Pain in the Stomach

Loss of appetite, nervousness,

headache, sleepless nights, an irritable temper and a wasting of flesh mark the dyspeptic. His stomach needs nerve force to make it work, just as a steam engine needs steam. When a man finds that he is using up his vital powers faster than nature can replenish them it is time for him to call a halt. Soothe and quiet the irritated nerves, strengthen and invigorate the stomach, give the tired brain rest and sleep, and he will get well. The quickest way, the easiest way and the best way to do this is to ask your druggist for a bottle of DOCTOR

MILES' Nervine

and give it a trial. Get a bottle now, before your system is entirely broken down and disease gets a firm foothold.

"I suffered from chronic stumach trouble and nervous prostration for nearly two years. I could not sleep, had no appetite, was nervous and irritable and was unable to attend to my business. I had been taking Dr. Miles' Nervine and Nerve and Liver Pills but a few days when my appetite returned and I could sleep at night. I was soon restored to good health which I have enjoyed ever since.
