

weeks ago, but the difference in opin-ion as to ownership was amicably set-tled, and the culmination was the in-corporation of today. While the plans of the company have not been definitely settled, it is under-stood to be the intention to lose no dime in getting down to active work. The personnel of the ownership coupled with the character of the ground owned is regarded in the light of a guaran-tee as to results. 1.50 1814 3.55 22.25 12 20 12¹/₂ 40

STRIKE RICH ORE.

Assays Give High Returns and Supply Is Believed Practically Unlimited,

2.75 Special Correspondence. 11

Cody, Wyo., Nov. 18.-W. J. Chap-man and associates recently uncovered an eight-foot vein of ore in the Sun-light mining district assays from which give returns of \$1,200 to the ton in gold. It is said the supply of ore is unlimited, and the owners are believed to have a bonanza. 1.37% 1% 25 234

J. E. Kearns has received assays of from his claims in the South Fork district that have returns of \$988 in gold to the ton. Both camps are remote from railroad very favorably located for business. The capacity of the plant will be be-tween 300 and 400 tons of ore a day, and contracts have already been made which ensure plenty of work for some time to come. About 200 men will be employed in three shifts when the smelter is going at full strength but for communications, and the properties are being developed at heavy expense. With a railroad tapping both districts, owners of claims would soon become very rich,

at. Congratulations were the order of the day, and W. T. Janney, the com-pany's metallurgist, under whose charge most of the experimenting was done, also came in for a large share of credit.

SMELTER NOW OPEN.

After Various Delays Everything is at Last Ready for Business at Ogden.

The plant of the Utah Smelting company at Ogden opened for business for the first time today. Construction of their treasury stock and hold on to their individual stock, and devote their the works was commenced some time ago, and at that time it was expected reasury to the development of their property, they will keep the confidence of the public and make of Goldfield a still greater camp." that the same would be ready for busi-ness several months ago. A number of vexatious delays occurred however, the last of these being occasioned by the destruction of the company's new stack which fell in the windstorm of a month

ago. The new plant is owned by the Ec-cles interests and is situated about half a mile from the Utah Hot Springs. It

Local Talent Organize Company for That Purpose.

The-Commonwealth Mines company is the name of a new corporation now in process of organization, articles of incorporation of which will likely be filed during the week. The capitalization will be 600,000

shares of a par value of \$1 each, and the company when ready for business will take over the Marie, Mabel, Bea-Rock, Mountain Andes, Midway Surprise lode mining claims in the Star district nine miles from Mil-

ford in Beaver county. The properties are spiendidly lo-cated being flanked by the Hud pro-perty on the west and the Burning Moscow on the south. The Beacon abosed on the south. The Beacon property has a record of having al-ready produced \$150,000 and the Rocky Mouncain \$400,000 and com-paratively little work has been done. The entire district is said to be heavily mineralized, various samples taken show high values, and from all indications, the new owners are in a fair way to make a fortune. Newton Dunyon will be the first

president of the new organization, William M. Bradley, vice president, 47,720 \$35,031.50 and W. T. Atkin secretary and tress-urer. The board of directors will be composed of these officers together with C. H. Strevell and James H. Pa.

perty was in the city Monday or line of the Oregon Short Line and is very favorably located for business. business.

W. K. Murdock, manager of the mines of the Honorine company, was in the city yesterday.

J. H. Turner left for Yerington again last night to watch progress being made on some properties which are under his supervision, smelter is going at full strength, but for

the present, the work will consist large the present, the work will consist large-ly of sampling, for which considerably fewer men will be required. The power used to operate the smelt-er will be brought by a recently con-structed transmission line from Brignected with his mining interests

PROBLEM IS SERIOUS.

Question of Fuel Supply for Southern Nevada Camps Attracting Attention.

There is seems to be no immediate relief as regards the coal shortage in this and other camps. The situa-tion is brought about by the insuf-ficiency of cars to handle both freight and coal. The people of Tonopah are up against a serious proposition. Should a severe cold spell set in, there would be dire distress and suffering. Yet, in spite of that fact, there does not seem to be any move on the part of the coal dealers and railroad to

take an yaction .- Tonopah Bonanza. CROSSCUTTING COMMENCED.

