

Local and Other Matters.

FROM TUESDAY'S DAILY, JUNE 13.

In Jail.—George Stringam has been arrested and placed in jail, on a charge of obtaining money on false pretences.

A Bigamy Case.—This morning, in the District Court, a man named Lautensock was arraigned on an indictment for bigamy, and pleaded not guilty.

Arrived in England.—A private cablegram, dated at Birmingham, was received on Monday morning, from Hon. William Jennings, stating that himself and party had arrived there, all well.

A Good Work.—We have information to the effect that Elders David M. Stuart and Mathoni Pratt are laboring in Nauvoo and vicinity, meeting with encouraging success, preaching and baptizing.

The New Federal Court House.—It is expected that the Federal Court House will remove from the Cliff House to the proposed new quarters, in the Jennings building, west of the Emporium Corner, on or before the 21st inst.

Robbery.—On Saturday night a couple of men, masked and heavily armed, entered the store of Mr. Chapman, E. T. City, Tooele Co., ordered and received a quantity of whiskey and oysters, with which they marched off without payment.

Committed.—Yesterday, after preliminary examination, U. S. Commissioner Sprague committed Harker and Willis, the two men who robbed the Southern stage a couple of times lately, in Millard County, for trial in the First Judicial District Court.

Fined.—Mr. Parlin was fined \$10 this morning, for administering a thrashing to E. D. Tilton, which he paid.

The cause of the difficulty was that Tilton, who was in the employ of Parlin & Thompson, got intoxicated, and tipped over a vehicle, with a passenger in it.

Horse Thieves Abundant.—Horse thieves abound hereabout just now. By their depredations Mr. Luddington, of Sugar House Ward, on Saturday night lost a saddle and bridle, and Mr. Vaughn, of the same locality, had a couple of horses stolen, and another team was stolen from near the mouth of Parley's the same night.

Obsequies.—The obsequies of the late Elder David Day, of the firm of Day & Co., were conducted at the 14th Ward Assembly Rooms to-day, a large number of relatives and friends being in attendance, among the latter being representatives from nearly all the leading mercantile firms in the city. The remains were followed to the cemetery by a large cortege, consisting of twenty-one carriages.

Shot in the Head.—Saturday night J. McLaughlin, while in bed, in his cabin, at Bingham, received a shot in the back of his head, fired by a man named Sanders, from the outside. It is stated that the shot was fired recklessly, at random, and was not intended for the party struck by it, or for anybody else particularly.

The wounded man was brought to this city, and taken to the Catholic Hospital.

The Reynolds Case.—To-day the arguments in the Reynolds polygamy case, in the Supreme Court, on appeal from the District Court, were proceeded with, Messrs. Williams, Sheeks and Rawlins for the appellant, and Mr. Carey and probably Mr. Howard for the United States. The time of the court was almost exclusively engaged in hearing the argument of Mr. Rawlins this morning. The appellant presents eight points for the decision of the Supreme bench.

Missionaries at Queenstown.—T. G. writes from on board the S. S. *Wyoming*, off Queenstown, Ireland, 3 p. m. Friday, May 26, 1876, as follows—

"The company from Utah, who sailed on the S. S. *Wyoming*, from New York, May 16th, have traveled thus far in safety. Some few have been quite sea sick. A larger number felt decidedly queer, and some have enjoyed good health on the whole trip. Brother Neve has been a martyr to rheumatism during most of the voyage. Our accommodations have been somewhat insufficient, and hardly up to those promised when in New York,

but in connexion with a favorable voyage and the attention and kindness of our stewards we have fared very well.

"We expect to arrive in Liverpool to-morrow afternoon, Saturday, May 27th."

Unaccountable Absence.—Some concern has been felt by the friends of Bishop Joseph Horne, of Gunnison, and a couple of Scandinavian Elders, who left this city, for Europe, May 21st, purposing to sail on the same vessel as Mr. Jennings and party, and Mr. Thomas Williams and others, word having been received in this city that no tidings had been received of them at the steamer within an hour and a half of sailing time. Mr. John B. Meredith, who accompanied Bishop Horne and the two other Elders from this city, has written to the effect that the last he saw of them was after crossing the ferry to New York, when he observed a backman inducing them to get into his vehicle. We understand also that Elder Staines, aided by detectives, had been making search for them a day or two before the sailing of the vessel. It is possible they may have reached the steamer in time to sail with it, although news has not reached us to that effect.

