Industry of Mayne & Leonard Begins at Park City.

This morning at Park City the Mayne & Leonard zinc plant was started up For some time past experiments have been made with the zinc ores of the Park and the process employed in the company says the well near Price is now 1,240 feet deep and still going down. While plenty of oil indications extraction of the metal therefrom, and the management declare that there is now no element of uncertainey attached to their venture. All they re-quire is the ore, and of that they have already in stock about 12,600 tons, with 25 tons of zinc-bearing tallings coming daily from the Anchor mill. The Glen-coe, California and Comstock dumps all contain zinc-bearing material withwhich to keep the plant in operation. In the process adopted by Mayne & onard the concentrated zine product is subjected to sufficient heat in a roast. er to magnetize the iron contents, after

Debeque Oil and Development com-pany's strike at Debeque. The flow in the well is increasing and it is believed that within a week or ten days the biggest strike in the history of the state will be made. Oil boomers are re-ported as flocking into Debeque in anficipation that the new well will prove a gusher and, indeed, if the well proves a gusher an old-time rush for Debeque is looked for. Reports from Pagosa Springs state that the oll fever in that

section is unabated and that there is every indication of one or more big strikes being made. Several companies are operating in the district and several more are planning to begin tions. The Colorado oil fever has got-ten into Boulder county and several wells are going down, with indications of oil.

Park Record: Joseph Greenough and Frank Lake are out to the Ramshorn group, situated between the Valeo and East Valeo, to do 100 feet of development work, for which they have a con tract. They took provisions, etc., along enough to last them until their con-tract is finished. Work at the D. & M. group up Thaynes is pushing right along. The old tunnel has been driven thirty feet further, giving it a length of 430 feet, and raising from the face is now going on. The property is showing up splendidly, The Little Bell shaft has reached a depth of 290 feet, and Superintendent Keetley is making Superintendent Keetley is making ready to cut a station on the 300. He expects to be at this work the first of the week. Everything is looking satisfactory. At a meeting of the direc-tors of the Constellation Mining com-pany, held Thursday, an assessment, No. 28, of 1½ cents per share, was levied, payable immediately. The direc-tors of the East Valeo Mining company ment Monday and levied an assessment of ½ cent per share on the capital stock

Those Within Influence of Northwestern Settlement Owing to Legislative Obstacles.

Ball Manipulation Lifted Specialties Gold Exports Sent Many Stocks Sliding Down.

New York, Nov. 18 .- Stocks of railroads within the influence of the Northwestern railroad settlement were depressed at the opening on the threat of legislative obstacles to the plan. Union Pacific dropped 1% and St. Paul a point and other stocks were lower in sympathy, but there were prints of firmness elsewhere in the list, The gain in D. & R. G. reached 1%. American Locomotive stocks were in demand at advances of about a point each. The trans-continental stocks became steadier when bull manipulation developed in the specialties. This was most pronounced in Metropolitan Street rail-way, Amalgamated Copper and Consolidated Gas, which rose from 1 to points. The general run of stocks, however, did not vary much from last week's close, and the prices reached on the rally were not long maintained, as the effect of selling Sugar and the announcement of gold exports forced the market off before 11 o'clock. Sugar and New York Central declined a cess" for gold extraction is said to be point. Metropolitan 11/2 and the Pacifics creating a sensation among mining men and Grangers receded to the lowest. Losses were extended throughout th

tween 1 and 2 points under last week's close. Pacific Mall dropped 24. Nata-

ple's Gas and Amalgamated Copper. There was an improvement of the market tone despite additional engage-

ments of gold for Europe. Where re-coveries occurred they did not exceed

1½ points, but were strongly held in the face of a later break to par by Mis-

souri Pacific. Other Gould stocks be-came easier in sympathy but the gen-

Provo Mining News.

Provo, Utah, Nov. 18 .- A mining dead from John Bestlemeyer and Katherine stlemeyer to James Crook and Harry Morse, conveying three-eighths inter-est in the Silver King mining claims in the Tintic mining district, for a con-sideration of \$1, has Feen filed with

the county recorder. G. J. Cristchen et al have filed notices of location of the Consari, the Constitu-tion and the Shamrock petroleum claims of 160 acres each, situated seven miles south of Tucker. Joe Blackett et al have filed notice of

location of the Columbia petroleum claim, 160 acres, situated seven miles south of Tucker

which it is passed through a magnetic which it is passed through a magnetic and if the stories of fabulous gain separator, where the iron is extracted from its use are true, any old body and the two constituent parts of the product are ready for market. Smelt-ers eagerly seek the iron and the zinc finds are very ready sale. Messrs. Mayne & Leonard have the best wishes 231/2 of the whole mining community for the success of their undertaking.

Grand County Mining.

The Grand Valley Times says: A car of machinery reached Thompson the first of the week for a copper extraction plant that is to be erected at the Court House station on the Thompson and Moab road. This is being finan-ciered by Salt Lake parties. The Mount Tamasaki Mining com-

have six men at work on their La Sal property, and have completed arrangements for work to be carried on continuously during the coming nage on continuously during the commence winter. This week work will commence on the main tunnel with a double shift of men.

