NEW OIL WELL AT GREEN RIVER.

Part of Californians Arrive With Well Drilling Outfit.

UNITED STATES SMELTER.

Steel for the New Stack Arrives—Uncle Sam Shipments—A Bingham Prospect.

Tomorrow morning a party of Californians expect to leave the city for the oilfields of Green River. The party consists of C. M. Kilburn and W. M. Spencer of Oakland, W. J. Berry, Walter Selt, W. I. Roberts and Willard Copper of Selma, L. Parker of Santa Ana and F. H. Mitchell of Selma. All of these excepting Messrs. Spencer and Mitchell were here last summer looking over the Utah field, with which they are more than pleased.

The party came in from the coast yesterday afternoon. Before leaving a drilling outfit had been shipped to Price, which is expected to arrive there in the course of a few days. The object of the visit at this time is to decide where the first well shall be sunk on the California-Utah company's vast domain which covers thousands of acres in the Green River basin. All of the visitors are experienced oil men and they are expected to make a determination of the field in which it is within a reasonable distance of the surface.

In discussing the Utah oil fields this morning Vice President W. J. Berry said the Utah oil has splendid lubricating qualities which makes it more valuable than the California product. On this account he looks to see the Utah oil will be found comparatively near the surface. "Within a year," said Mr. Berry, "we expect to make discoveries which will excite the whole West."

Steel Plates Have Arrived.

The many tons of steel for the erection of the smelterstack of the new United States smelter have reached the city, and Messrs. Dedrich and Burke expect to rush it to completion within thirty days. The huge stack will be 20 feet high and constructed of steel throughout. It will have a diameter of 16 feet, so that steel plates are needed to encircle it. The plates are about 2 feet high and 15 feet long. The top plate is 1/4 inch thick while the top ones are tapered off to 1/8 inch. The foundation for the structure is nearly completed.

Uncle Sam Shipments.

Some speculation is being indulged in by the public as to whether the Uncle Sam will pass its November dividend. Manager Chipman could not say positively this morning. The shipments of the month have been the farthest short of what the knowledge ones predicted the company would do a couple of months ago. It is probably not fair to assume that the company will shut off dividends because one month's output runs low. It is a fact, however, that the company will not earn its dividend this month, and the investor cannot shut his eyes to it. The company may market 40 cars of ore in December and declare an extra dividend for Christmas but the fact remains that the shareholder will not receive a dividend until the next month. It is expected that another five cars of ore will be marketed before the dividend is declared, but with this done the company has not earned the dividend. It is necessary for the company to market 20 cars of ore per month to pay a dividend of \$15,000 monthly. It is said that a shipment of Humboldt silver ore will shortly be made which will greatly help the average of the lead ore shipments.

In Earning \$1,700,000 Annually.

In an intelligent write-up of the Highland Boy of Bingham the Boston News Bureau says: The September production of the Utah Consolidated smelter amounted to 1,111,300 pounds of bullion. This bullion averages 98 per cent fine as the maximum capacity of the smelter plant is only 500 tons daily this product must have come from not over 15,000 tons of ore. It would therefore appear that the ore is returning 2 pounds of copper to the ton, and with the gold and silver, has a value of about \$15, making possible a profit of \$10 per ton on its treatment. Figuring on this basis the Utah is earning at the rate of \$1,700,000 annually, or better than \$50 per share on its \$100 share.

A Good Bingham Prospect.

It is said that a party of Californians expect to leave the city for the oilfields of Green River. The party consists of C. M. Kilburn and W. M. Spencer of Oakland, W. J. Berry, Walter Selt, W. I. Roberts and Willard Copper of Selma, L. Parker of Santa Ana and F. H. Mitchell of Selma. All of these excepting Messrs. bedded veins and cross fissures on the ground and he expects to take the work again next spring, though for the present he has quit operating.

Suit for Ownership of Mine.

Special Correspondence.
Provo, Utah, Oct. 28.—E. W. Nash has commenced suit in the district court against Castella Resort and Improvement company and Percy S. Sowers, to quiet title to the "War Eagle" mining claim, lot 12, in American Fork mining district, to which a United States mining patent was issued in 1874. Plaintiff sets out that he claims title in fee to said premises, and that defendants claim an adverse interest which is alleged to be without any right. Plaintiff asks for a decree adjudging that defendants have no estate or interest in the property and that the title of the plaintiff is good and valid.

