unt of concentrating in the same manner is 1,000,000 tons. Undoubtedly this quantity will be sys-tematically added to during the next

Year. "Regarding Nevada Douglas ore vol-ues," added Mr. Pearse, "I have recent-ly sampled the mine very carefully and find that the average of the smelting ore runs from 6 to 7 per cent in cop-per; whereas, the low grade ore runs from 2 to 4 per cent copper. It is very from 2 to 4 per cent copper. It is very evident, therefore, that we are practic-ally certain of both tonnage and val-

After expressing himself in the foregoing manner, Mr. Pearse took up the metallurgical phase of the situation and declared that the smelling orethat carrying 4 per cent copper up-can readily be disposed of smelting. Being a neutral ore, it readl-ly yields to treatment by fire. But as e the low grade concentrating re said: "I can't say definite-whether we will best be able to ly whether we will best be able to treat it by mechanical or electrical con-centration or by lexiviation. Tests are, being made now to determine this, but I feel very confident that the enormous quantity of low grade ore in the Ne-vada Douglas mine will be available in one form or another and form the broader basis on which the commercial end of the enterprise will rest. The end of the enterprise will rest. The company has recently placed a large order for equipment and electrical pow-er, and the mine is being handled in a thorough up-to-date manner." The fact that Samuel Newbouse, the Guggenheims, Capt. Delamar and other

copper mining celebraties of more of less prominence have secured extensive interests in this Yerington country can be put down as a safe wager t that there is going to be some big things doing in the Mason Valley district from this time on.

ON 'CHANGE.

Day Was Quiet, With no Particular Feature During Morning Session.

This morning's session on the floor of the local exchange was inclined to be quiet in comparison with most of the days of this week.

There was no particular activity in any one stock and the total business during the session amounted to only 14,660 shares representing a worth of \$15,062.50. However this is considerably ahead of what is usually considered an average day's business. The quotations for the day closed as follows:

ELY-WITCH IN FIELD.

Yet Another Company Organized to Operate at Ely.

The Ely-Witch company with an authorized capital of 1,009,000 shares of a par value of \$5.00 a share is the latest incorporation to take place, having in view '1's development of Ely, Nevada, A deal was closed in Boston two or

A deal was closed in hoston two or three days ago whereby the ownership of the Witch group passed into the hands of a syndicate, organized for the purpose, and the present incorporation is the result.

In some manner it become known that a portion of the stock would be open for subscription before the incorpora-tion was actually effected, and immedi-ately a rush commenced in both Salt Lake and Boston to get hold of as many shares as possible. It is said that 200,000 shares at \$2.00 a share was signed up here and in Boston it was probably about as had. The property which the new company when formed will take over is located in the heart of the porphyry deposits of the Ely district, between the Ruth group of the Nevada Consolidated and the Jupiter group of the Cumberland-Ely. Considerable work had been done on the property by the Utah Consoli-dated which at one time owned it, and the indications are as favorable as In some manner it become known that

the indications are as favorable as those of any property in the district. J. E. and Ernest Bamberger pur-chased the Witch group from R. H. Channing, Jr., manager of the Utah Consolidated, who acquired it before the copper boom struck Ely.

Western Nevada Copper company, the capital will be \$6,500,000 in shares of a par value of \$5,00 each. It is under-stood that 400,000 shares will be placed in the treasury and that subscription for a limited number of these shares will be received a little later on. The

will be received a little later on. The price has not yet been decided upon. Those behind the new combination are. Samuel Newhouse, Senator Reed Smoot, D. H. Peery, C. E. Loose and Frank Knox. The Dyer group consists of more than 150 acress of the best min-eral land in that land of rich mineral deposits and in addition to this the company will own valuable water rights and smeller sites on the Walker river a few miles below the property. The mines have been worked for years past with the best of results, and M. M. Johnson of the Newhouse staff is now engaged in preparing a report on the property in detail. This report is expected to show that the property on the property in detail. This report is expected to show that the property is one of the most promising in the district and the probabilities strongly in favor of its developing into one of the greatest copper producers of the west. It is known to contain large quantities of 20 per cent copper ore. The district of Yerington is rapidly coming to the front as a copper section. So far it has failed to score a single failure, and nearly every company op-

So far it has failed to score a single failure, and nearly every company op-erating there is meeting with the best of success. With the guarantee which attaches to the name of Newhouse in the mining world it may be taken for granted that the new organization will take a foremost place among the pro-ducers of the district, and that at no distant date distant date.

FROM DEEP CREEK DISTRICT.

