

# MINING, BUSINESS AND STOCKS.

## TENDENCY WAS TO FIRMNESS

Mining Stock Market Slightly Improved This Morning.

## MORE STIFFNESS IN PRICES.

Daily-Judge Up - Lower Mammoth May Day and Sacramento Stronger, And Carls Down.

As indicated by conditions on "change" this morning, the mining stock market was generally stronger, more firmness attending transactions and some of the principal traders showing improved prices. Daily-Judge went up in figure, Lower Mammoth exhibited greater strength and Sacramento and May Day seemed to feel some rejuvenation. Star Con. opened up bravely, being stronger than on Saturday, but the stock's courage seemed soon exhausted, and it slunk back to last week's condition. Carls was lower and the remainder of the stocks held to about last week's settings.

Taken in its entirety, however, the market showed a tendency to improvement and firmness, with better prevalent prices. Following are the closing quotations as fixed at this morning's call:

### Power for Alta.

An application of Arthur E. Snow for the use of 12 second feet of the water flow through Little Cottonwood canyon for power purposes is reviving interest in the camp of Alta. The water is to be diverted by means of a dam and pipe-line at a point about four miles above Wasatch and known as Tanner's flat. From that point the waters will be piped down the canyon for a distance of a mile and there used through-out the year for the operation of mining machinery, a contractor, with which to treat the ore of the Columbus company's mines, the general use of electricity, etc. The water after having been used will be then returned to the natural channel of Little Cottonwood creek. Protests against such appropriation will be received by State Engineer Doremus up to Aug. 19.

### For the Raymond.

Timothy is believing the assertion that the recent purchase of the Illinois property was in the interests of the Raymond Mining company, of which Senator Kearns is one of the founders. Manager Sullivan of the Raymond company is credited by the Timothee Reporter with originating the information to that effect.

### June Dividends.

So far in the month of June the mining dividends paid have reached a total of \$38,000, divided as follows: Annie Laurie, \$30,000; Daily-West, \$10,000; Gemini, \$5,000; Grand Central, \$5,000; Sacramento, \$5,000; Silver King, \$10,000.

### Men's Comfort.

Enhanced these hot days by wearing the negligee or pajama shirt. We show neat patterns. BROWN, TERRY & WOODRUFF CO., 166 Main Street.

### Constipated Bowels.

To have good health, the bowels should be kept in a laxative condition, and the bowels moved at least once a day. But all the potent laxatives are exhausted. Mr. G. L. Edwards, 142 N. Main St., Wichita, Kansas, writes: "I have used Herbine to regulate the liver and bowels for the past ten years, and found it a reliable remedy." See at Z. C. M. I. Drug Department.

## SYNDICATE WAS OUT OF MONEY

Utah Iron is Good Enough and Only Cash Buys It.

## DENVER PAPER'S STORIES.

It Tries to Show the "Iron Did Not Come Up to the Requirements" in Recent Deal.

While the failure of the Colorado Fuel and Iron company to exercise its option on the iron county iron properties is a matter to furnish some regret to Utah people, the citizens of this state have no need to worry about the situation. The iron ore is still there in limitless quantities and it is just as good now as it ever was, notwithstanding the efforts of some Denver papers to blame the failure to the alleged fact that the "iron did not come up to requirements." This option was to have been taken up a week ago, the Colorado Fuel and Iron company agreeing to pay \$175,000 at that time in order to hold the property. On the day upon which the Colorado company failed to come up to its agreement with reference to the Utah iron fields it is also said to have failed to materialize in a little matter of \$600,000 in New York; so the natural conclusion as to the truth of the matter is that the iron syndicate did not have the money, and that Utah iron still retains its excellent quality. The steel trust, in opposition to the Colorado Fuel and Iron company, has had something to do with the matter. However, the owners are not worrying. They still own the property and are kept in pretty good clover by means of the money being forfeited to them in this little option incident.

### TO PAVE ST. LOUIS.

Streets of Exposition City to be Covered with Local Asphalt.