Notice of Location.

Special Correspondence.
Provo, Utah, Oct. 28.—The following notices of location have been filed with the county recorder:
The "Steele," situated in Silver Lake mining district, joining the Austin mine on the east, by R. H. Steele.
The "Homestake" and the "Cumberland," situated in American Fork mining district, about 2,000 feet east of the mineral monument on Miller hill, by R. N. Baskin et al.

MINING NOTES.

F. H. Lathrop came up from the Ophir of Stetline this morning.
The May Day of Tintic reached the market today with three cars of ore.
The Taylor-Brunton sampler reported eight cars of ore from Tintic today.
Five cars of ore were on the market today from the Grand Central of Tintic.

It was reported today from Bingham that a strike had been made in the Ben Butler.
An eight inch stream of oil is reported from the Salt Lake Oil company's well near Los Angeles, Cal.

The engine house for the converter plant of the Bingham Smelter company is delayed on account of steel.

S. W. Mosby expected to go to Tintic this evening to examine the May Day mill, which was to have been started up last spring.

The option on the New State Mining company's property at the mouth of Little Cottonwood canyon, expires Nov. 30th.

Supt. Ewing of the Red Wing reports 5 feet of ore in the face of the Red Wing drift. The Dewey mill has started on a big lot of second class.

W. H. Ryan came in from Eureka this morning. He says he is preparing to sink the old shaft on the Little Cottonwood at Silver City from 70 feet to 200 feet.

The sales on the mining exchange yesterday morning amounted to 41,500 shares, which sold for \$34,570. At the afternoon call \$32,750 shares were sold for \$19,661.63.

The secretary of state today received from the Eldorado Gold Mining company of Oregon a copy of an amendment to its articles of incorporation, increasing its capital stock from \$100,000 to \$1,000,000.

The increase in the ore and bullion settlements yesterday was due to the check from Con. company receiving a check for \$110,000 from the sale of bullion by the United Metal Selling company.

Evanson News Register: The Wyoming and Utah Oil Development company is arranging for the erection of two derricks, each 15 feet in height, upon the oil land, and has instructed Professor Freund to secure first-class well boring machines and tools, to open up its valuable ground without delay.

Pleche Record: In the range on the opposite side of the mountain, where has been discovered, William J. Smith, a prospector, discovered a ledge twenty feet in width that shows an assay of \$10 in gold. He shipped a sack of ore to Salt Lake to have it tested for the different metals.

WEAK STOCKS STRONGER.

Those That Showed Least Resistance Yesterday Advanced Today.

Vanderbilts Again Prominent—Michigan Central Jumps From 116 to 140 on Five Transactions.

New York, Oct. 28.—Stocks which were the weakest features yesterday developed the most strength, advances ranging from 1 to 3 points in St. Paul, Northwestern, Northern Pacific preferred, Union Pacific, Missouri Pacific, Amalgamated Copper, Sugar, Brooklyn Transit and Manhattan. The Vanderbilt stocks came into prominence again through the sensational bidding up of Michigan Central. That stock sold yesterday at 116 after a long period of neglect. Today the price jumped to 140 on five transactions. There was a jump of five points from 125 to 135, the next sale bringing 135 and the following one 140. New York Central rose 1 1/2, Illinois Central 1 1/2 and C. C. & St. L. 1 1/2. The buying movement slackened, but prices continued to move up. Wards in spots, Northwestern extended its rise to 4 1/2. The preferred rose 3 which was recovered subsequently. Michigan Central reacted ten to 136. Bonds were irregular. St. Paul, Union Pacific, and Southern Pacific rose above previous prices. The New York public utilities gained 1 to 1 1/2. Amalgamated Copper got 2 1/2 over last night, and the coalers advanced strongly. Steel recovered almost a point of yesterday's loss. Otherwise the movement was narrow and unimportant. A reaction of a point in St. Paul checked the rise in other stocks. The market then became almost stagnant.