J. H. McChrystal Returns Enthusiastic Over Possibilities of Section.

J. H. McChrystal who has just re-turned from a visit to the Deep Creek country, is enthusiastic over the possi-bilities from a mining standpoint. Mr. McChrystal has made a number of trips into this section, and says himself that the more he sees of it the better he

likes it. In speaking of the Gold Hill property of the Western Utah Copper company, he says strength increases with depth and the surface indications as to mineral and geographical features are as good as anything in the state. The great vein system has been followed down to a sufficient extent to demon-strate beyond doubt the presence of strate beyond doubt the presence of large quantities of good ore. Frequent enclosures of rich ore are also encoun-tered, which in all probability have been missed entirely when samples were taken.

"The property consists of 20 patented claims," said Mr. McChrystal this morning. "And the main shaft is now

morning. "And the main shaft is now down 450 feet on the dlp and in con-tinuous ore, The main workings con-sist of this shaft and a winze of 112 feet. Recent assays show 5 to 6 per cent copper with about 5 ounces of sil-ver and \$4.50 in gold. The property consists of four groups of claims but all the work to date has been done on the Gold Hill group. The company also has 360 acres of ranch land containing an adequate water supply for any use for which it may be needed. The nearest railroad point is now 26 miles away, but they expect is now 26 miles away, but they expect to have a branch of the Western Pa-cific connecting the mine and the main line by next June.

line by next June." The results obtained on this property up to now have been of such an en-couraging nature that development work will be pushed just as fast as pos-sible for some time to come. The officers of the company are W. S. McCornick president, Capt, Duncan MacVichie vice president; H. H. Green secretary and treasurer; the directors are the above, together' with F. Augus-tus Heinze, Henry M. Sweet of Bos-ton, and Judge John A. Street of Sali-Lake. The greater part of the stock is owned by the officers and directors.

18

be the result when, as has now been decided upon the capacity is increased to 135 tons per day, and a cyanide plant added to the mine's equipment. With the ald of a cyanide plant it is estimated that a net saving of 99 per cent on all ore will be effected. capacity so tons, what will

LOCATION OF MINE.

The property is located about 65 miles from the nearest railroad point, the ore being hauled that distance by mule team. The company is at present having built a heavy freight automobile which will be put into commission as soon as finished. Should it prove a success it is possible that mule power will be discarded in favor of gaoline, although Mr. Morehouse does not express a great deal of faith does not express a great deal of faith in the plan. With a record such as this, the di-

rectors have every reason to feel pleased with each other and them-selves, while the outlook for the fu-

serves, while the outlook for the fu-ture, all points considered could hardly be improved upon. Mr. Morehouse in one part of his report, makes the statement that he considers the Mexico Consolidated mine the largest silver property in the southern republic.

WILL ENTERTAIN NEVADANS.

D. H. Peeery will give a dinner at the Commercial club this evening in honor of L. M. Sullivan and Peter Grant of the L. M. Sullivan Trust com-pany of Goldfield, Nevada.

THAW CASE.

Commission to Take Testimony of Persons in California.

sons in California. New York, Nov. 22.-It was unofflically stated today that Dist.Atty. Je-rome and counsel for Harry K. Thaw, who is now in the Tombs prison awaiting trial on a charge of having murdered Stanford White, will apply to the court for a commission to take testimony bear-ing on the Thaw case from a number of persons in the west, several of whom are in California. These depositions are known as "interrogatory examinations." A representative of the district-atter-ney, it was explained, would be present to cross-examine the witnesses. In this way there will be no trrouble about the admission of the depositions as evidence when Thaw is placed on ttrial.

If You Have Any Western Idaho Sugar Company

Stock don't sell it now. But if you need money and must sell, call and see us and we can sell it for you at the market price.

If You Wish to Buy

We believe you can buy through us now cheaper than at any future time. Orders are filled by us in turn as received. We also sell other commercial stocks and can get what you want if it is on the market.

George M. Cannon Company.

Rooms 612-513 Templeton Building. 'Phone Bell 57.

Holiday Books for Season 1906-7.

WE take pleasure in announcing to the public that we have purchased from the leading publishers of America their choicest products in the line of popular and beautiful books.

During our experience in the book business we have observed a growing taste among the people for reading of high class literature.

We sell more and better books each year. Having confidence in a still increasing demand for the coming Holiday Season we made heavy purchases, so that we have a complete and highly satisfactory assortment of Art Books, Gift Books, in Elegant Binding, Latest Popular Fiction, all the old Standard Authors, Juvenile Books, Boys' Books, Girls' Books, and all the New Funny Books for the Children.

Our Book Department will lead anything of the kind in the Country. We are ready for you now-Buy early.
