CEDAR CITY, Iron Co., ) Feb. 5th, 1868.

Editor Descret News: - Winter holds firm sway over the elements here, but appearances indicate that it will not be of long duration.

Our Bishop is still busy and persever-ing in raising money in gather the poor Saints from the old countries. He is leaving nothing undone to accomplish this godlike work, and his philanthrophic labors are being crowned with much success. He is full of the spirit of emigration, and has already had the pleasure of remitting to President Young nearly \$700,00 in money, besides contributions in wheat, &c., where money was not come-at-able. When the subject of raising means for the emigration of the poor was first spoken of in this place, it did not seem possible to raise \$100,00 in money in the settlement, but by various means, the above money. results have been brought about. Even our Sunday School scholars brought in their five and ten cent bills to swell the fund, and still the noble work goes on with unabated vigor.

Our mobilith meetings are very esting and well attended, notwitinstanding the intense cold, and the unfinished state of our hall. Bishop Lunt has however, purchased two heating stoves for the hall, which make it much more comfortable. The youths are being encouraged and felt after, with fatherly care and counsel. There are three day schools in our city during this winter, swo taught by female steachers, Aand one toy a male teacher. Music is being worked in as one branch of study in the day schools, and a very important one it is, as every teacher who has tried it must confess. Our choir, under the patronage and encouragement of our leaders, still improves. They gave a concert during the winter which was very successful and patisfactory. Our city fathers have not been idle in their sphere. They have just completed and forwarded the necessary documents for the entry of 639 acres of land for the use and benefit of our citizens, besides having a general care for the welfare of the people here. Gates and Co's. grist mill is about ready for business, having already ground corn and chopped some wheat. Stewart & Chaffin are also pushing their grist mill to completion. A. Bauer & Co. are building machinery for the manufacture of shingles, laths, furni-ture, &c. Samuel Leigh & Co. are Gates and Co's. grist mill is about ture, &c. Samuel Leigh & Co. are. finishing their building and machinery for iron founding, making shingles, The Council announced their concurrence in laths, &c. Our School Trustees are try-the House amendments to the bull for an act ing to finish a school house, and altogether our city is kept lively and business-like. Among other things our military matters are not forgotton. We have lately had a visit from Capt. J. D. L. Pearce and Major A.P. Hardy, who fully organized a cavalry company, and infused quite an interest in military matters among the people here. Our fast days are not forgotten, as the first Thursday of each month comes along, and the offerings of the Saints HAVE new on hand a Good Selection of are freely dispensed to the most needy amongst us. We have had more landoitgirousb vrove to vienidesM surveyed for our increasing population. In Washington county this session: accepted. President Heber C. Kimball understands that there are many in this city and in other places diacent, who have wool to card. He has put up a stoye and has the place where his two double carding machines work, in the 19th Ward, near Pugsley's mill and the Ward Meeting House, fitten up so that carding can be dene occasionally when the weather moderates. He also has David Le Baron to work them-a man whom David Le Baron to work them—a man whom the people know to be honest, for he has been well known among them for many years. He can cheerfully recommend Br. Le Baron as an honorable man, who has always given satisfac-tion to his customers when running machines for him. People bringing wool can have it done when they bring it, if there is enough at the machines to run a day. Bring grease as usual say one pound to seven. If the people will not bring wool along to be carded, the place will be closed.

Mrs. White has arranged to prolong her stay in the city for a little time longer, and those nearon bin writing oild Hall . seeining who desire to rapidly obtain an acquaintance with music should see her, for she communie cates a knowledge of the science, by "Robbins American Method," so quickly as to astonish those unacquainted with it. We think our musicians who wish to fully understand Har-mony or Thorough Bass, applied to the plano, organ, &c., ought to make themselves acquaints ed with the system soon, as she will remain. here but a short time. She can be found at the Townsend House.

The war consumed over 800,-000 men, and in some States the excess of women over the sterner sex is almost seven or eight to one. The Pacific States and Territories contain nearly thirty times more men than women, and if the right sort of the latter seek this market in a quiet way, the probabilities are greatly in favor of changing their names soon after arrival. This would result in building up thousands of homesteads, rendering our population more stable and moral, increasing respect and obedience to the laws, improving and un-folding our resources, and bettering our condition in all other respects;"
