This the company does not want. They want to go much deeper. being intent upon finding water. They need the water in their new camp, and it is of more value to them then oil, However, if the flow of oil continues to they may be compelled abandon their intentions as to the oil.

MINING NOTES.

The Carisa of Tintic had 4 cars of ore on the market today. Samuel McIntyre went out to Mammoth last evening.

Eleven cars of ore were on the mar ket teday from the Grand Central of

Lower Mammoth of Tintic reached the market today with another

car of ore, A car of silver-lead ore was marketed

today from the Burning Moscow of Bingham.

The sulphide mill of the Taylor-Brunton sampling company is shut down for repairs.

The Taylor-Brunton sampler reported 16 cars of ore from Tintic today and 3 from Bingham.

The Annie Laurie of Gold Moutain has a 320-pound consignment of gold cyanides on the market.

A 30-ton lot of copper bullion from the Dixle copper mine near St. George was sold yesterday afternoon.

A small force is still at work at the Manhattan at Tintic, but no change is reported in the face of the tunnel, Ten cars of copper matte and 3 cars of crude ore were at the Taylor-Brun-

of steady Henry George Smokers.

Stateline, reports some fine looking copper ore being extracted in the O. K. property in Beaver Lake district.

A fabulously rich strike is reported in the Gold Sovereign of Cripple. Five inches of ore has been found at a depth of 120 feet, which assays as high as \$7,490 to the ton. The Boston News Bureau is authority

for the statement that the American Smelting and Refining company is ne-gotiating a five-year contract with the lead mines of the Coeur d'Alene dis-

It is stated that the Joe Bowers equipment, consisting of boilers, ennext Saturday morning to partially satlsfy the judgment against the com-pany. This will be followed by the sale of the mine next month if other arrangements are not made.

The Petosky company, whose properties are situated in the Buckmountains in northern Arizona, is the Buckskin leaching some copper though it does not expect to do much before spring where the pipe ime will be built. At present the pipe is snowed in some-where between the railroad and the

Assays were received late yesterday afternoon from a new discovery in the Silver Bell of Park City, which showed the presence of 55 per cent lead, 85 ounces silver, 8,8 per cent copper and \$5.78 in gold per ton. Secretary Sonnedecker reports about 4 inches of the above grade in a fissure, which was encountered about 367 feet from the f the tunnel.

MARKET STRONG, ACTIVE.

Big Demand for Railroads, Which Made Great Advances.

New Stocks Advanced Aggressively to Keep Alive the Speculative Interest - Some Reactions.

New York, March 19 .- Buying for the long account was resumed at the opening of business this morning and resulting gains were pronounced in various specialties and railroads. Missouri Pacific displayed exceptional strength, rising 21/4 to 981/4, and Burlington was 1% higher at 164%. St. Paul, Brooklyn Transit, Tobacco, Federal Steel, Rock Island, and Louisville were about a point higher. Erie was bought at from 33 to 34 as compared with 2314 last night.

Large purchases were made of all the prominent stocks and some of the issues which were under pressure at times yesterday were bought confidently. This was notably true of the coalers and some of the southwesterns. Louisville crossed par and the Vanderbilts, steel stocks and other market leaders showed buoyancy. Gains in the strong stocks were between 1 and 34, the preferred stocks of the Steel company leading. The New York public utilities suffered from profit taking, Manhattan falling below last night. Great Northern preferred fell 24 under last night. Sales to realize outwelched the new demand for most of the active stocks, and there were some distinct points of beaviness which affected the market. Persistent offers of the local gas group depressed them 1@2 points. The Burlington the Coalers, Vanderbilts and Tobacco were also sold. Dela ware & Hudson ran up 3% and reacted ely to keep alive the speculative interest. The Atchisons rose 1% and 1% respectively for the common and preferred, and some of the Steel stocks made further gains. Buying of Canadian Pacific, U. S. Express and the Pittsburg, Cincinnati and St. Louis stocks benefited them 2 to 5 points. Burlington rose to the highest point at 1000 m. There was sected speculation terest. The Atchisons rose 1% and 1% noon. There was excited speculation on the curb in the U. S. Steel stocks, the common selling 2% higher than last night at 44%, and the preferred 3% higher at 90%. There were reactions of over a point in each.

Bonds were moderately active and ir-

regular.

There was heavy selling to liquidate speculative profits during the last hour which carried prices of the strong active stocks down from 1 to 21/2, the latter Burlington. Some of the stocks which did not move up vigoruoley to-day were carried below last night's level. Manhattan sold 4½ under yesterday and Chicago & Eastern Illinois 5%, The Grangers, Pacifics, New York Central, the Eries the Southern Railways, Illinois Central and Louisville were all preprint in the sells of the solution. were all prominent in the selling. The steel stocks held comparatively firm. Room traders sold short on the decline and their buving to cover railled the market, the Erie recovering strongly. Profit taking was renewed on the advance and the closing was weak except

for the Steel stocks, many stocks selling at the lowest on the reaction. CLOSING STOCKS.

New York, March 19.-Closing stocks: Atchison, 60; do preferred, 94%; A. S. & W., 42%; do preferred, 104%; American Tobacco, 128; American Tin Plate, 69; do preferred 111; American S. H.,
