

NEWS OF THE MINES.

Salute View and Far Between on the
Stock Exchange Today.

4. Bid of \$1.50 per Share for a Controlling Interest in the Property—
Notes of General Interest

Today's call of mining stocks was not attended with any special degree of interest or excitement. The proceedings went off quietly and costily, and resulted in but a limited number of sales being recorded. Ajax took a step upwards and brought a dollar for a block of 100 shares, and half a cent less for a limited number. One of the brokers wanted a controlling interest in the property and to that end offered

stock. Brick Consolidated met with takers at 2,800 shares, while Eagle-Fluoride Amended and Hogan constituted the selling stocks on the undated side. Another took a decided tumble, being offered at \$1.50 with \$1.00 bid. Centennial-Kruska was offered at \$35, but no bids made there.

POLLOCK'S WEEKLY REVIEW.
A Good Week in the Local Market.

James A. Pollock says in his weekly mining share market letter under date of today:

market and with very few exceptions the quotations have advanced all along the line. Money for investment seemed to be very plentiful, both locally and on the outside and buyers nearly al-

Alax opened strong and toward the end of the week showed a great gain in strength, closing considerably higher than at the close of the previous week. This advance was due largely to sympathy for its neighbor, the Mammoth, and through improvements in the new showing. A minor crash another heavy draft in its mining forces about the middle of the week, and the properties were all battered down. This action

stock to slump materially and the close was weak. Alliance was inactive and did little.

The regular monthly dividend of \$1 per share, well in excess of the \$0.50

cial future today, making a total of \$2,500,000 paid by the company. Comparatively little of the stock was offered for sale, with the demand strong. One of the properties the showing of was a something wonderful. One

port shipments are being made. Dairymen here, with the demand for the stock quite active, find receipts were received from the mines, where the extraction of ore is reported to be under way preparatory to the commencement of shipments. Daily and Daily-West were both strong, with the inquiry for the steeper grades and holders who were willing to sell few. Daily again sold above 20. Daily and Larn again showed one-half cent dividend.

Light was in fair demand, but at

the continues as usual. Four Acc.