Double Compartment Shaft Now Down One Hundred and Fifty Feet.

Development work on the property of the Goldfield Silver Pick leasing syndicate is proceeding in a highly satisfactory manner, according to all accounts. Their double-compartment accounts. Their double-compariment shaft is now down 159 feet and cross-cutting has been started in two di-rections. The east crosscut, which is being run for the purpose of catching the big ledge which was cut on the 80-foot level in the shaft, is now out 24 feet, and it is expected to cut the big ledge most any time. Manager George F. von Polenz took some sam-ples of a 3-inch stream and the assays returns showed 58 ounces in gold, to-taling \$1,164 to the ton. This is evi-dently the same streak that was cut on the \$0-foot level, being part of the big ledge. On the upper level this streak assayed \$336, and if the values of the entire ledge should increase propor-tionately, the discovery will prove a very important one and will add an-other shipper to the wonderful camp. other shipper to the wonderful camp.

GOOD FOR TONOPAH.

Senator George S. Nixon Discusses Effect on Camp of Mine Merger.

In a dispatch from San Francisco to be Tonopah Bonanza, Senator George S. Nixon discusses at some length the effect of the recent merger of the principal mines of the district. Asked as to what effect he thought the mer-ger of the four big Goldfield mines would have on the camp, he said that would be more beneficial than other-

'I know what you mean," said he, "and I am not in favor of a one-mine camp any more than anyone else. But this is a different proposition. This is purely a local merger, and after the leases of the Mohawk have expired, well say 60 days later, there will be more men at work than there are now on all the leases put together. If the proceeds of these mines were going east or any other place out of the country, it would indeed be a deplora-ble matter, but the money is going to be spent in the building up of the cities of this state rather than those of the of this state rather than those of the

"But suppose that you and Mr. Wing-

"But suppose that you and Mr. Wing-field were to sell out?" was suggested. "There isn't money enough to buy us out," replied the senator warmly. "There is such a thing as local pride, you know. If we were offered \$20,000,-000 tonight it would not tempt us to part with the property. When a man

Charles H. Scheu has returned from a visit to his home in Los Angeles. While away he also visited the mines of Good Springs, and reports things there in excellent shape. Joseph Dederichs, at one time

resident of Salt Lake, is now in the city on a brief business visit. He announces that he has purchased the Co-lumbia property at Good Springs, and that indications to date are very satisfactory.

The case of Ira Beckstead against the Bingham Copper & Gold Mining com-pany has been settled out of court and dismissed. The action was brought to recover damages in the sum of \$2,841. 97 for injuries to plaintiff's farm and crops caused by the smelter smoke.

THE WEATHER MAP.

Winter came in dead earnest Satur-day night, and the citizens of Salt Lake woke up Sunday morning to find the mercury hovering 'around 20 above zero. There was a rush for coal bins, zero. There was a rush for coal bins, and fires were started up as rapidly as possible. During the middle of the day the atmosphere warmed up consider-ably, but at night the mercury fell again, and this morning stood at 14 above zero. With the rising of the again, and this morning stood at 14 above zero. With the rising of the sun the atmosphere became more agree-able, and this noon it was quite pleas-ant; but the weather bureau says it will be cold again tonight, and after-wards the mercury will be a little more lightly inclined, and it will be warmer. The weather man forday shows an in-

The weather map today shows an in-teresting condition of meteorological affairs, for the high barometric area that brought the cold weather, is cov-ering the entire United States. It or-iginated in the Hudson Bay country, where everything is now covered with snow and ice, and sweeping around to ing back. sure or at work. snow and ice, and sweeping around to the west and southwest, entered this country over the northwest border, and then turned east, southeast and south, extending down into old Mexico. Seven inches of snow is recorded at El Paso, on the Chilunghan barder, with the menneys, on the Chihuahua border, with the merneys. on the Chinakua border, with the mer-cury at 22 above zero. This means sieighing down there, something very unusual, and is made the most of when it occurs. It is evident that the cold norther extended as far south as Aguas Calientes, an unusual occurrence which is always attended with considerable suffering among the Mexicans who seem unable to get used to cold weather, while the "mortality" among water pipes at such times is something alarming to contemplate. It was snowing yesterday from Denver clear to St. Louis, and the lowest thermometer was
