Commercial Report.

NEW YORK, 27.—The clearing house exchanges for the week show the following increase and decrease in business as compared with the corresponding week of last year:

Increase—New York, 22.9; Philadelphia, 3.8; Chicago, 9.2; Cincinnati, 1.5; Baltimore, 12.4; Pittsburg, 43.7; Louisville, 17.7; Milwaukee, 11.1; Providence, 22.9; Kansas City, 22.8; Cleveland, 1.4; Hartford, 16.1; Columbus, 21.5; New Haven, 15.1; Springfield, 15.2; Worcester, 15; Lowell, 17.3; Syracuse, 8.7.

Decrease—Boston, 3.0; St. Louis, 3.6; San Francisco, 3.0 New Orleans, 20.7; Indianapolis, 25.0; Peoria, 25.0; Memphis, 41.8.

The *Public* says there is a decided improvement in the exchanges not only at New York but at many of the outside cities. The aggregate of clearings of all cities exclusive of New York is 3.7 per cent. larger than for the corresponding week of last year, and it is sometime since a statement has been made in this respect so favorable. The commerce of the country has undoubtedly been expanding in all legitimate branches for several weeks past and the apprehensions which were justified early in August, no longer appear to have foundation except as to the money market. Unhappily, the danger as to money is only increased by the rapid enlargement of trade. It is a common observation of bankers that more money is now demanded in almost every branch of trade than at any previous time for years. The actual stringency that is felt, according to judicious observers, is due far more to the enlargement of legitimate trade than to operations in the stock market, but there are operators who seize upon this condition of the market in order to force holders to part with their securities, and the market is thus rendered more strong and more embarrassing for legitimate trade, as well as for speculators. Business generally is getting into a more healthy condition. The danger, and almost the only danger at present, comes from the money market.

Frank James' Wife.

The Ford brothers, slayers of Jesse James, on exhibition at Bunnell's Museum, in Brooklyn, claim that on Tuesday the wife of Frank James, the brother of Jesse, visited the Museum, stared at them, and then, after looking at the other curiosities, left the building and entered a cab and was driven rapidly away. They assert that they recognized Mrs. James although she wore a thick veil and that her visit to the museum was intended as a reminder to them that Frank James had threatened to kill them for murdering his brother.

Charles Ford said: I notice every one that comes in here, for when a man has sworn to kill you you must keep your eyes open. I saw among the people that entered, a heavy-veiled woman dressed in deep mourning. She walked up to our platform and looked at Bob and me. Her actions attracted my attention. She looked at the curiosities for a few minutes and then returned to where Bob and I were, folded her arms and looked squarely at us. I knew immediately that she was Frank James' wife, and I told Bob about it. Bob jumped off the platform and went to the manager's office. Mr. Bates only laughed, but then Mrs. James passed out of the door and Bob said he was going to follow her and Mr. Bates said he would go with him. Mrs. James passed by the window and looked in and then the carriage drove up and she sprang into it and was driven away.

Melville.

A *Sun* Washington special says: Chief Engineer Melville's cruise ended to-day, when he formally reported his return to the secretary of the navy. He borrowed a full dress uniform from brother officers, presented himself to the department and said: Mr. Secretary, I have the honor to report my return, and to turn over to you two seamen who have been in my charge. There was no further ceremony. Melville said he would be willing to take command of another expedition to the north pole provided he could have full command, and could have a ship built, fitted and equipped to suit him. He believes there is a course to the north pole by way of Franz Josef route. Melville was directed to continue his custody of the records of the expedition which he found. The private letters and journals of DeLong will be handed to his widow, and the other records will remain in the care of Melville until they are produced at the official investigation. These records are of the greatest historical value, and were preserved with great care by DeLong to the end. When published they will be found to be of great interest, and will shed much new light on the work of the expedition. Melville says that only a small portion of them has yet been printed, and that the books contain a large number of maps and sketches.

Washington, 27.—Engineer Melville had a long interview, to-day, with Secretary Chandler, and he gave a detailed account of the finding of the bodies of DeLong and party. The private papers and the journal of DeLong will be turned over to his wife.

Catholic Church Schools.

MILWAUKEE, 27.—The German Roman Catholic Central Society adopted in to-day's business meeting the following relating to educating Catholic children: All members of the Central Society are in duty bound to send their children to parochial schools, and it is the duty of every Catholic to contribute to the organization of parochial schools and colleges of the Catholic church. All Catholics should assist the clergy in providing for Catholic education for their children, so that a generation of Catholics may be raised who will jealously guard their rights and privileges.

