## MINING, BUSINESS AND STOCKS

# FINANCES OF THE BUTLER-LIBERAL

Manager A. L. Jacobs Says Bingham Company Has No Less Than \$11,000 in Its Treasury,

## SEVERAL CARS OF HIGH CRADE

Loaded Yesterday - Production for October Will Amount to 800 Tons -One Half First Class Ore.

Manager A. L. Jacobs, of the Butler-Liberal mine of Bingham, spent yesterday at that property where he saw several cars of first class ore started off towards the valley smelters. Mr. Jacobs said today that the pro-

duction for the month of October will amount to at least 400 tons of first and an equal amount of second class ores, and that the lot now en route and at the samplers will bring into the treasury something like \$3,000.

The finances of the Butler-Liberal are in excellent condition; the treasurer having in his possession no less than \$11,060. The operating expenses of the mine amount, Manager Jacobs states, to about \$2,000 per month, which in-cludes the cost of the campaign of de-velopment as well as that of the min-ing and extraction of ores. Thus, it

will be seen, the mine is making money and laying in a good surplus.

The second class ores are being treated at the Dewey mill, but when the latter passes into the possession of the owners of the Columbia mine it may be necessary to cease the marketing of the second class product; how-ever, Capt. Tibbetts, the Columbia's new manager, is not inclined to close the plant against the Butler-Liberal until he gets his forces fully organized at the Columbia and preparations com-pleted to market the second class ores from there steadily.

But when the Dewey plant can be had no longer, Manager Jacobs will devote tiention to the marketing of high ores and leave the second class

so until next spring by which time milling facilities will likely be provided. The Bueler-Liberal has made a spiendid record since its consolidation with the Chicago-Bingham, when the threatened litigation was brought to an end. Much of its territory is yet un-prospected, and there is no telling what great proportions the mine may yet de-

## ON MINING EXCHANGE.

Strike in Daly-Judge Brings Strength to

The strike of sensational ore made in the Daly-Judge mine at Park City in-creased interest in that stock today and some lively bidding was indulged in for transfers t many. though brokers bid \$10 for it on the open board. No change was recorded in Daly-West and Carisa held even proves we feel it urgent to continue for with yesterday's quotations. Tetro was in heavy demand and 8,700 shares went down under the hammer. A small order for Yankee Con, was filled at 44 cents. For Swansea 45 was bid and 55 cents asked.

The closing quotations and sales were posted as follows:

HIGGINS MAKES A STRIKE.

Former Salt Laker is Making a Huge Success In Oregon.

A letter received from Oregon reys the information that C. C. Higgins, who is working the Baby mine, near Grant's Pass, has made an important strike in that property. The new vein encountered is three feet wide and contains some sensationally rich gold ore. Shortly after braeaking into the vein Mr. Higgins took out a candle box full of the rock which was fairly

spattered with gold; the values running well up into the thousands.

Mr. Higgins, since taking charge of the Baby property has been operating a small mill and has made good money. His many Utah friends will be glad to hear of his late good luck.

## MAJESTIC SMELTER.

An Accident Has Caused Another Delay At the Milford Plant.

The Majestic smelter at Milford was blown in" yesterday, but was forced to close down soon after the start was made. A telegram from Acting Manager Kinnon, received this morning, that on account of the running hot he concluded to "blow-out." The shutdown will be brief. He stated the furnaces worked nicely.

## MAGNATES EN ROUTE.

May Order Enlargement of Copper Smelter of A. S. & R. Co. at Once.

A party of executive officials of the American Smelting & Refining company are expected to arrive in the city it a few days. The gentlemen are mak-ing a tour of the western plants of the big corporation. They will look over conditions at the local plants and it is probable that Manager Whitley will be instructed to proceed with the enlarge-ment of the copper smeiting facilities, upon which it is proposed to spend \$750,-600, the directors, according to eastern dispatches, having already authorized the expenditure.

In the party will be Simon and Dan-iel Guggenheim, R. Payne Wnitney, Si-las W. Eccles and ohn Hays Hammond.

## HAVE REALIZED \$100,000.

What the O'Meara-Lynch Company Is Doing with the Nevada-Alpine.

Thomas J. Lynch returned Sunday from a several days' visit to the Alpine property at Lone Mountain. He states that a force of 18 men is now at work at the mine, the largest ever employed, and that a large amount of shipping ore is being extracted and regularly forwarded to the smelters.

It is just a few days over a year since the Alpine property came into the hands of the O'Meara-Lynch company, and in that time the net returns from the shipment of ore have amounted to considerable over \$100,000. This, added to the cost of extraction, transportation and reduction, would bring the total production well up towards the \$200,000 mark, making a most excellent showing for a property which a little over a year ago had shipped but little ore and was practically unknown. It is, however, but one of a number of Lone Mountain properties that will be doing the same thing the coming year. The Tonopah-Belcher is already following it as a close second.—Tonopah Bonan-

### CONDITIONS SATISFACTORY. Blue Acre Stockholders Advised of Pro-

gress Being Made.

