Mr. McIntyre Intimates that Regular Dividend Will be Paid.

Speculations are rife among the stock brokers today regarding the next Mam-moth dividend which it is expected will be posted tomorrow at the meeting of the directors. The stock depreciated today on the exchange owing in part, it is said, to the rumor that nothing more than a 5 cent dividend would be paid this month. Mr. McIntyre intimated when seen yesterday that the regular dividend would be paid on January 1st.

Forty Men this Winter. Thomas Kennelly is down from the

Red Cloud group of mines, says the Wood River Times, to complete prep-

covery in prices caused a falling off, but after a decline, and a succeeding The buy-5.40. inturn, they came in force, ng by shorts was also in large volume t such times. The avalanche of orders was so stead. orbed that the standard railroad tocks began to afford a point of resist. ance to decline. There were exceptions here and there, and Metropolitan, sugar People's gas and some of the iron and steel stocks, kept breaking through the line like a powerful football player try. ing for goal. Early in the second hour there appeared an appreciable decrease in activity, and the pressure was no longer so severe. The first quotations juickly demonstrated a violent specuative conflict. Immense buying orders had been distributed for the support of prices. The opening showed some gains in consequence, extending from 1 Flax-1.48%. to 5 points in a number of important specialties, including Tennessee coal, sugar, leather preferred, Continental to. pacco and Metropolitan steel railway. and of 1 to 5 points in standard rail-road stocks, the most conspicuous gains being in New York Central, St. Paul, Southern Railroad, Rock Island and Union Pacific. These advances were met, however, with a flood of selling orders which quickly drove prices down-ward. Sugar, St. Paul, Continental topacco, Metropolitan street railway and Union Pacific fell back from 1 to 4 points. A number of important stocks fell at the opening, including Federal steel, tobacco, Pennsylvania and Missouri Pacific, which showed losses from 1 to 2 polats. Violent irregularity was in evidence, in Brooklyn Transit, which vibrated within a range of about . points below last night's level. Tobacco rallied four points from its opening loss, but yielded again. A reacting tendency came general after the first few minutes of trading. Speculation was feverish, but there was an undertone of strength manifest throughout the divi-dend paying railroads. The downward 2.50@4.00. rush after the high opening forced prices down anywhere from 2 to points, Metropolitan street railway leading. Good buying then appeared, prices bounded up. American tobacco recovered nine. There were many conspicuously weak points, industrial spec-ialiles lacking support and giving way frequently. In the minor railway stocks specialties moved downward, notably the southwesterns and the coal shares. Hocking valley preferred sagged 31/2 At 11 o'clock the market, while quieter, was unsettled, but generally speaking, the internationals and grangers were fairly well held; while the ndustrial shares, except for a few of the high priced leaders, were being hammered energetically. Somes points of weakness in the second hour were the coalers, which dropped 1 to 2; Louisville, 1; Norfolk & Western pre-ferred, 1%; a group of the iron and steel stocks, including Federal steel, American hoop, American smelting and National steel, 1 to 2½; Missouri Pa-cific, 3, and People's gas, 4½. MINES

LEAVES FOR BOSTON.

Supt. J. W. Nelll of the United States

281/2 Mining Company Harriedly Summoned. It is rumored today that the Standard Oil people will shortly succeed the United States oil crowd at the head 27% of the Bingham property. Beyond the fact that the officers of the United Mining company have wired to this city for documents relating to the 411/2 properties' physical condition nothing is positively known at the local offices. Supertintendent J. W. Neill has completed an annual report of the mine's condition. With this report, which shows everything at the mine to be in first-class condition, Mr. Neill leaves 2% for the East tonight.

WEST MOUNTAIN PLACER.

Superintendent Dan Clays Says the Gravel

Shows Over \$15.00 per Yard. It is well known that the West Mountain Placer has yielded some far from

insignificant nuggets of pure gold. Mr. Dern has a tin box pretty well filled with the nuggets of the yellow metal. As a result of a small clean-up Super-1436 intendent Dan Clays came to town last 734night with 51% ounces of gold dust and some nuggets as big as the top of one's finger. This, it is stated, is the values contained in a little over six yards of gravel which gives on an average some thing over \$15.00 to the yard. The great underflow of water is now overcome, it is said, and before long the gold will be extracted from the pay streak, regarding which some express every confidence that it continues for a considerable distance down the canyon. If the values obtained by Mr. Clays are a fair 73% criterion by which to judge the West Mountain Placer should cause some-314 thing of a sensation in the near future.

CONGESTION CONTINUES.