Mormon Immigration.—The steamship *Nevada*, which arrived at this port yesterday from Liverpool, brought 126 Mormon immigrants, under the care of six elders. Most of these are mechanics, laborers, farmers, and factory girls, with some old people. They are not apparently from the lowest classes. There was one family from Edinburgh, and a few families from Dundee, Paisley and Glasgow; the greater part of the immigrants had been obtained from Birmingham and other large manufacturing towns in the midland counties of England, and also in Manchester, Leeds and London. Some had been gathered in the eastern counties and from among the farm laborers of the southwestern counties. At present there are about 6,000 Mormons in Great Britain, Ireland scarcely supplying any. In Scotland there are only about 800. Over 1,000 Mormons, chiefly from Scandinavia, Switzerland and North Germany, will leave Liverpool for Utah about the end of this month.—*N. Y. Tribune*, June 6.

Home Industry.—This morning we visited the new brick yard of Messrs. Morris & Evans, in the Fifth Ward, and found it one of the most complete manufactories of the kind in the West, their lately received and erected machinery placing competition in the line from outside markets beyond the pale of probability.

The machinery for the preparation of the material consists of a horizontal, high-pressure, twenty-five horse-power engine, a Howland crusher, and a Whipple and Storer pulverizer. By means of these the firebrick materials, fire-clay and silica, are rendered as fine as superfine flour, at the rate, if necessary, of from fourteen to fifteen tons a day.

This is a new use to which to put this class of machinery, but it is one to which it is admirably adapted, being much superior to that in general use in brick yards elsewhere. It was originally intended to be used for crushing ore, but the mining company formerly owning it, setting aside their original calculations, sold it to its present proprietors, and it has recently been constructed or put together, at the yard, by Mr. Dykes, an experienced engineer.

Everything else about the yard is in keeping in completeness with the machinery. By means of pipes from an adjacent well, the engine boiler and the large mixing vats are readily supplied with water. The sheds are 146 feet long and 65 feet wide, with plenty of ground to extend as much as may be necessary in future.

The erection of a new kiln has been commenced, and, in the meantime, to supply the pressing wants of customers, a quantity of brick will be burned at once, in a temporary "clamp."

Were it not for the high railroad rates between here and California, brick might be imported to that State; as it is, Californians have to import the article from England.

WHITEWARE.

For the lack of the necessary machinery, &c., past attempts to manufacture white ware, such as is produced in England, have failed. Brother Eardley, an experienced potter, having visited England

lately, took with him a sample of Utah clay, for the purpose of comparison, and found it was equal to the best used in Staffordshire, so the matter of suitable material is solved, and so is the matter of skill, for men such as the gentleman just named, his brother, and brothers Cartwright and Croxall, having, we believe, been reared in the business in Derbyshire, understand it thoroughly, and numbers of others skilled in the same line are scattered throughout the Territory. A part of the machinery, an important part at that, is here also, for preparing the material by pulverization. In view of these facts it is the intention of Messrs. Morris & Evans to take steps, as soon as practicable, with the aid of practicable men in the business, to commence that most important and might be profitable branch of home manufacture, and to this end the further machinery necessary will be procured.

GYPSUM.

The same firm have now within their reach the facilities for the utilization of the mountains of gypsum in Utah, by the manufacture from it of plaster of Paris, having at their yard the means of roasting it, the pulverizing machinery doing the balance, so that importation in that direction will cease. With this object in view some arrangements are in contemplation for the working of an immense gypsum claim, owned principally by Messrs. W. Jennings, W. H. Hooper and John Hague, in the vicinity of Nephi, Juab County.

LOST.

