

NOTES FOR THE LADIES.

Delightful "Patrons of Husbandry"—Female match-makers.

Ladies, this winter, will wear the same things they wore last year—if they can't buy others.

Joaquin Miller told Harriet Hemmer the other day: "You are a wonderful man." And he is a poet!

A dandy is a chap who would be a lady if he could, but as he can't do all he can to show the world he's not a man.

A roaring, red-headed woman, flourishing a pistol and chasing a man, startled Mobile a few days ago. He got away.

A generous sewing machine agent at Logansport, Ind., offers to loan machines gratis to poor women who can use them to obtain a livelihood during the winter.

The "Black Crook" is dead, but it brought \$1,557,307.75 into the treasury of Niblo's Garden. Such is the handsome leg-acy of handsome legs.

A sewing circle in Boston, formed to give employment to poor women, makes from seven thousand five hundred to eight thousand garments every winter.

A fashionable young lady dropped one of her false eyebrows in a church pew and badly frightened a young man next to her, who thought it was his moustache.

A frantic woman's rights advocate has discovered another evidence of the "inequality of the sexes;" in the nursery, the song in Bridget's vernacular is "Lull-a-b-y-baby," but she has never yet heard of "Lull-a-girl-baby."

The New York Tribune instances a case of woman's forgiveness, where she had been stabbed four times by a sulky and savage lover, refused to testify against him, burst into tears when his sentence of three years in prison was announced, and wept on his shoulder as he left the court. He was sulky even then; did not respond to her outburst of remorse; and refused to be touched by her protestations that she would wait for him.

A curious occurrence agitates society in Buffalo. A wealthy widow lady of sixty has just married her own widowed son-in-law of thirty-five; the former husband of her own deceased daughter, who in dying left to her bereaved partner two children. Of these children the grandmother has now become the stepmother, while the father, marrying his mother-in-law, becomes the stepfather of his own sister-in-law. The various new relationships which are thus established are exceedingly complicated, and the curiosity and condemnation of the Buffalo people are excited in an equal degree.

The last census returns show more trades and professions among women than any one suspected. Besides woman farmers there are 45 female stock herders, 5 barbers, 24 dentists, 2 hostlers, 3 professional hunters and trappers, 5 lawyers, 525 physicians, 97 clergywomen, 7 sextons, 10 canal women, 195 dray women, 1 pilot, 4 gas stokers, 33 gunsmiths, 7 gunpowder makers, 16 ship riggers, with a large number of artisans, mechanics, inventors, telegraph operators, and teachers of navigation. Besides these are the great army of teachers of every description. Success to every woman who earns her bread.

PIOCHE NOTES.

From the Record of Dec. 13—

There was an arrival from Salt Lake night before last, bringing Wells, Fargo & Co's express matter, but no passengers. The express was brought in by a sleigh in preference to a stage. There is still another stage or sleigh over due.

From the Record of Dec. 14—

What's the matter now?—Are people actually reforming? It would seem so. Indeed it appears as if an era of good feeling had set in, for during the week ending last night only two cases of infraction of the law's majesty and the State's dignity were brought before Justice Van Hagen. This is well.

Night before last was the coldest of the season in Pioche, but it did not begin to compare with the rigor of the temperature at Dry Valley, ten miles distant. We could scarcely credit the statement we are about to make had it not come to our knowledge in such a manner as to leave no room to

doubt its correctness. From Mr. Tyrrell, superintendent of the Meadow Valley Company, we learn that Mr. Williams, assayer at the Meadow Valley mill, Dry Valley, has been keeping a thermometrical record, and gives the following exhibit: Thursday, at 5 a.m., 12 degrees below zero; Friday, at same hour, 14 deg.; Saturday, at 5 a.m., 22 degrees below zero.

From the Record of Dec. 16—

John Bolston, of middle age, a blacksmith by trade, who lived alone, was taken sick last week and confined to his bed, where he remained, suffering hunger, cold, and thirst, and almost perishing. He was found in that condition, and then removed and well attended to, but has become delirious.