In the monthly bulletin issued by Managing Director Henry M. Crowther, of the Blue Acre Copper company, conditions at that Beaver county property are found to be in quite satisfactory shape. The bulletin says: "We had intended to discontinue sinking in our No. 1 incline shaft at

300 feet depth, but it was showing extra favorable ore at that depth, and consequence we are still going down, being now 312 feet deep; besides con-tinuing the cross-cut tunnel at 300 foot level which is now in 20 feet. The sinking of No. 1 was to be discontin-ued only because it would be well to proves we feel it urgent to continue for the present. Our No. 4 shaft is now down 135 feet, and shows better quality of concentrating ore and more water: in fact, this shaft is opening up a very extensive mass of low grade ironcopper sulphides, not unlike the im-mense bodies of Bingham camp ore."

## CONCENTRATES.

Tony Jacobson, manager of the Co-lumbus Con., is in Alta today. The two-cent assessment on Dexter

The jigging plant at the May Day mine was started up again yesterday. Joseph Oberndorfer and Matt Cullen have gone to California on mining busi-

becomes delinquent tomorrow,

Captain Duncan McVichie is inspecting the Eagle & Blue Bell mine in Tin tie today.

The Tetro has two cars of ore in to-day's market, one first and the other second class.

William Pearson, who is directing the forces on the Wah Wah springs pipe line in Beaver county, will leave for the south tonight. Assistant Secretaary Merriman of the

Majestic Copper company went to Mil-ford last night to pay off the employes of that company. The ore and bullion settlements re-

ported late yesterday were as follows: Crude ores and concentrates, \$58,200; base bullion, \$56,900; gold bars, \$20,000. Total, \$135,100

William Meager, of Galena, Nev., who has been in the city for several days, departed for home at noon today. He has been in Colorado on mining busi-

The assessments levied on the stock of the La Reine and Northern Light companies, becomes delinquent next Monday, the former one cent and the latter two cents a share.

The Tonopah shippers complain of a shortage of ears on the Carson & Colorado railroad out of Sodaville. The rolling stock of the line is limited and every bit of it is in commission.

A letter from Seattle states that C. H. Jacobs, formerly of the Sunshine mine, near Mercur, has found a tin deposit in Alaska, which is said to be of onsiderable value.

Paul Johnson, formerly connected with the smelting industry of this state is in the city. He has inspected several of the modern plants erected during his absence with a view of getting ideas which may be of benefit to him in the construction of a large smelter for a construction of a large smelter corporation operating in Alaska.

Manager Pollock, of the Tetro mine, states that it will probably take a week states that it will probably take a week or ten days to make the repairs to the compressor plant, which met with an accident several days ago. In the meantime the mine will not come forward with the usual shipments. It was necessary to wire to New York for the parts to be used in making the repairs.

## NEW YORK PRODUCE.

# ALASKA'S GREAT MINERAL RESOURCES

H. H. Hunter, Well Known in Mining Circles, Tells About the Juneau and Other Districts.

## ECONOMIC CONDITIONS COOD.

Immense Quartz Camp Extending to Berner's Bay-Ledges Are Large-Ores Can be Treated Cheaply.

H. H. Hunter, well known in western mining circles and who has many friends in Salt Lake, is at the Knutsford. He has recently returned from a trip to southeastern Alaska, with the mineral resources of which he is thoroughly impressed.

A "News" representative who has known Mr. Hunter for years, requested an expression of his views on that section. Mr. Hunter was reluctant in say. ing much, at first, because of the highly colored and extravagant stories that have appeared from time to time in the newspapers. After some persuasion, nowever, he expressed himself as fol-

lows:

Many rich quartz strikes have been made during the past summer in the district north of Juneau and extending to Berner's Bay, which demonstrate under active development that this section of Alaska is destined to become one of the greatest quartz mining camps on earth, barring none. easily accessible at all seasons of the year, with all economic conditions favorable for cheap production, abundant timber, water power and ocean transportation. In the immediate vicinity of Juneau, as in the case of the Treadwell and Silver Bow Basin mines, the ore bodies are very large, but values are comparatively low grade, requiring the investment of vast capital to put them investment of vast capital to put them on a paying basis, but all development in this section has demonstrated inin this section has demonstrated in-creased values with depth, and exten-sive development is contemplated for the Silver Bow section in the immedi-ate future. The referred to recent rich strikes have been made in the vicin-ity of Yankee Cove, the belt having been conclusively demonstrated to ex-tend porth and south from the vicintend north and south from that vicin-ity some 26 miles. The veins are true fissures cutting the states and porphyry

Insures cutting the states and porphyry in a northwesterly course.