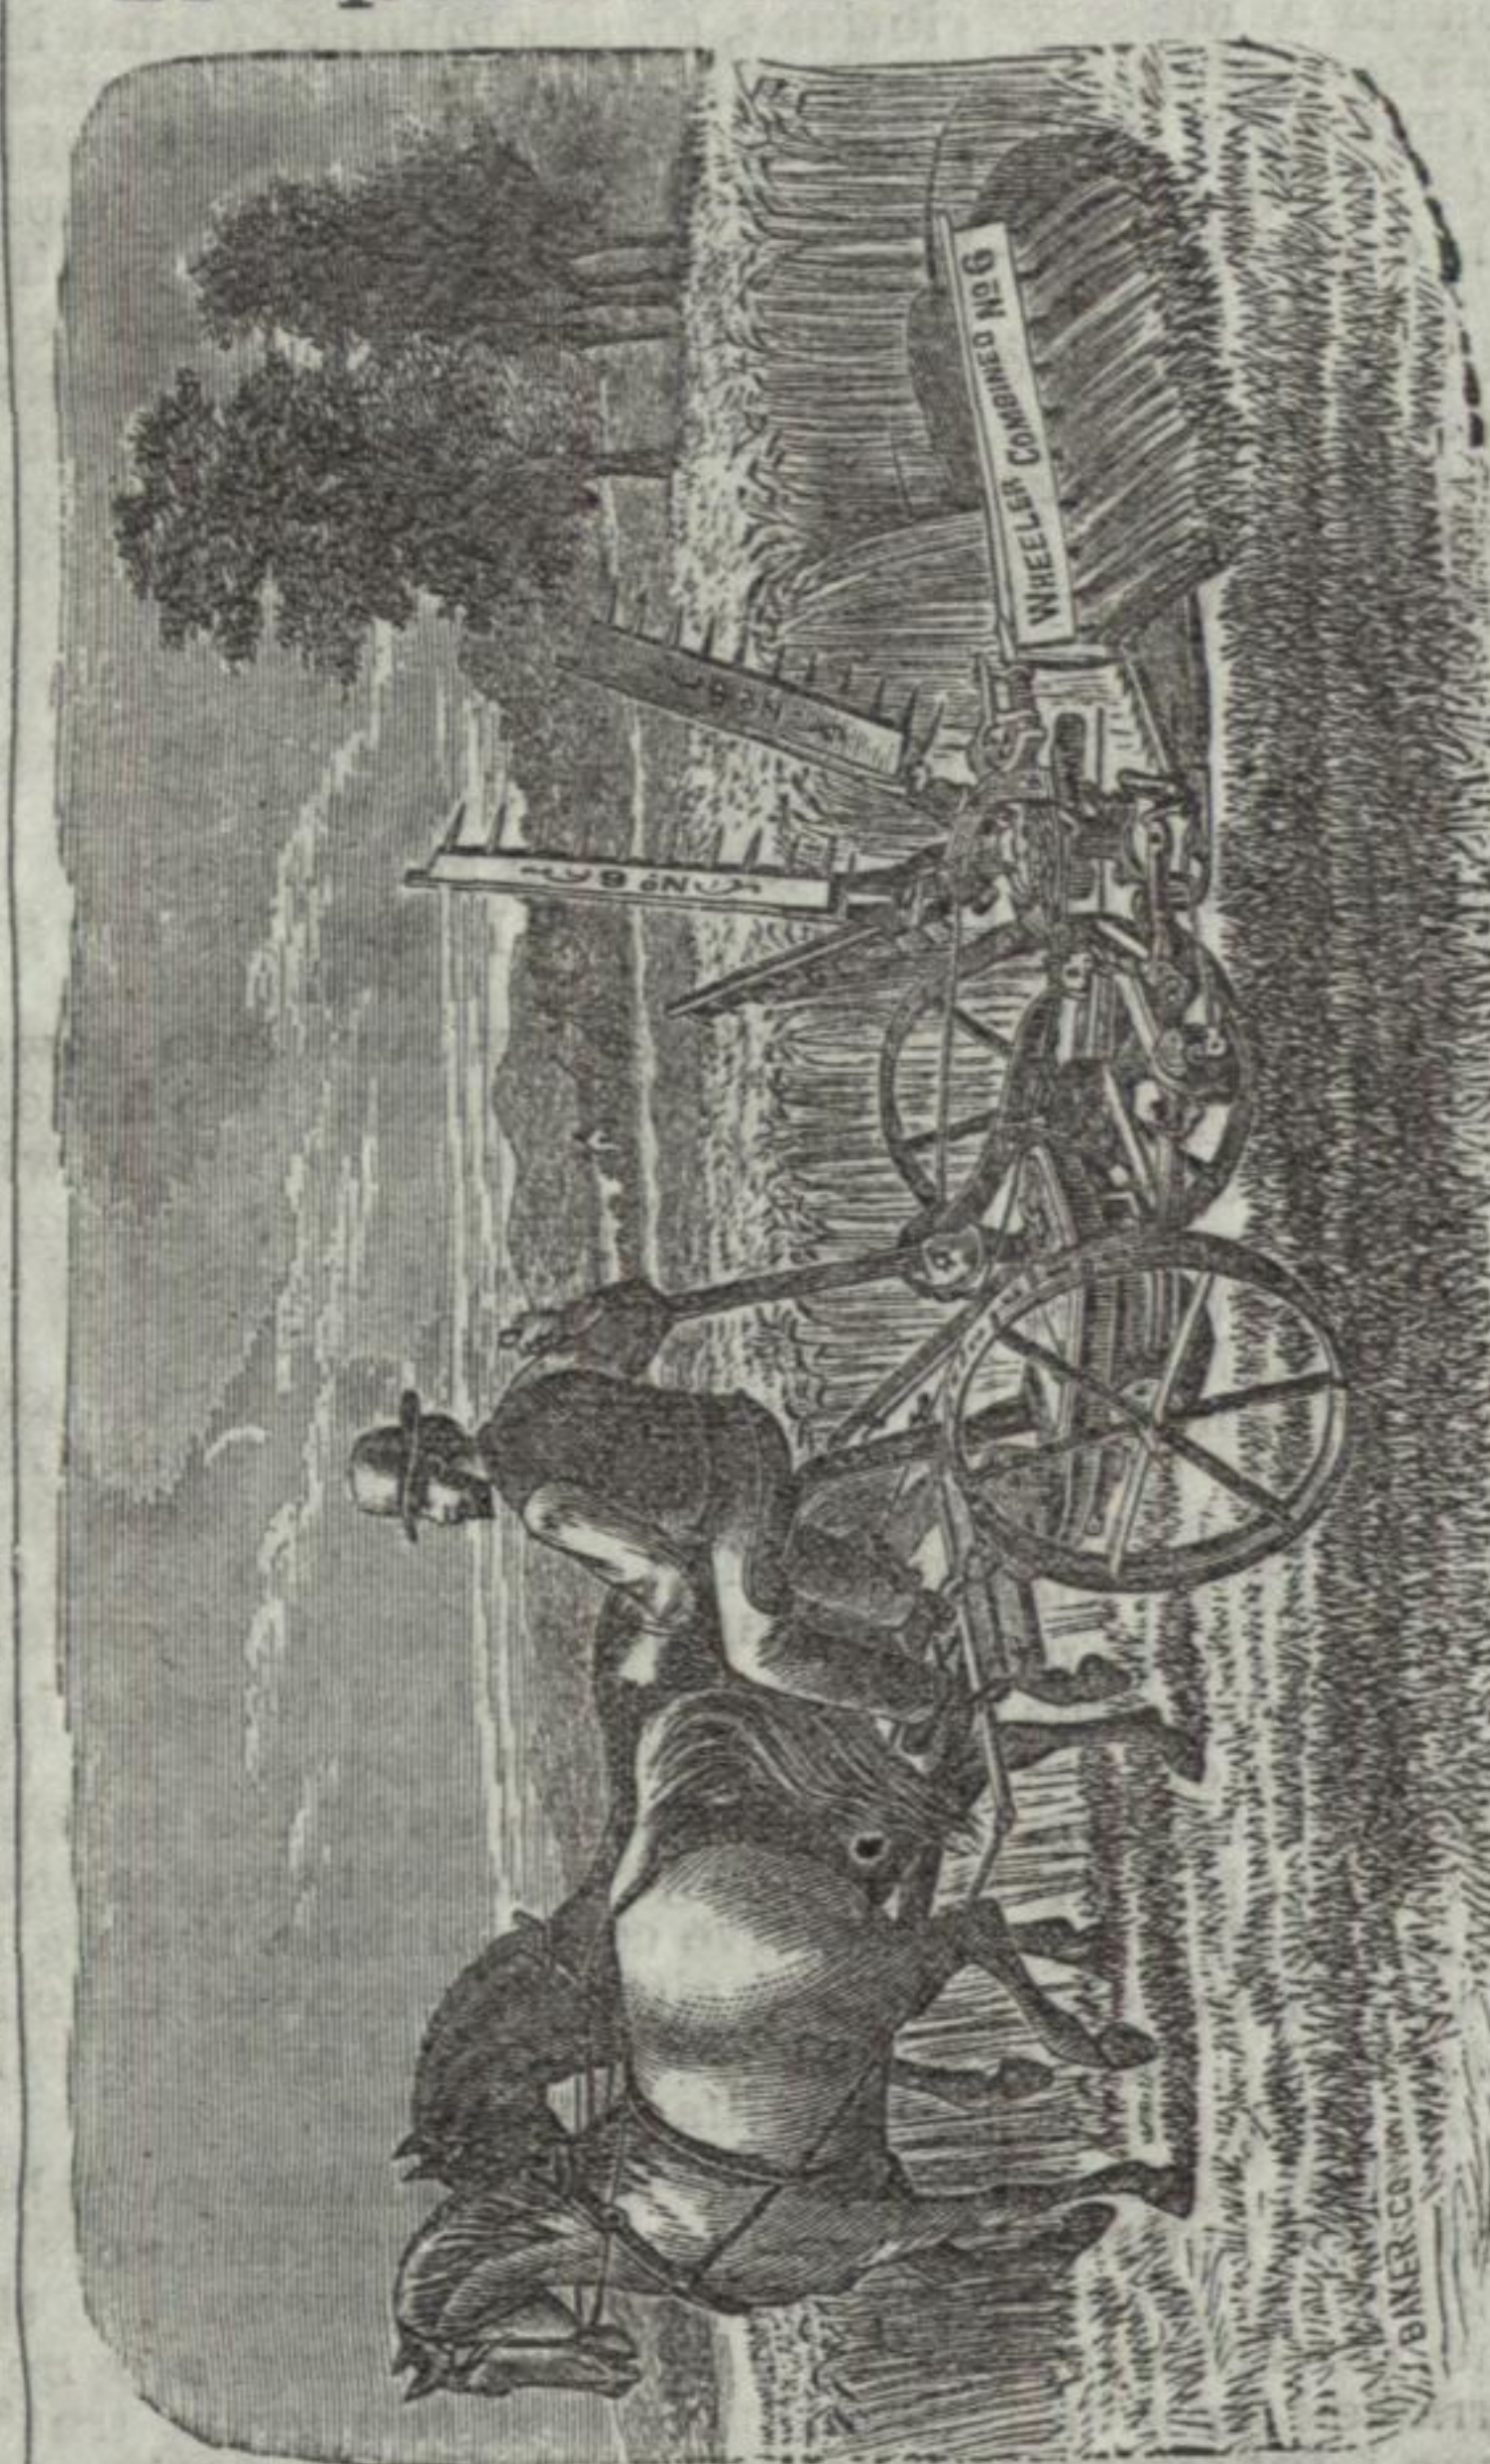

STRAYED from my place on the 20th of May, one grey horse, branded O O on left ribs and B G on left thigh. Also, one bay Mare, branded J S on left shoulder and J S on right shoulder. \$15.00 reward will be paid for their return to
B. G. GIEVER,
15th Ward, Salt Lake City.

FOUND!

ON THE WEST JORDAN RANGE, A roan Horse with saddle and bridle on. The owner will find him at
JOS. HARKER'S,
Taylorsville.

MATTISON & JOHNSON

Return thanks to the farmers of Utah for their liberal patronage for the past two years, and state that they enter the field for 1876 with an entire NEW STOCK of Reapers and Mowers.

THE CAYUGA CHIEF

Has been improved especially for this trade, and is now called the "WHEELER." The No. 5 is a light Mower, possessing great powers and endurance, and the easiest handled machine in the market. With the exception of the improved Ledger Plate Guard, it is the same as