On Sunday evening we had the pleasure of an interview with I. N. Knight, formerly a resident of Rose Valley, but now living at Panguitch, on the Sevier river, in Iron county, Utah. Mr. Knight arrived here on Saturday, having been eleven days on the road, although when the roads are good the trip can be made in four days. Between Antelope Springs and Desert Springs is a desert thirty miles wide, and it was upon this desert that Mr. Knight experienced a great deal of difficulty. Night overtook him about seven miles this side of Desert Springs, and it being so dark that he could not find the road, he was compelled to tie up until morning. He covered his horses with blankets, and in order to keep from freezing he was obliged to continue walking around his wagon all night. He says the snow on the entire route from Pioche to the Sevier is from one to two feet deep. Our informant gives no flattering account of the mining outlook on the Sevier. He brings some information of the prospecting party which left here on the 25th of September—J. E. and E. S. Smith, John D. Boyd and John Pattie—who were at Panguitch, a small settlement on the Sevier, at which place Mr. Knight resides and is engaged in merchandising. He left yesterday by sleigh, taking with him a stock of goods. He found such good bargains in dry goods, underclothing, tea, tobacco, and other articles that he would rather purchase them here than at Salt Lake. He reported a large number of teams on the road, laden with merchandise for Pioche merchants; besides Utah wagons coming here with apples and other farm produce. Fish are abundant in the Sevier, and Mr. Knight expects to be able to supply the people with trout. He expects to return to Pioche about the 15th of January. From Panguitch to Salt Lake, which lies a little east of north, the distance is about 240 miles; from Pioche, which lies a little north of west from Panguitch, the distance is 140 miles.

FOREIGN NOTES.

George Augustus Sala is to go to Russia to write up the royal marriage for a London paper.

Odger has made up his mind to leave England for a lecturing tour in the United States, his more particular object being to address the trades societies.

The number of railway accidents on the English lines has recently become so great, that the government has felt itself compelled to interfere; and Mr. Chichester Fortescue, the Secretary of the Board of Trade, has sent a circular letter to the directors of the various companies, inviting them to consider how they may kill fewer people, and politely, but firmly intimating, that if they find the task too hard for them, the government will take it in hand.

Germany begins to get uneasy at the progress being made by France. Orders have been received by Herr Werndl from the Ministry of War for the delivery of 240,000 Mauser rifles, at the rate of 5,000 per week. English gunmakers are charged with the manufacture of 200,000 more, and it has been determined that a stock of 2,000,000 in all shall be provided. In from 12 to 18 months' time the German army will be entirely re-armed. This is one of the consequences of the ill-judged appropriation of Alsace and Lorraine.

—There was an advance of 2s. per ton at the principal Durham (Eng.) collieries the last of November. From the north of England the word is—"Colliery property is in great demand. Enormous prices are asked."

ZION'S Co-operative Mercantile INSTITUTION

IS DOING THE LARGEST BUSINESS EVER carried on in the Territory of Utah, arising from a uniform system of dealing principally with manufacturers of standard goods, buying in immense quantities and selling on the closest margins.

The largest part of their purchases for the

Wholesale and the Retail Dry Goods Department

Are made through their New York office, from whence all fluctuations in the Foreign and Home Markets are closely watched.

The Institution is complete in all its various departments, and fresh novelties are added to the stock as fast as they are offered in the market. Visitors are shown through the buildings without the slightest importunity to purchase.

The Gentlemen in charge of the several departments are among the most widely and favorably known in the Rocky Mountains, and we commend them to the confidence of the public, promising that no effort on their part shall be wanting to insure a continuance of its patronage.

They are enabled not only to suit the tastes of an intelligent trade, but also to compete successfully with Eastern dealers. In fact no country merchant can afford to pass by this city under the impression that Eastern markets will give him lower prices, better stock or more favorable terms. Their

Grocery, Hardware, and Drug De- partments,

For completeness and variety of stock, have never been equalled west of New York, and merchants in the neighboring settlements in the Territories cannot do better than replenish their stock from this source. Their

Clothing Department

Is now opening its magnificent fall and winter purchases, among which is the most varied assortment of Gentlemen's Furnishing Goods ever brought to Utah. Since merchant tailoring has been added to and made a specialty in this department, that branch of the Institution's trade has attained a perfection never arrived at by any similar house in the Territory. Foreign and domestic fabrics of every style and price are made to order or sold in piece. Their

Boot and Shoe De- partment

Keeps thirty hands constantly employed on all classes of work, and has never failed to secure the Prize Medals at our Territorial Fairs. Their facilities for turning out first-class work have never been equalled by any similar establishment in the Territories, and Gentlemen and Ladies visiting the city would do well to leave their measures with that Department, thus enabling them to order by mail at any time they desire a perfect fit.

The Institution deals in every class of merchandise, and all persons, however remote from business or manufacturing centres, can have their orders promptly filled by mailing them to