Thos. D. Drew, recently from Nevada, purchased on the south limit from John Peterson and partners of Juneau, 17 claims for a consideration of \$116,000, largely cash and has a large force of men at work road building, installing machinery and in mice. force of men at work road building, installing machinery and in mine development. The ore body snows from 6 to 30 feet wide, carrying an average value of about \$25 per ton gold. North of Drew some 3 miles a Mr. Malloy of Georgia, purchased from Juneau locators for \$150,000 a number of claims that under development are showing exceedingly well, the ore body at a 100 feet depth being 30 feet wide, average gold value \$25 per ton. North of this feet depth being 30 feet wide, average gold value \$29 per ton. North of this property some two miles phenomenally rich ore has been struck by Milo Kelly and partners, the vein being a well defined fissure in the porphyry and the ore assaying in the thousands. They are sacking ore and have Indians packing it to the coast for shipment. Adjoining this property on the north I am interested in a property that we have conclusively proven the vein for 6,000 feet on the surface from 4 feet to 10 feet wide, with good values the entire dength.

tire dength.

At Berner's Bay, directly north, the ore bodies have been cross-cut at a depth of 500 feet and the property was purchased by some members of the Treadwell syndicate at a reported consideration of \$2,000.000, and a 300 stamp mill is to be exceed.

mill is to be erected.

This particular section of Alaska has a good climate with the exception of rain the past summer being an exceptionally fine one. The whole northern coast is rapidly coming to the front, and will work out its own salvation from a mining standpoint. There is no place on earth where ore can be reduced as cheaply as there. Coke is in abundance and there is cheap transportation. A large smelter is now being built at Prince of Wales island, and will be running in a few months: this makes four smelters on the coast and there will be more. ill is to be erected.

four smetters on the coast and ture will be more.

The vast resources of Alaska have not been scratched and one has but to make the inland trip from Seattle to Skagway, which is a most beautiful one, to realize this. Naturally Seattle from its geographical registion, will ben, one, to realize this. Naturally Seattle from its geographical position, will ben-efit materially from this development and is today one of the most substan-tial cities on the coast and growing

ranidly.

The Nome section is holding up to all predictions as a placer camp and recent discoveries of tin ore in places at York are attracting much attention. There has been considerable activity in the oil fields and I am informed some good wells have been struck, the oil being very high grade and in good quantities.

## THE DALY-JUDGE STRIKE.

Find in Park City Ponanza Believed to Be of Immense Importance.

Be of Immense Importance.

The most important event of the week in Park City was the strike made in the western part of the Daly-Judge mine last Sunday night. On the strength of it the stock advanced today. The find was made on the 1,400 level and the ore exposed is largely high grade some of it assaying as 400 ounces silver and 32 per cent copper in addition to lead contents. No such ore as this has ever been found in the Daly-Judge mine before, consequently the officials of the company feel very much elated. The ore was broken into after passing through something like 200 feet of fine milling ore.

The exact location is on the services and the strength of the company for the content of the company feel very much elated. The ore was broken into after passing through something like 200 feet of fine milling ore.

The exact location is on the north The exact location is on the north rim of the Bonanza Flat basin and about 1,700 feet from the surface: in ground owned by the Daly-Judge com-pany before it purchased the Anchor

## CENTENNIAL TO START.

Advices from Tintle Say Smoke Has Been Shut Out of Workings.

Advices received from Tintic today stated that the openings between the Centennial-Eureka and Eureka-Hill had been bulkheaded and that the miners at the former would go on shift again tonight; the smoke and gases caused by the fire in a neighboring property having been effectually shut out.

Citizens of the camp are more en-couraged now than at any time since the fire started; indications are that the worst is over and that the fire has practically buried itself out.

# EVERY WIND UPSETS STOCKS.

New York. Oct. 21 .- The stock market was confronted this morning with the announcement of the suspension of the Federal National bank of Pittsburg. Prices ran off in consequence under heavy efferings in some of the prominent stocks United States Steel preferred showed the greatest declien of 14 on the sale of 1,000

There was a subsequent rally of Blocks of 1,000 to 5,000 shares came upon the market of Pennsylvania, Baltimore & Ohio, Union Pacific, Atchison and United States Steel. There were losses of a point in Union Pacific, Missouri Pacific and Sugar. Rallies on secondary quotations showed the effect of supporting orders. Some stocks advanced materially. Southern Pacific was bought freely and there was also a large demand for United States Sieel preferred and Amalgamated Copper. Smelting rose 2%. The market became animated in the second hour and prices moved upwards pretty comprehensively. Pennsylvania, Baltimore & Ohio, New York Central, St. Paul, Kansas & Texas preferred, Delaware & Hudson, St. Louis-Southwestern preferred, Chicago & Great Western and Rock Island preferred were prominent railroad stocks that rose a point. Among the specialties North American rose 3%, and Smelting preferred The United States Steel stocks held slightly above last night's level and Colo rado Fuel lost a point. The advance halt-

ed and the market became dull. . Bonds were strong at noon. The Rock Island ne whonds were conspicuous. A few of the inactive stocks made large gains, including Pullman, which figure for 415. Missouri Pacific crossed 91, but the other standard stocks were not essen-

the other standard stocks.

The market drifted downwards on realizing by traders who let go their stocks when the buying movement showed signs of exhaustion. Large fractions were aliened off of the day's rise and the spiritude. ing was pretty general.