Some of the committee reported in favor of an organization of Catholics for the purpose of electing candidates for political offices who will protect Catholics in their constitutional rights and religious worship. Resolutions against prohibition were concurred in.

H. G. Spaunhorst, of St. Louis, was re-elected president. He stated in his speech of acceptance that he would always jealously guard the interests of the Catholic church, especially as to the legislative measures relating to unwarranted taxation.

The remaining officers were elected as follows: First vice president, Jas. B. Strach, of New York; second vice president, Wm. Casper, of Milwaukee; corresponding secretary, Theo. Fehling, of St. Louis; recording secretary, Alfred Steckel, of Evansville; executive committee, T. Arendes, of Terre Haute, S. Brulmair, of Milwaukee; and a vice president for each State including A. Boppert, of San Francisco. Adjourned.

Catoolic Emigration.

CHICAGO, 27.—The Catholic Emigration Society met here to day. Bishop Spalding, Ireland and Fitzgerald were among those present, together with Rev. Fathers Nugent, of Liverpool, England; Smith, of Nebraska, and McGalrich, of Minnesota. The reports from colonies in Nebraska, Kansas and Minnesota were very encouraging. The lands of the association are practically all sold, and their efforts will be chiefly devoted to filling up the Arkansas colony, and Bishops Spalding and Fitzgerald go to New York and other cities in the East to forward that work. In the afternoon Father Nugent spoke of his labors in this cause of emigration from Ireland.

Earthquake.

ST. LOUIS, 27.—A slight shock of earthquake was felt in this city and vicinity at 4:16 this morning. In the central part the shock was noticed by a rolling, even noise, followed by twelve distinct vibrations at intervals of one second. The first vibration was the most violent. The shock lasted about fifteen seconds.

Centralia, Ill., 27.—A well defined shock of earthquake was felt here about 4:30 o'clock this morning, lasting several seconds. It seemed to come from the west and was accompanied by a rumbling sound. It shook very preceptibly and woke nearly all the sleepers.

Springfield, Ill., 27.—A shock of earthquake was distinctly felt here about 4 o'clock this morning.

Vincennes, Ind., 27.—A shock of earthquake was felt at 3 a. m. It rattled windows perceptibly and lasted three minutes, but was more distinct further west.

Yellow Fever.

GALVESTON, 27.—A *News* Brownsville says: There are five new cases of yellow fever and no deaths. The fever has reached Kennedy's cattle ranch near the upper line of Cameron County. There are fifteen cases of fever at Dom Pedro ranch.

The sick at Point Isabella are doing well. There are are no new cases reported from there.

There are no new cases at Fort Brown, but the old cases are doing well.

A mass meeting of the citizens of Matamoras is called for Sunday to take steps to re-establish Bagdad as a port of entry.

Pensacola, 27.—We have sixty cases of yellow fever and six more deaths.

Sharp Shooters.

LEAVENWORTH, Kansas, 27.—To-day closed the contest at Fort Leavenworth for places on the division rifle team for the division contest which takes place at Fort Leavenworth at an early day, at which contest members will be selected for the contest which takes at Fort Leavenworth, October 25th, 26th and 27th. The contest has been very spirited and the race for the first place very close between Lieutenant Portills of the Fifth Infantry, and Sergeants Osborne and James of the department of Texas. Gen. Sheridan, General Pope and other high military officers were present throughoughout the contest, Gen. Sheridan in person presenting the prizes at the close of the contest. The firing was at ranges 200, 300 and 600 yards.

The names of the twelve highest marksmen who will constitute the division team in their order with the department to which they belong are as follows: Lieut. Portills, of Dakota; Capt. Gordon, of the Platte; Sergeant Osborne, of Texas; Sergeant Bentley, of Dakota; Sergeant James, of Texas; Private Preston, of Missouri; Capt. Ellis, of Missouri; Capt. Fosdick, of Dakota; Private Wesgroß, of Missouri; Private Niphill, of the Platte; Lieut. Merriam, of Missouri, and Sergeant Eberle, of Texas.

Criminals Caught.

TERRE HAUTE, Ind., 27.—A man named A. J. Thompson victimized the banks here out of $2,600 by means of duplicate bills of lading, the word duplicate being chemically removed. It is said that he victimized the Worthington bank out of $1,900 on the same trick. Thompson disappeared.

