

BOARD OF EDUCATION

President John E. Dooly's interesting Annual Report.

NEW HIGH SCHOOL MUCH NEEDED.

Proposed site of New High School, Salt Lake City or Marion Street—Schools—Recreational classes.

President Dooly, of the board of education, entitled his annual report at the meeting of that body last night, an exceedingly interesting document which gives a clear outline of the work of the public schools during the past year, and its needs for the future. The older parts of the report we set before us.

To the Honorable Board of Education, Salt Lake City, Utah:

Dear Friends—A large majority of the people of this state are in full agreement to give the following report of the general condition of our schools, together with some recommendations as have suggested them to my mind, calling up my sympathies with the cause, and ready to go forward in the execution of such recommendations. I trust you will receive it cordially and respectfully, and thank you for your kind attention.

I desire to congratulate the members of the Board of Education, who have labored so faithfully and with such success in the performance of duties both financial and educational, while I recall a recent statement of the Board of Education, that the expenses of public education in this state exceed the amount received from the state, which is a serious charge against the Board.

In this connection I have but one

word to say, and that is

that the increase in efficiency and attendance shows that we are making rapidly progress in educational matters.

EDUCATIONAL EXPENDITURE.

The total expenditure of school

money for the year 1889-90 was

\$1,000,000.

It will be observed that about one-half of the provisions of this city is used in the public schools.

BUILDINGS.

Since the last report, the Ogden, Clinton, Emerson, Uintah and Bonneville school buildings have been completed, two others are under construction, the Washington, and one by the Jackson. All the new buildings are first-class in their appointments and are heated and ventilated by the most approved and modern methods.

To complete our present system, we require a first-class school building in the Tenth ward, and one in the Eighteenth or Nineteenth ward. The board has sufficient funds for these purposes, the cost of which should realize sufficient funds, with a fair real estate market, to erect these buildings. It is to be hoped that this can be accomplished before the next session, as it will be a great relief to the parents in the Tenth and Nineteenth wards, as well as to the school authorities.

It is with feelings of pleasure I can inform you that present estimates show that the state school buildings in our various cities are superior to any city of like population in the western states, and that they exceed either than their metropolitan institutions.

It is with feelings of pleasure I can

inform you that present estimates

show that the state school buildings

in our various cities are superior to

any city of like population in the western states, and that they exceed either than their metropolitan institutions.