A road is being built from Little Grand station to the Manganese mines, ten miles south, the grade is being made suitable for a railroad spur Lack of water at the mines has compelled a stoppage of work during summer months. The company behind this property are arranging to pump a supply of water to the mines from

Green river. A. P. Mohr is about to close a deal A. P. Monr is about to close a deal with an eastern company to place oil machinery on Grand county property. G. W. Durrant and W. E. Atkinson left Saturday to help put up the der-rick and machinery for the California-Utah Oil company, ten miles south-wast of Green river.

west of Green river. Lester Taylor, J. B. Skewes and L. H. Eddy left for Provo Sunday, where the annual meeting of the Big Indian company will take place this week. It garding the erection of a copper ex-traction plant at the Big Indian mines will be taken.

Park City Ore Shipments.

week

Following are the shipments of on from the Mackintosh sampler the past Pounds Ontario 66,000

Mining In Beaver.

That Beaver county is about to see an era of prosperity in mining is evidenced in the fact that Samuel New-house, John E. Dubois and a number of strong syndicates are operating there. A triple compartment shaft is being sunk on the Blackbird in the Copper Guich ground. This is in an-ticipation of the handling of a tre-mendous tonnage of loww grade ore.

O. K. Ore Coming.

A shipment of high grade copper or from the O. K. is expected in the market tomorrow. Assays show that \$3.60 for ton in gold is also a feature of the shipment, which is expected to net the company very confortable returns. There is talk of putting in furnaces to handle a daily feed of 106 tons so that the low grade product of the mine may be profitably handled.

New Cariboo Hoist.

Victoria. B. C., Nov. 17.-Senator Campbell, intimately connected with Campbell, intimately connected with extensive mining operations in the Cariboo country, left last night for San Francisco to consult with his com-pany and place orders for a holst to handle 10,000 pounds and two water-skips with a capacity of 1,000 gallons such to handle water in case of an each, to handle water in case of an emergency in the Miocene company's three-compartment shaft at Harper's camp, Horsefly, which is now 560 feet deep. It is by far the deepest shaft ever

may be able to get gold from any oid dirt

neers of the big district.

work during the inclement season

and some oil are encountered, a

Word comes from Park City that H. Coleman, Samuel Hare, William De-Lashmutt, Thomas Monks, Charles Bueler and Wilford Van Wagner, have secured a one-third interest in the St. Louis and Vassa mining claims lying between the Wovering and Southern Tier ground in the Snake Creek distriet The Park Record says that the cause

The market hardened before noon, but became intensely dull. The Park Record says that the cause of the collapse of the gailows frame at the Daly West shaft last Tuesday was the breaking of the large tie bolt at the top of the frame. Mr. Kirby says he will have a good, new holst in place of the old one by the first of the coming week, with the usual force of men at work taking out the customary ton-nage. ther through mid-day selling, it being especially felt in Atchison, Missour Pacific, New York Central, St. Paul, Union Pacific Brooklyn Transit, Peo-

Idaho Register: The dredge boat near Basalt [on the Snake river], which

was built by the Hoff Dredging and Exploring Co., is running now and very successfully, too, and when a few slight changes are completed it will handle considerable more gravel than was anticipated. One defect found was the pumping of the water direct from the river into the big bollers the water being so cold it was difficult

to keep up steam. A water heater has been added and will be put in place immediately, whereby the water will be heated by the exhaust steam before entering the boilers. W. A. Nelden, who is now in Wash-ington, D. C., with Senator Cannon and Judge Colborn, is suggesting the revival of the old chamber of commence in the

Amal. Copper Am. S. R. Co., Am. C. F. com. interests of mining and other indus tries. Referring to a letter which he forwarded to the Tribune Mr. Nelden do. pfd. . Ana. M. Co. says: "This is one of many thousand letters I have received since I was president of the chamber of commerce A. T. & S. F. R. do. pfd. Balt. & Ohio .. which died several years ago from starvation and neglect. I was the last president of the institu-tion, which, it seems to me, ought to be revived in the increst of Sait Lake's do. Brook, R. T. Co. Ches. & Ohio. C. & G. W. ...

future. Boston News Jureau: The directors of the Utah Consolidated gold mines, limited, of London, have declared dividend No. 2, of 5s per share (\$1.22), pay-able Dec. 10. There have recently been very important underground developimportant or body has been uncovered do. pfd. ially to the mineral resources of the mine. It is said that the Highland Boy is now opened up over six years ahead. We understand that the Highland Boy management has been able to bring about economies in the smelling of the ore whereby the cost has been brought down about two-third cents per pound. Park Record: Work has been stopped on the 800 of the Daly and the force put to work on the surface tunnel back of the engine at No. 1 works. This This will be good news to those familiar with the old-time producer, for it is here that Foreman Quinn has for years wanted to work, feeling satisfied that the ore body would be encountered within a comparatively short distance At present a drift is being driven or the ledge toward the Quincy, and it is reasonably certain that before 1902 is very far advanced gratifying news will come from this source and the old Daly will be among the regular shippers, and probably on the divident-paying Bingham Bulletin: The Sampson main incline has been retimbered where needed and put in order down to 600 level. It was formerly sunk to 800 feet, but below the 600 is badly caved When cleaned out and made safe sink-ing will be continued down to 1,000 feet. which depth will be same as the sollevel or water tunnel of Yosemite No. 2 This has been cleaned out and repaired for a distance of 700 feet from its mouth, and ahead there is still between 300 and 400 feet more of cl aning and retimbering to do. Then it will be con-

and workings of the No. 1 are in order. the several properties will be fully con-nected and in shape for a general de-velopment of the ore bodies. sunk in Cariboo. In addition to carrying on the regu-lar mining work of the company, Sen-ator Campbell has arranged to put on the report made of the product of the state product of the state of the product of the product