Troy, N. Y., 27.—Two young men well connected, were discovered committing serious burglaries. One, a member of the church, robbed the residence of his pastor. The police are looking for George P. Frye. His companion, K. C. Frost, is secured.

Raywick, Ky., 27.—Yesterday, a posse of six men, under command of J. T. Warden and T. T. Miller, killed Richard Schwaggs and arrested his brother William, two young desperadoes. They made a desperate resistance. Their last crime was murder.

Sudden Deaths.

MINNEAPOLIS, 27.—At St. Johns on the St. Paul, Minneapolis & Manitoba railway, seven miles from Williams, an engine becoming unmanageable was abandoned by the engineer and fireman. It made the run to Williams at a tremendous speed there colliding with a caboose occupied by three men completely wrecking it and killing two. The other man was not seriously injured.

Baltimore, 27.—At Heathville, Va., a mill dam was carried away by the flood, and the water swept down upon the house of Mr. Bush, drowning his wife and five children.

The Political Pot.

CHICAGO, 27.—A Richmond, Va., special says: The political situation in Virginia grows more interesting and exciting as the day of election draws near. Blaine's views upon Virginia expressed some days since had a stirring effect, whether or not he so intended. Mahone's negroes have begun upon him, and they are doing all they can to belittle him. A number of republicans who began acting with Mahone observed more caution in this district. John A. Smith the republican Mahone candidate for Congress, was asked whether he was a Blaine or Arthur man, he declined to answer, and to-night it is rumored that Smith is to be withdrawn by Mahone, and a strong Arthur candidate put in his place. It is stated on high authority that a prominent colored republican from Washington is soon to stump the State with Blaine. It is understood that Fred Douglas is the party, and he warns his race that if they affiliate with Mahone they need expect no sympathy from the true republican party, which he predicted will be dominant in this country within a year. Whether or not these reports are well grounded, certain it is that Mahone is using especial diligence to get only stalwart candidates, and he is assiduously weeding out all weak-kneed ones. He has evinced a determination to draw the line sharply between the Blaine and Arthur sympathizers, and all of the former will be forced to retire. Rives whose enfoeced withdrawal in the Fifth District is spoken of, is supposed to be tainted with Blaineism, which was not offensive to Mahone till Blaine recently so unequivocally declared himself against the Coalition party in Virginia. In the meantime, the straightout republican party in the State is gaining accessions and perfecting its organization. Whether or not they will be strong enough to elect their ticket is a matter of conjecture; the fact that there are earnest aspirants for nomination in all the districts would seem to understand that they are encouraged with strong hopes of success. Blaine is undoubtedly strong in Virginia. He has intimated that he will gain many accessions to his ranks and give Mahone much trouble. It is certain that the readjuster leader is more disturbed by the Blaine opposition than by anything which has yet come in his way.

Washington, 27.—Fred Douglas says he is not the prominent colored citizen who is going to Virginia in the interest of the straight republicans. He is in sympathy with Mahone. He declines the invitation of Ohio for the reason that he is too old to travel.

New York, 27.—Ex-Mayor Cooper on motion of Augustus Schell was chosen chairman of the executive committee of the democratic State committee.

FOREIGN.

Grave Doubts.

LONDON, 27.—De Lesseps, regarding the second canal, writes that his company has possession for 99 years of the exclusive privilege of maritime communication between the Gulf of Pelusium and the Bay of Suez.

The *Times* says it entertains grave doubts of the validity of this claim.

Called on to Rise and Explain.

Berlin, 27.—It is semi-officially announced here that the Powers expect a communication from Great Britain within a few days soliciting an expression of their views on the state of affairs in Egypt.

Sick.

Cairo, 27.—General Wolseley is no better.

The British troops will begin to return home after the review on Saturday.

Arabi Pasha's disease has left him a mere wreck.

Courts Martial.

The ministers to-day agreed upon three decrees, which the Khedive will sign to-morrow. The first decree institutes a commission for the prosecution of all acts of rebellion committed by civilians. The commission will consist of nine members and be under the presidency of Ismail Bey. The second orders a court martial with eight members, Reouf Pasha presiding, to be held in Cairo, and that it shall give judgment according to the military code without appeal in all cases submitted to the committee. The third directs the assembly in Alexandria of another court-martial to try all cases submitted by the tribunals recently appointed in Alexandria and Toulah. The proceedings of both court-martials will be public, and the accused will be permitted to employ counsel.

The Khedive will soon issue a decree granting amnesty from all officers from captain downward engaged in the rebellion, excepting those who participated in the riots or joined the army since the beginning of the campaign.