Increased Ore Shipments Glut the Smelter -Vague Rumors of a New Smelter,

Mr. A. S. Dwight of the Denver branch of the American Smeller company's interests has visited Manager T. R. Jones of this division. The object of his visit is not learned, but it is thought to have reference to the increased ore output, which has congested at the smelters, until there is today over \$1,-000,000 worth of ore laying there which, from present indications, will likely increase to much more than that amount before it decreases. In other words, instead of the ore shipments falling off to any appreciable extent during the winter, it looks as if the stream of ore will flow as steady for the next four month as it has for the past few months. There has been some talk of another smelter being built in this val-ley. It is intimataed on what appears good authority that that thing has been talked of, but no steps have yet been taken in the matter. Manager Jones states that it is a matter for others to decide. It appears that the increased production of ore will make something "pop"

in this matter before many months pass overhead.

THE IRON DEPOSITS AGAIN.

It is Intimated that Important Deals are Now Pending.

O. M. Ladd of the Colorado Fuel and Iron company is in the city and has been in consultation with Col. S. B. Milner today. Just what is being considered, the colonel states he is not prepared to say at present. It was however, intimated that an important leal is being considered which relates to the iron and coal deposits of Iron county

Mr. Milner is known to be very enthuslastic over the prospects of wealth presented by the immense deposits of southern Utah. It is also known that R. B. Dear who is here from the Lake Superior iron mines and who has recently looked over the iron claims of Mr. Milner and associates in Iron county, is also much impressed with the

arations for the vigorous working the property all winter. He laid in supplies for fifteen men, but himself and associates are now convinced that they can keep between thirty and forty men at work all winter.

The compressed air pipe has caused much annoyance by constant freezing at night. But this annovance will cease as soon as a foot of snow gets on the ground. The mill will run all winter, and if

the roads can be kept open so as to get the ore to market, the property can be operated nearly as cheaply in winter as in summer. The lessees have had an immense

quantity of work to do in the mill, to the pipe line, and everywhere both on and below the surface. There was much more of this necessary than they had anticipated, but the developments have been so remunerative that they are perfectly satisfied with their venture.

Shipment from the Louise.

Ogden, Dec. 19 .- The management of the Louise mine at Willard reports everything going on smoothly and they have bought 500 ore sacks and expect to ship a car in the near future.

MINING NOTES.

Victor M. Clement has returned from California. Work will shortly be resumed at the Dixon mine at Bingham.

The Daly-West reported at the sampler today with five cars of ore.

Ed. Sheets is spending the week in

the vicinity of St. George. The Ontario reported at one of the samplers today with five cars of ore.

The Conklin sampler reported five cars of ore from the Park City today,

Five cars of ore were on the market today from Jesse Knight's Uncle Sam. A shipment of ore is expected shortly from the Valley View mine near Bellevue, Idaho.

A car of Glasgow & Western ore was marketed today from that company's Nevada property.

Walter G. Filer has returned from an examination of the Annie Laurie at Gold mountain.

J. E. Beveridge, late superintendent of the New Mammoth at Bingham, left for New York this evening.

Two cars of ore were marketed today from the Moniczuma of Bingham. A car also came in today from the Albino in that camp.

The Taylor-Brunton sampler reported five cars of ore from Tintic, five from Park City, three from Bingham and one from Nevada today.

Frank Y. Taylor has returned from a trip to southern Utah and reports a number of teams on the road hauling copper ore from the Grand Guich to Modena.

William H. Child, who recently acquired a large interest in the Puritan mine at Bingham has been admitted to membership on the Salt Lake Ex-

William O'Nelll is in the city from Vernal and reports much activity in mining in that district. A very favor-able showing is presented in his claims and those of the Vernal Copper Company in the Jesse Ewing canyon.

Boise Statesman: R. J. Anderson and S. L. Tipton, have returned from Salt Lake. Lindley Vinton, who went to Zion with them, has gone on to New The Checkmate deal, it is re-York. ported, has been practically closed up. The money for the first payment is expected here this week.

CLEARING HOUSE REPORT.

December 19, 1899. Today's clearings \$436,910.40 Same day last year 600,711.45

Fowards noon, it became known that the clearing house banks had agreed to provide an additional \$10,000,000 to lend in the market at the market rate, and the whole list surged up to above the opening level. The rally extended from 1 to 61/2 points

The changes in bonds were exceed. ingly irregular, some advancing sharply at some points, while at others akness was shown.

It became manifest as the day progressed that the pressure on liquidation was over. Additional supplies of money coming into the market forced the rate down to five per cent, and prices of stocks began to move upward buoyant-

Something like a panic among the bears developed, and in their eagerness to buy they bid up prices frantically on themselves. A throng of bargain hunters who had been eagerly watching for a turn in the market also absorbed large blocks of the standard railroad shares. The rebound in the speculative specialties was the most pronounced, Consolidated gas rising 15 points, Continental tobacco preferred 10, Continental tobacco common 51/2. Metropolitan, American tobacco 8; pressed steel car preferred and People's gas 7 each. The market became very animated on the advance, and the strength permeated all departments of the fist, and was

well maintained to the close. At 2:30 o'clock the statement was made that the government had made deposits in depositary banks aggregat.