the Cayuga Chief No. 3, which has become such a favorite. The No. 6 is a combined machine, with controllable Self Rake, the gearing is all enclosed in an iron box, which excludes all dirt and grit.

This machine was awarded the California State Diploma last September, and has already taken the laurels from several competitors in Texas this year.

WE ALSO HAVE THE

KIRBY MOWERS AND REAPERS.

All these machines are made by D. M. Osborne & Co., Auburn, New York, the largest Reaper and Mower Factory in America. A Full Line of the

MITCHELL FARM AND SPRING WAGONS!

Always on hand, and claim some important improvements for this wagon, and warrant it second to none. A Large Stock of

SULKY RAKES AND WIND MILLS NOW ON HAND.

Look to your Interest, and come and see us before Purchasing.

Offices on FIRST EAST STREET, sign of the Mitchell Wagon and Big Wind Mill

McCORMICK REAPERS, MOWERS AND HARVESTERS.

Who was the Inventor of Reaping and Mowing Machines?
McCORMICK!

Who has been building Reapers and Mowers for over Thirty Years?
McCORMICK!

FARMERS OF UTAH!

We have one question to ask you, viz: Ought not the **Inventor** of the Reaping and Mowing Machine, who has been building them constantly over **THIRTY YEARS**, and who has the largest capital and largest Manufactory of any firm building machines in the world, ought not he to be able to build as good and **BETTER** machines than any competitor?

Think of the above before you buy! Also, remember that there were more of the **MCCORMICK** machines sold in the United States last year, and every year, than any other make, and ask yourself the reason why. Is it not because they are the **BEST** and most **DURABLE** machines?

See for yourselves before buying. Remember that every machine is fully guaranteed.

FOR SALE BY

JOHN W. LOWELL & Co.,

Agents for Fish Bros. Wagons, &c., S. L. City.