Released.

Constantinople, 27. — Gen. Wallace, United States Minister, obtained from the Sultan the release of several Greeks arrested in Janina in 1881 for participating in the political demonstration against Turkey, who were subsequently brought to Constantinople.

Eugene Schuyler, the United States Consul General, has gone to Athens.

A Liberal Proposition.

Madrid, 27.—Marshall Zerrano, the Liberal leader, announces his intention to declare for the Constitution of June 1st, 1869, which made the King irresponsible and placed all responsibility upon the ministers The ministry and its supporters have resolved to oppose the change.

Killed Four Persons.

Panama, 27. — The earthquake killed only four persons on the Isthmus and one woman died from fright. The damage to property is not so great as at first reported.

Southern Anarchy.

Montaneros is destroying the houses and crops of Peruvians who afforded aid to the Chilians. The American schooner *Transit* is reported seized at Cape Gracias Adios. Nicaragua was captured by the revolutionists, who hoped they could thus capture San Juan del Norte, generally called Greytown. A man named Emiliano Herrera seized the town and declared himself "Chief of the Provisional Government of the Atlantic Coast," and under his authorization the schooner *Transit* was seized. She was subsequently recaptured by Capt. Thompson and his men, and the rebels were carried to Bluefield, Nicaragua, and delivered into the custody of the United States consul. After the *Transit* left Cape Gracias Adios the populace arose against the rebels, seized them and executed the two leaders, Emiliano Herrera and Miguel Criera, and thus peace was at once restored. The consul took the prisoners delivered to him by Capt. Thompson to Georgetown and turned them over to the Nicaraguan government at that port who in turn sent them to Granada, where they are now in prison.

Elected President.

Dr. Anice D'Aize, one of the richest and most highly educated Bolivians, was elected President of the Bolivian Congress. He is a staunch advocate of peace at any price.

BRIEF TELEGRAMS.

Up to 12.30 yesterday the subtreasury at New York redeemed $1,891,300 in called bonds.

At Quebec, Canada, the comet was seen at 4 o'clock yesterday morning in the eastern heavens. It is a very large one.

John F. Tuttle who had his office with the note broker Follett, has assigned. He is on Follett's paper for nearly $1,000,000.

The Toronto observatory has ordered storm warnings on Lakes Erie and Ontario, also at Georgian Bay and Lake Huron ports.

One-third of the employes in the department of construction at the navy yard at Portsmouth are suspended owing to lack of funds.

Hon. Fernando C. Beeman, member of Congress from the first district of Michigan for five consecutive terms, died at Adrian, Mich., yesterday.

Julius Kohl, first officer of the American ship *Austria*, which arrived at San Francisco yesterday, from Hull, was killed by a blow from a flying spar.

The water in the Delaware and Raritan canal is nearly out and many boats are fast on the bottom. A few bridges are temporarily in position and trains are running. The country presents a wrecked appearance.

Imitating the Magnet.

While modern inventors have been actively competing with each other in devising new and useful applications of the magnetic force, being simulated thereto by the prospect of large pecuniary rewards, the modest physicist of the University of Christiana, Norway—Prof. Bjerkness—has been quietly delving into its mysteries, and endeavoring to reveal its hidden cearacter. The results of his investigations are certainly very suggestive, and his curious experiments have elicited much favorable comment, besides giving a great deal of delight to those fortunate enough to witness them.

Prof. Bjerkness has been able to closely imitiate many of the well-known phenomena of magnetics by simple mechanical means. His apparatus consists essentially of an air-pump, a few little metal drums provided with elastic membranes, some india-rubber tubing and a small tank of water. The drums are immersed in the water and connected with the air-pump by means of the tubing. Pulsations of air are sent into the drums, causing the membranes to expand and contract rapidly, and a very curious result exhibits itself. Let us imagine one of the little drums supported in the water in such a way that it is free to swing in a circle, like a compass-needle, and another precisely similar drum held near to it. If synchronous (simultaneous) pulsations of air are now sent into the two drums, so that the outward pulsations of the membranes of both coincide, the two drums will immediately attract each other. If the pulsations are so adjusted that the outward push of the membrane of one drum coincides with the inward pull of the other, the two drums will repel each other. By ingenious modifications of the arrangements, various effects are produced, intimately resembling those of magnetic action, and, indeed strongly suggesting a similarity of cause as well as of effect. Even the lines of magnetic force, as revealed by the iron filings have been counterfeited by this mechanism.—*Philadelphia Ledger.*
