Machinists Work All Night Repairing The Bad Break.

(Special to the "News,")

(Special to the "News.") Ogden, March 25.—The Italian car which returned here last night for re-pairs left the second time this morn-ing at 10:30. It was thought when the news of the breakdown was receiv-ed that it would be necessary to cast a new frame for the automobile, but upon its arrival and after investigating it was found that the old frame could be patched up and used. Several ma-chinists worked all night on the car and fixed it up in first class shape. It was loaded upon a flat car and sent out on a train over the Southern Pa-cific to Lucin, having covered this dis-tance once, and will then continue on its castward trib.

Its coastward trip. The French car was reported at Evanston today, and will probably reach Ogden some time tomorrow fore, noon. Dr. M. C. Freeman of Rock Springs, who ploted the French car to Granger, arrived in Ogden this morning and stated that the Parisian car was in good shape and was making good time.

men, when interviewed by Miss Park-hurst, said to her: 'My dear madam, do not desist. Push ahead! Keep It up! It is the only way to win.' Of course, in their enthusiasm the women sometimes become bolsterous, which I suppose frightens the men, causing them to wonder what those dreadful women will do next. Whereas if the men would concede to them their rights of suffrage, they would have no more trouble. Things would adjust them-selves; and half the women who are so clamorous for suffrage now would not take the trouble to exercise that right. They are contending for the right so vote if need be, considering themselves competent to discriminate between the good and the bad. "Of course, the reason the women interviewed by Miss Park when

good and the bad. "Of course, the reason the women are generally disbarred from suffrage is based on their relations to society and the opposite sex. Why this should be I do not comprehend, as they can show their independence when so disposed, although their sympathy or preference often goes to their male relatives; but as for that, the men also show the same preferences.

as for high the first also show the same preferences. "If you will allow me a few moments of your time, I will tell yon how satis-factory in every way are conditions in Utah. We women have had suffrage a great many years. In 1870 suffrage was conferred on Utah women by the terri-torial legislature, but we were deprived of it in 1887, through what is known as the "EdmundsTucker act." But Utah entering the Union in 1896, full suffrage was granted to women again, and they have exercised that right very fully since that time. We have no difficulty whatever in casting our votes. We go to the polls with our husbands or with-out them, as the case may be, register,

"I think as Miss Parkhurst expresses realf, women should have the right vote (whether they exercise that ght or not) for the laws that men ake, women as well as men are iliged to obey. Also, if owning prop-ty and taxed, as they are here, they use the right to vote for the measures at means of property distribution, d certainly for the election of school usines. Mothers should have voice in stees. Mothers should have volce in o should have the secular and moral teation of their children. Women te no desire to encroach on the hts of men. They are fighting only a few common sense rights. Yours

SALTAIR SPEEDWAY.

Meeting of Citizens Interested to be Held This Evening.

There will be a meeling at 8:30 this vehing, in the Chamber of Commerce of citizens interested in the proposed utomobile speedway between this city and Saitair. The scheme is to have a road 40 feet wide, paved with slied shale, so there will be no dust, sait the roadway will be firm and hard. There are only two county reads crossing the speedway, and as these are only used in the spring and fall by sheep herd-ers, they are not regarded as cuiting any particular figure. The railroad company is ready to furnish the shale which is found in large quantities out near the point of the mountain, and as the work can be done very cheaply, the entire cost ought not to exceed \$30,-000. It is believed automobles can make the run of 12 miles casily in 20 minutes. and Saltair. The scheme is to have minutes.
