SNAKE RIVER WATER.

Senator Dubois Says Idaho Needs and Must Have it All.

Under the late night a Washington Herald dispatch says: Senator Dubois today authorized the following statement relative to the proposed plan of diverting the waters of Snake river for the purpose of filling up Great Salt Lake.

"It is absurd to talk about diverting the Snake river into any other state. There isn't sufficient water in the river to irrigate Idaho lands, and the people of the state will expect their representatives in Congress to use every endeavor to secure the construction of reservoirs at the headwaters of the Snake river, making use of Twin Ocean, Emma, Matilda, Jennie and Jackson lakes for storage purposes. When this is done and all the waters that can be gathered and stored are turned into Snake river, there will not be sufficient water then to irrigate the available arid lands in Idaho which can be irrigated from Snake river. Instead of being any surplus, there will not be sufficient water. Nature has so provided that Idaho is best situated of any state in the west to be successfully reclaimed under the national irrigation act. Snake river is our greatest asset and our great pride. It is ridiculous to think for an instant that any representative of Idaho, either here or at home, should consider for a moment any sort of proposition which would divert the waters of the Snake river to the reclamation of lands outside Idaho. I can assure the people of Idaho that they need not be alarmed. All the waters of Snake river will be used in Idaho."

WESTERN MARKET LETTER.
Special Correspondence.

Kansas City, Mo., Monday, Feb. 8.—Arrivals of cattle at Kansas City last week were 12,000 head less than previous week, or 29,000 head, including calves. Prices did not advance with that strength which might have been expected in view of the light receipts, but the situation improved very much over close of the previous week. Fat steers advanced 10 to 15 cents by the end of the week, and she stuff and butcher kinds of cattle gained 15 to 25 cents. Western feed steers sold from \$3.49 to \$4.30, mostly, and cows at \$2.25 to \$3.25. Not much western stuff was included. However, stockers and feeders gained in demand and tone, but did not gain in price. Sales ranged from \$2.25 to \$4.00 for westerns and Colorado. Run today is 7,000 head, and as there is a moderate run at all markets, prices are 10 to 15 cents higher, most on choice fat steers. Top steers today \$5.00, same as best price last week. Bad weather has been against stocker and feeder trade, but a few nice days last week brought out an army of buyers, and 7,000 head were taken to the country in two days. This would indicate that when the weather settles stocker and feeder trade will be in good condition.

Sheep prices were 10 to 25 cents lower before the close of last week, as compared with close of previous week, most of it on lambs and yearlings. Receipts were 4,000 less than during previous week, but packers' demand was strong. Stockers and feeders gained in demand and tone, but did not gain in price. Sales ranged from \$2.25 to \$4.00 for westerns and Colorado. Run today is 7,000 head, and as there is a moderate run at all markets, prices are 10 to 15 cents higher, most on choice fat steers.