Work on the new road from Fruita, Colo., to the asphalt beds west of that place is progressing quite rapidly, says the Grand Junction Sentinel, and in a short time 200 teams and over 500 men will be working at the mines and hauling to the railroad. It has not been fully decided whether the heaviest of the hauls will be made by teams or by a sidetrack seven miles west of that place, but as soon as the road can be finished, work will begin in earnest. At present there are 10 men and 50 teams employed. A road suitable for the traction engines will be built part of the way and these machines will be used for the heaviest grades, and teams of several wagons will be hauled. The work is being done by a big St. Louis and Salt Lake concern that has contracted for paving the streets of St. Louis. The contract calls for the work to be finished by June of next year in time for the opening of the world's fair. All the gravel for the miles being purchased in Fruita. After the St. Louis contract is finished the company will continue shipping to the other large cities of the country and export the gravel to the lower valley. The beds are practically inexhaustible. Young Joseph Leiter, the Chicago "wheat king," is interested.

### AFTER POPOCATEPETL.

Americans Seek Ownership of Sulphurous Volcano.

Even old mother earth may not vomit forth the fumes and minerals that fill her interior but man views her belchings with a keen eye. Among the great states to the conclusion that Mount Popocatepetl, Mexico, is a good thing and are seeking to have the ownership of the old volcano transferred to them. This volcano is owned by Gen. Gaspar Sanchez Ochoa, acquired as a reward for political and military services. It is reported to contain millions of dollars worth of sulphur and the price at which it is offered for sale is only \$50,000. According to the story there are two rival bidders for this costly mine and self-renewing mine. John D. Rockefeller's mine is associated with the deal as backing one of the parties to the negotiations. The other party is expected to be John G. Green and his multi-millionaire brother, Samuel Green of Pittsburgh. One plan for the exploration is to build a cog wheel railway right down into the heart of the volcano, dip out the sulphur without the aid of human hands and bring it to the surface, still red hot from the bowels of the earth. Friendly the scheme is the tunnel the volcano at the height of 900 yards below the lip of the crater. Through this string a cable way made of steel wire an inch in diameter is to be run every 100 feet. These will dip up the sulphur going in, and bring it to the surface coming out the steel rope travelling 300 feet a minute. This plan alone will cost \$500,000 to install.

### Ben Butler.

Articles of consolidation of the Ben Butler Mining and Milling company and the Chicago and Bingham Mining company were filed in the county clerk's office today. The name of the new combination is the Butler-Bingham Consolidated Mining company. Its office is in this city and its capital stock is \$500,000, divided into shares of the par value of \$1 each; 375,000 shares will be distributed among the stockholders of the Ben Butler company and 125,000 shares among those of the Chicago and Bingham company. A. L. Jacobs is president of the company; C. N. Stevens, vice president; E. D. H. Thompson, secretary; W. S. McCormick, treasurer. The new company succeeds to the mining property of the old companies, located in the West Mountain district.

### Straw Hat Sale.

Closing out some odd lines of \$2, \$3 and \$4 grades at 75 cents. BROWN, TERRY & WOODRUFF CO., 166 Main Street.

### Tax on Babies.

Extreme hot weather is a great tax upon the digestive power of babies; when puffy and feeble they should be given a few doses of White's Cream Vermifuge, the children's cure. It will stimulate and facilitate the digestion of their food, so that they soon become strong, healthy and active. See at Z. C. M. I. Drug Department.

## THE NEWS GIVEN OUT IN DENVER

President McNeil Tells of Utah Copper Company Plans.

## SMELTER & CONCENTRATOR.

Announcements Heretofore Made in Salt Lake Have Received Confirmation.

It has heretofore been stated in the columns of the Salt Lake daily newspapers that the eventual plans of the Utah Copper company, which made recent purchase of the Wall-De Lamar group at Bingham, would include the erection of a concentrator and smelter for the great property acquired. President McNeil of the copper company has given out the news in Denver and announces that work will begin just as quickly as possible upon these plans, with a view of treating 3,000 tons of ore daily. By the system to be installed it is expected that the treatment of the company's ores will be brought to 60 cents per ton. In the latest issue of the Denver Mining Reporter is the following concerning the purchase: "The purchase of the Wall-De Lamar group of copper properties in Bingham canyon, Utah, by Colorado parties, is of importance to that district, because the purchasers are thorough operators and have ample capital to mine those low grade copper ores on a large scale. The Utah Copper company, the name of the concentrator and smelter of the company's ores will be brought to 60 cents per ton. In the latest issue of the Denver Mining Reporter is the following concerning the purchase: "The purchase of the Wall-De Lamar group of copper properties in Bingham canyon, Utah, by Colorado parties, is of importance to that district, because the purchasers are thorough operators and have ample capital to mine those low grade copper ores on a large scale.
